## TO MARK GRAVES OF UNKNOWN DEAD

### American Legion Providing Flowers in Perpetuity for A. E. F. Dead

## ALL VETS ASSISTING

### President Harding Sends His Check for \$50 and Praises Purpose of Endowment Fund Started by Legion

INDIANAPOLIS, Ind., May 12.—Success of the American Legion Graves Endowment Fund, providing flowers in perpetuity for the resting places of American World War dead, means that 1813 unmarked graves of heroes will annually be decorated. In the eight U. S. cemeteries in Europe, now shrines of patriotism for Americans, rest the bodies of nearly a regiment of "unknown dead." The inclusion of the unmarked crypts among the 32,000 American graves in Europe, will reconsecrate their graves with the others still remaining in foreign soil.

Practically every post of the Legion in the nation has joined in the campaign to raise this endowment fund, that the memories of those who made the supreme sacrifice shall be recalled. Post members have set out determined not only to raise the quota set for them for this fund, but to exceed this whenever possible. Mass meetings, personal solicitations and broad publicity campaigns have been utilized by legionnaires to secure the necessary funds for department organizations of the Legion are already over the quota set. Mexico has reported 68 per cent more than allocated, and France has raised 150,000 francs for the fund. Contributions from nationally known men and women are received almost daily.

President Harding sent in a check for \$50 and highly commended the purposes of the endowment. The letter accompanying the chief executive's contribution said:

"The American Legion Graves Endowment fund has my heartiest support. It is a national duty to assist the Legion in raising this endowment. The World War veterans whose bodies still lie overseas died with the hope that their gift to freedom would suffice to save their brothers and children in making like sacrifices. They died in hope that the sacrifice might be a contribution toward putting an end to war.

"We owe them not only this tribute of perpetuating their memory, but our unswerving loyalty to their ideal that the war in which they fought might mark the end of all wars. Please accept the enclosed contribution on the behalf of one who can not too greatly emphasize his obligation to the memory of our dead overseas, or his determination that they shall not have died in vain."

## COAST EXPECTING BIG TOURIST TRAVEL

SAN FRANCISCO, May 12. (United Press.)—The whole Pacific coast region may expect the heaviest tourist travel this year in history, said W. H. Sellender, general passenger agent for the Matson Navigation company, upon his return from a trip through the middle west and Atlantic coast states.

The Hawaiian Islands will get a much larger share of tourist travel, Mr. Sellender said. For the first time there is ample transportation facilities coming and going, and the work of the Hawaiian Tourist bureau is said to be effective.

Publicity associations of the coast come in for a large share of praise by Mr. Sellender. The combined action Pacific Northwest, California Incorporated, All Year Club, railroads, travel agencies, shipping board and steamship lines has diverted the nations attention to the west as never before he says.

Too, the winter just ended in the east has been hard and long and prosperity is now floating over the land. People have the money and the wish to move. Many will come to look, but many more to settle in new country, Mr. Sellender feels.

## FISH AT DAM TO BE TRANSFERRED

### Dip Netters Provided by State Fish Commission at Winchester

## SPORTSMEN TAKE HAND

### Will Endeavor to Curb Activity of Gaffers Who Are Illegally Killing Hundreds of Fish—Law Will Be Invoked

Two expert dip netters, experienced in the task of handling salmon and trout, have been stationed at Winchester by the State Fish Commission, through the efforts of the Roseburg Rod and Gun club. These men will lift salmon over the dam at Winchester, or else will construct a chute, through which they may reach the water above the dam. At the present time hundreds of salmon are milling below the dam, unable to get over, and are either killing themselves in endeavoring to jump over the obstruction, or else are falling prey to fishermen who are unlawfully gaffing the salmon.

Because of the fact that few salmon are reaching the upper waters to spawn, the Rod and Gun club has been very active in its effort to secure men to relieve the condition, and Carl D. Shoemaker, who is at the head of the State Fish Commission, made a personal inspection of the situation and then sent two of his best men to endeavor to save as many of the fish as possible.

The North Umpqua is one of the finest salmon fishing streams in the country and every effort is being put forth to keep up the stock of salmon. Each year fish die by the hundreds below the dam at Winchester, while poachers take a fearful toll with their gaff hooks. There has been an organized system of taking salmon at Winchester, and the officers have been unable to break up the work of those who have no regard for the fish laws of the state. Because of this fact salmon which would otherwise spawn and aid in the restocking of the stream, are killed and the river will soon be depleted unless such activities are curbed.

The Rod and Gun club expects to do all within its power to prevent unlawful gaffing of salmon at Winchester and will endeavor to see that any violators are given the maximum penalty of the law. If the salmon in the river are taken on hook and line and commercially at such times as the law permits, there will be plenty of fish for everyone, the club contends, and it will be possible to enjoy the sport which salmon fishing affords. But if gaffers with their deadly hooks are allowed to persevere their way, they will soon exhaust the supply of fish in the river and the rights of all will be destroyed.

## CLEAN-UP WILL START MONDAY

### Annual Collection of Rubbish and Refuse to Occupy First Part of Next Week

## THOROUGHNESS ASKED

### Residents Urged to Make a Careful Clean-up of Their Yards and Have Refuse Ready for the Trucks

The annual spring city clean-up starts Monday morning, and will last until all refuse gathered up and properly sacked, is disposed of. The trucks and wagons will start out early Monday morning and it is expected that the majority of the rubbish will have been picked up and hauled away by Wednesday or Thursday.

Residents are instructed to clean up their yards quite thoroughly and to place all cans, bottles, and other refuse which they desire to have hauled away, in sacks, boxes, large cans, or other containers which may be easily handled. The men engaged in gathering up the refuse will not have time to pick up loose articles, and consequently the rules require that everything be placed in containers which may be handled conveniently.

All such sacks, boxes, etc., must be placed along the curb line on paved streets. People living off the paved streets should carry the rubbish to the nearest paved street and place the containers at the curb where the load will be picked up and hauled away.

It is expected that this year's clean-up will be more thorough than ever before. The campaign inaugurated by Mayor Rice for a cleaner and better appearing town, has been bearing fruit and cooperation is being given by the greater part of the citizens of the city. Yards throughout Roseburg present a better appearance than ever before. People are giving more attention to keeping their yards and parkings attractive in appearance and there is a decided improvement noticeable in the looks of the city. The city's big experiment, the planting of trees along South Stephens street, was a decided success, and out of over two hundred trees planted by the city, only one failed to take root and live. The trees will be watered and cared for by the city during the summer months, in such places where the residents fail to do this work and every effort will be made to keep them strong and vigorous.

Mayor Rice states that as soon as the clean-up is over, the city will rigidly enforce its weed ordinance. Owners of vacant lots will be required to cut the weeds and grass on the lots and if they fail to do so of their own accord the city will see that it is done and a lien made against the property.

The mayor states that he greatly appreciated the excellent cooperation shown by the greater part of the citizens of the city in the effort to beautify Roseburg and he will endeavor to keep faith with them by forcing those who have not sufficient interest in the welfare of the city to look after their own property, to take such action in removing grass and weeds that their property will not be a menace to the surrounding yards which have been improved.
