

LADIES—Here's Your Chance!

To buy choice wearing apparel at wholesale prices. We are going to close out our entire stock at and below actual cost. We must vacate our present quarters by June first. No nicer line of Ladies' Wearing Apparel was ever before offered to the public at such moderate prices. We have thrown the entire stock on sale—not a single article is reserved.

Saturday Morning at 9 O'Clock

We are going to offer you a wonderful line of Ladies' Dresses, all new and modern in every detail—of the highest quality—at prices below actual cost to us.

SILK BLOUSES—Hand embroidered and beaded—a beautiful line offered to you at less than wholesale cost.

LADIES' LINGERIE—In dainty shades. New, clean merchandise—way above ordinary values.

BIG ASSORTMENT OF LADIES' HOSIERY—Full fashioned, opened clocks—the newest thing in hosiery. Priced as low as \$2.25 a pair.

LADIES' BRASSIERES, 45c to \$1.35. **W. B. and GOODWIN CORSETS**, \$5.00 to \$6.00 values, now \$3.50; values \$6.00 to \$15.00, now \$4.50 to \$7.00. **HAIR NETS**, all shades, 3 for 25c. New assortment of **LADIES' COLLARS**, 90c to \$2.50.

DON'T MISS THIS OPPORTUNITY TO BUY REAL MERCHANDISE AT A BIG SAVING

Saturday, May 12, at 9 o'clock, is the day, date and time of this closing out sale. The entire stock goes—not a single article is reserved.

"BIG BERTHAS" MYTH, FRENCH DEPUTY'S IDEA

By HARRY FLODY,
(International News Service Staff
Correspondent.)

PARIS, May 7.—Did "Big Bertha" the supposedly giant long range gun which shelled Paris intermittently from the 22d of March to one night in August, 1918, really exist?

The "Berthas" were a German hoax, it has been suggested by Leon Daudet, a deputy of Paris, writing in L'Action Francaise. This source of the shells which fell in various parts of the city during those exciting days was really an electrically controlled cannon, hidden in a factory or cellar in a Paris suburb, Daudet contends, and he expects that sooner or later this contrivance will be discovered.

Never Saw One.
Daudet points out that no Frenchman has ever seen any of the supposed "Big Berthas" and that no traces of them have ever been found in the Krupp factories at any place in Germany. The only evidence of their existence, he says, is a report that American army officers saw several of the big guns in the Rhine valley, in Austria, in 1919.

Was French War Ministry, through

the staff, supposed to deny Daudet's supposition, and L'Echo National, the day after Daudet printed his sensational supposition, published the complete official German report of the construction and destructive work of the "Berthas."

This report, which Daudet characterized as vague and unconvincing, told of the conception of the big guns and of their manufacture after the specifications had to be changed to increase their range from 100 to 120 kilometers when the Germans were forced back that far from Paris.

They first went into action, according to the report, near Laon, and later, when their location was detected, they were moved through the town of Soissons, then not far from the French front, to the vicinity of Ham.

Destroyed By Germans?
"Finally we ourselves destroyed, in our own country, that marvel of the technique and science of artillery," the German report read. "What we accomplished will ever remain in history a glorification of the artillery of the Imperial German navy."

The report disclosed, according to Daudet, that the "Berthas" were fired blindly in the general direction of Paris.

"And we, then, attribute their success to the good old German god," he queries. "And why, when the Germans noted the marvelous success of the 'Berthas' did they not construct more? Life in Paris would have been unbearable if they had followed up that advantage."

Daudet also points out that transportation of the "Berthas" through

the city of Soissons, without detection by the French, always hovering over the city in airplanes, would have been absolutely impossible.

Because no Frenchman has ever seen the "Berthas" L'Echo National suggests that if they really existed the Germans may have hidden them.

"While they pretend to have destroyed the material perhaps they transported it and hid it somewhere in the north of Germany," the article concludes.

ONE DRINK ENOUGH TO ENDANGER LIFE

BOSTON, Mass., May 5.—Motorists who have not given the subject detailed study probably believe the safest time to drive is in broad daylight and dry weather. Statistics show that it is safest to drive at dusk or night, and in rain, snow, mist or fog.

This is told by Frank A. Goodwin, Massachusetts registrar of motor vehicles, in the American Mutual magazine of this city. The publisher, one of the large insurance companies, are conducting an effort to increase highway safety throughout the country.

The reason fewer accidents occur in bad weather and at night is, of course, because greater care is exercised. Which proves the registrar's contention that most accidents are preventable.

Most Serious In Daytime.
"Of the 322 fatal accidents involving automobiles that occurred in Massachusetts in 1932," states Mr. Goodwin, "213 occurred in the daytime, 21 at dusk and 72 at night. In 1931, 144 cases the day was clear, 22 at dusk and 20 at night. In 1930, 144 cases the day was clear, 22 at dusk and 20 at night. In 1929, 144 cases the day was clear, 22 at dusk and 20 at night. In 1928, 144 cases the day was clear, 22 at dusk and 20 at night. In 1927, 144 cases the day was clear, 22 at dusk and 20 at night. In 1926, 144 cases the day was clear, 22 at dusk and 20 at night. In 1925, 144 cases the day was clear, 22 at dusk and 20 at night. In 1924, 144 cases the day was clear, 22 at dusk and 20 at night. In 1923, 144 cases the day was clear, 22 at dusk and 20 at night. In 1706, 144 cases the day was clear, 22 at dusk and 20 at night. In 1705, 144 cases the day was clear, 22 at dusk and 20 at night. In 1704, 144 cases the day was clear, 22 at dusk and 20 at night. In 1703, 144 cases the day was clear, 22 at dusk and 20 at night. In 1702, 144 cases the day was clear, 22 at dusk and 20 at night. In 1701, 144 cases the day was clear, 22 at dusk and 20 at night. In 1700, 144 cases the day was clear, 22 at dusk and 20 at night. In 1699, 144 cases the day was clear, 22 at dusk and 20 at night. In 1698, 144 cases the day was clear, 22 at dusk and 20 at night. In 1697, 144 cases the day was clear, 22 at dusk and 20 at night. In 1696, 144 cases the day was clear, 22 at dusk and 20 at night. In 1695, 144 cases the day was clear, 22 at dusk and 20 at night. In 1694, 144 cases the day was clear, 22 at dusk and 20 at night. In 1693, 144 cases the day was clear, 22 at dusk and 20 at night. In 1692, 144 cases the day was clear, 22 at dusk and 20 at night. In 1691, 144 cases the day was clear, 22 at dusk and 20 at night. In 1690, 144 cases the day was clear, 22 at dusk and 20 at night. In 1689, 144 cases the day was clear, 22 at dusk and 20 at night. In 1688, 144 cases the day was clear, 22 at dusk and 20 at night. In 1687, 144 cases the day was clear, 22 at dusk and 20 at night. In 1686, 144 cases the day was clear, 22 at dusk and 20 at night. In 1685, 144 cases the day was clear, 22 at dusk and 20 at night. In 1684, 144 cases the day was clear, 22 at dusk and 20 at night. In 1683, 144 cases the day was clear, 22 at dusk and 20 at night. In 1682, 144 cases the day was clear, 22 at dusk and 20 at night. In 1681, 144 cases the day was clear, 22 at dusk and 20 at night. In 1680, 144 cases the day was clear, 22 at dusk and 20 at night. In 1679, 144 cases the day was clear, 22 at dusk and 20 at night. In 1678, 144 cases the day was clear, 22 at dusk and 20 at night. In 1677, 144 cases the day was clear, 22 at dusk and 20 at night. In 1676, 144 cases the day was clear, 22 at dusk and 20 at night. In 1675, 144 cases the day was clear, 22 at dusk and 20 at night. In 1674, 144 cases the day was clear, 22 at dusk and 20 at night. In 1673, 144 cases the day was clear, 22 at dusk and 20 at night. In 1672, 144 cases the day was clear, 22 at dusk and 20 at night. In 1671, 144 cases the day was clear, 22 at dusk and 20 at night. In 1670, 144 cases the day was clear, 22 at dusk and 20 at night. In 1669, 144 cases the day was clear, 22 at dusk and 20 at night. In 1668, 144 cases the day was clear, 22 at dusk and 20 at night. In 1667, 144 cases the day was clear, 22 at dusk and 20 at night. In 1666, 144 cases the day was clear, 22 at dusk and 20 at night. In 1665, 144 cases the day was clear, 22 at dusk and 20 at night. In 1664, 144 cases the day was clear, 22 at dusk and 20 at night. In 1663, 144 cases the day was clear, 22 at dusk and 20 at night. In 1662, 144 cases the day was clear, 22 at dusk and 20 at night. In 1661, 144 cases the day was clear, 22 at dusk and 20 at night. In 1660, 144 cases the day was clear, 22 at dusk and 20 at night. In 1659, 144 cases the day was clear, 22 at dusk and 20 at night. In 1658, 144 cases the day was clear, 22 at dusk and 20 at night. In 1657, 144 cases the day was clear, 22 at dusk and 20 at night. In 1656, 144 cases the day was clear, 22 at dusk and 20 at night. In 1655, 144 cases the day was clear, 22 at dusk and 20 at night. In 1654, 144 cases the day was clear, 22 at dusk and 20 at night. In 1653, 144 cases the day was clear, 22 at dusk and 20 at night. In 1652, 144 cases the day was clear, 22 at dusk and 20 at night. In 1651, 144 cases the day was clear, 22 at dusk and 20 at night. In 1650, 144 cases the day was clear, 22 at dusk and 20 at night. In 1649, 144 cases the day was clear, 22 at dusk and 20 at night. In 1648, 144 cases the day was clear, 22 at dusk and 20 at night. In 1647, 144 cases the day was clear, 22 at dusk and 20 at night. In 1646, 144 cases the day was clear, 22 at dusk and 20 at night. In 1645, 144 cases the day was clear, 22 at dusk and 20 at night. In 1644, 144 cases the day was clear, 22 at dusk and 20 at night. In 1643, 144 cases the day was clear, 22 at dusk and 20 at night. In 1642, 144 cases the day was clear, 22 at dusk and 20 at night. In 1641, 144 cases the day was clear, 22 at dusk and 20 at night. In 1640, 144 cases the day was clear, 22 at dusk and 20 at night. In 1639, 144 cases the day was clear, 22 at dusk and 20 at night. In 1638, 144 cases the day was clear, 22 at dusk and 20 at night. In 1637, 144 cases the day was clear, 22 at dusk and 20 at night. In 1636, 144 cases the day was clear, 22 at dusk and 20 at night. In 1635, 144 cases the day was clear, 22 at dusk and 20 at night. In 1634, 144 cases the day was clear, 22 at dusk and 20 at night. In 1633, 144 cases the day was clear, 22 at dusk and 20 at night. In 1632, 144 cases the day was clear, 22 at dusk and 20 at night. In 1631, 144 cases the day was clear, 22 at dusk and 20 at night. In 1630, 144 cases the day was clear, 22 at dusk and 20 at night. In 1629, 144 cases the day was clear, 22 at dusk and 20 at night. In 1628, 144 cases the day was clear, 22 at dusk and 20 at night. In 1627, 144 cases the day was clear, 22 at dusk and 20 at night. In 1626, 144 cases the day was clear, 22 at dusk and 20 at night. In 1625, 144 cases the day was clear, 22 at dusk and 20 at night. In 1624, 144 cases the day was clear, 22 at dusk and 20 at night. In 1623, 144 cases the day was clear, 22 at dusk and 20 at night. In 1622, 144 cases the day was clear, 22 at dusk and 20 at night. In 1621, 144 cases the day was clear, 22 at dusk and 20 at night. In 1620, 144 cases the day was clear, 22 at dusk and 20 at night. In 1619, 144 cases the day was clear, 22 at dusk and 20 at night. In 1618, 144 cases the day was clear, 22 at dusk and 20 at night. In 1617, 144 cases the day was clear, 22 at dusk and 20 at night. In 1616, 144 cases the day was clear, 22 at dusk and 20 at night. In 1615, 144 cases the day was clear, 22 at dusk and 20 at night. In 1614, 144 cases the day was clear, 22 at dusk and 20 at night. In 1613, 144 cases the day was clear, 22 at dusk and 20 at night. In 1612, 144 cases the day was clear, 22 at dusk and 20 at night. In 1611, 144 cases the day was clear, 22 at dusk and 20 at night. In 1610, 144 cases the day was clear, 22 at dusk and 20 at night. In 1609, 144 cases the day was clear, 22 at dusk and 20 at night. In 1608, 144 cases the day was clear, 22 at dusk and 20 at night. In 1607, 144 cases the day was clear, 22 at dusk and 20 at night. In 1606, 144 cases the day was clear, 22 at dusk and 20 at night. In 1605, 144 cases the day was clear, 22 at dusk and 20 at night. In 1604, 144 cases the day was clear, 22 at dusk and 20 at night. In 1603, 144 cases the day was clear, 22 at dusk and 20 at night. In 1602, 144 cases the day was clear, 22 at dusk and 20 at night. In 1601, 144 cases the day was clear, 22 at dusk and 20 at night. In 1600, 144 cases the day was clear, 22 at dusk and 20 at night. In 1599, 144 cases the day was clear, 22 at dusk and 20 at night. In 1598, 144 cases the day was clear, 22 at dusk and 20 at night. In 1597, 144 cases the day was clear, 22 at dusk and 20 at night. In 1596, 144 cases the day was clear, 22 at dusk and 20 at night.
