Free Demonstration Summer Fatigue

of this Well Known Corrective Shoe. The Cantilever Salesman Will Be Here the Balance of the Week. Come in for a Try On.

THE nervous irritation caused by badly shaped shoes is a constant drain which will detract from your pleasure now and may result in a serious breakdown later. For health and efficiency, wear the Cantilever Shoe. It is patterned on the lines of the foot. The arch of the shoe hugs the curve of the instep and provides restful support for the foot. Well-set heel and natural inner sole line distribute the weight properly, without strain. And the shank is flexible! Instead of checking the circulation, it encourages good circulation, correcting burning and perspiring feet. In this comfortable and healthful way Cantilevers help greatly to prevent hot weather fatigue.

SUNBURN

If your skin is so tender that you expect sunburn, rub it well with Vicks before exposure.

After sunburn, apply Vicks gently—do not rub in. It soothes burn and often averts blisters.

For any outdoor vacation, Vicks is "standard equipment." It eases attacks of hay fever, asthma, catarrh and summer colds. Pines for sore feet, too.
