WHY NOT LISTEN TO A REAL AUTHORITY?

Since the federal tax collectors are turning out substantially as Secretary of the Treasury Mellon had producted it might be well r the American people to pay a little more attention to his judgment and less heed to radical politicians, remarks the Spokane casting station, Spokesman-Review , Secretary Mellon says that a \$70,000,000 inpared with the March collections of income and profits taxes, as compared with the March collections of inst year, when the higher amount and profits taxes applied, gives a practical answer to the tax problem and "shows clearly what waster is now adopted in Ohio we used to have a dozen kinds at once. I've seen it so problem and "shows clearly what course further revision should wet I had to sit on a rail fence and take." The secretary is justified in pointing out that these increased collections confirm his prediction that downward revision on the would have the effect of increasing, rather than decreasing, the federal revenue; that downward revision had acted as a stimulant to business. It has been a common mistake in the United States to give capital and labor entire credit for achievement and production. They are important lega of the tripod that supports prosperity, but an equally important third leg is initiative and enterprise. Initiative, enterprise and managerial skill borrrow capulate labor. The research is finding that where it tranges the feet out into the fog before I discovered my mistake. But Pal and employ labor. The country is finding that when it frames before I discovered my mistake. But its tax legislation to chill enterprise and initiative and drive capital into a loufing attitude it is injuring the American public, including the wage-earners, and is keeping taxes out of the treasury. Ike a tes kettle and the fish floated Initiative, enterprise and capital can strike, just as readily as ashare, already to led with organed labor can strike, and they do strike against oppressive and confiscation and the fan floated labor can strike, and they do strike against oppressive and confiscation. As a further incentive to their striking, to hang the thermometer in the well congress has been carrying on a policy of issuing, and encouraging oursing. Along about sinset I want states, cities and other municipalities to issue tax-exempt securing. Along about sinset I want out to the barn to see how the stock was getting along. We had twelve likes. This exemption, in the vernacular of the street, in "nuts" and duck soup" to striking capital. If farmers, wage carners and other voters would pay more attention to the authoritative judgment of the accretary of treasury, and do less cheering for irrespondible politicians who want to run the treasury in the contrary sponsible politicians who want to run the Breaking in the contrary eggs. way, we should be making more rapid progress in clearing away the wreckage of the war.

TENANTS AND CHILDREN

Much indignation is expressed by house renters, that so many owners of houses are unwilling to lease their property to families owners of houses are unwilling to lease their property to families that gawlf shooters will be out at having children. If his receipts are all exten up by the damage done by prorly controlled youngsters, there is no object in owning real estate. If parents with children want landfords to view them with favor, they must either teach their children to take care of their dwelling, or they must repair damage themselves. Ans. Are you sure that you are not lealous, and that it is not so much that you think the girl's reputation is not good as that you are a little bit pations of her: Your husband prop-ably feels that it is not right for him to discharge a good office girl be-cause you do not like her, and he is resulty within his rights in this. As joing as she does her work in the office, it is nothing to her employer what she does out of business hours. As for your husband taking her home, he was probably just being thought-ful and appreciative of the fact that she had worked overtime, and was trying to show it. I agree with you that too much of that would probably be talked about. By being reasonable we believe abe Lincoln got his start splitting rails all eight, but we don't receil that he meatinged the linard a few gosins talk about her.
