Oregon is Not So Bad

We hear a lot about Oregon's faults and the faults of her people. But Oregon must take second place when it comes to the fairer sex matching a state-wide row, Over in Scattle at a parent-touchers' gather-ing recently there was a real, hon-cut-to-goodness brand pulled off est-to-goodness brawl pulled gmong the "intellectual women" the state.

Just what tone of ofce these Washington women used but it is nlmost Russian statesmen, when the red of YOU'RE NOT A SCOUTflux was assaulted.

Those Who Wen't Work

Generally speaking, there is now a job in this country for every man who want one. This holds true in almost every community. The mayor in one enterprising cliy of 50,000 people is determined that the indusrious members of the community chall profit accordingly, without baying to support any idlers. He is having a list made of all the ablebodied loafers in town and holding it for future reference. The loafers are duly warsed that if they apply for help next winter, as many of them have done in previous winters, there will be "nothing doing."

This is a commendable policy, if Walk if you would live long, but tion, it is a historic American prin-not where the automobiles are thick-cipie, handed down from colonial days, that "he who will not work chall not ent." There is less need of that drastic rule now than there was "Darling, my love for you is greater in the days of pioneer hardship or thus the world! larger than creation! during the recent war, yet it is just as it ever was, and as wholesome for those to whom it is applied.

Let the professional leafers be discouraged by every possible means, in time of plonty as in times of stress. Then, when grounds need does come it will be less severe.— Albany (Semocra).
