Studebaker

One and One-half Billion Miles of Satisfaction

Studebaker Special-Six owners have driven their cars a total of more than one and one-half billion miles!

This enormous mileage has been piled up in everyday service over every conceivable kind of road and under every condition of weather throughout the world.

And no Special-Six has ever worn out. So far as we know there isn't a single dissatisfied owner. These one and one-half billion miles of satisfactory service prove positively the outstanding merit of the Special-Six.

It is the strongest recommendation possible for dependable performance, economical maintenance and long life. It is striking evidence of the high quality that is responsible for Studebaker Special-Six leadership in fine car sales.

To call a car "special" doesn't make it special unless there is special merit to back up the name. The Studebaker Special-Six is special not only in name but in performance. One and one-half billion miles to its credit are proof positive that it lives up to its name.

The name Studebaker is assurance of satisfaction.

One-piece, rain-proof windshield, automatic windshield cleaner and glare-proof visor. Quick-action cowl ventilator. Rear-view mirror. Combination stop-and-tail light, tonneau lamp with long extension cord. Running board step pads and aluminum kick plates. Eight-day clock. Thief-proof transmission lock.

THIS IS A STUDEBAKER YEAR

farm implement is extending in every agricultural section of the country as farmers come to realize the advantage and economy of power farming. A most noticeable feature of the sales is the growing use of this sturdy and dependable power plant in industrial and commercial activities.

Contractors and builders are everywhere adapting the Fordson to meet their needs for power, either movable or stationary, and road engineers throughout the country are specifying its use with highway construction machinery.

To meet this growing demand for Fordson Tractors production is now at capacity and for the first three months of the year reached a total of 27,087 as compared with 8,349 for the same period a year ago.

CARTER'S TIRE SHOP

Corner N. Jackson and Court Sts.

Nick got it jabbed into him again by another grifter. Let me tell you how it happened.

"Good morning. I have a blotter here ruled off in inch square spaces. An ad on this blotter will cost you \$6. I will place a copy in every shop, office and business house in town."

Nick looked at the delicate little creature, small figure, fine features, slim, well-kept fingers and hands, brown eyes and bright as the morning stars, pale face and white lips. Nick thought that for the good of humanity that she ought to be in some congenial home reading story books instead of on the streets fighting the battles of life, and his heart swelled up as big as a beer keg, so he said: "Yes, I'll take an ad on the blotter." That afternoon she came back and delivered a sample blotter and collected \$6.

Afterward, Nick made the rounds to see if the blotters had been placed. The only one I ever saw was the one left in my shop. I threw off my hat, rolled up my sleeves, butted my head against the wall until stars flew out of my eyes like sparks from a spitting fuse, and said: "Some day, some how, I will surely learn the game."

Now, boys, bring your TIRE TROUBLES TO NICK. I will do you a good job, sir, pon my word I will.

NICK.

BOSCH

MAGNETO and Governor

—For—

FORDSONS

Think of It!

No time lost in starting—no more ether in buy—no coils to adjust—no time to bother with—no waiting—no short circuits—no dirty plugs to clean—nothing to delay the work, or cause expense and annoyance.

THE BOSCH HIGH TENSION MAGNETO makes a wonderful improvement in the Fordson. The engine runs smoothly at all speeds—it develops more power—it uses less gas and oil. It doesn't have to be fussed with or coaxed—and it seldom needs attention.

THE BOSCH THROTTLE GOVERNOR makes a still greater improvement. It prevents racing and stalling—you can adjust it from the driver's seat to maintain any speed desired. It saves gas, oil and repairs—will pay for itself in a season.

Ask about new low prices—and let's give you a FREE demonstration.

LOCAL MAN INVENTS ELECTRIC DEVICE

D. J. Jarvis has recently perfected an electrical device to be used in connection with the automatic brake, that is quite an addition to the equipment of any car. The appliance is calculated to indicate just the amount of pressure the automatic electric brake generates, and the pounds pressure are shown on a dial that registers the amount required on any incline or in bringing the car to a stop. Mr. Jarvis has one of these indicators in his car, and it works under road conditions, he states. At a meeting of the Automobile Brake Co., directors this week, the matter of rights to manufacture the indicator will be discussed, and it is expected that the company will undertake to make this device in connection with the brake. The plant on Pine Street is being put in shape for work as rapidly as possible.

GREAT DEMAND FOR FORDSON TRACTORS

Both agriculture and industry are making increasing demands for the Fordson Tractor.
