

Thaviu and His Band Will Give Two Programs At Chautauqua

Band Leader, Whose Band Gave Opening and Closing Programs at San Francisco Exposition in 1915, to Be Heard on the Closing Day.

Thaviu's Band is coming to Chautauqua—twenty-five selected musicians from the great musical organization which both opened and closed the San Francisco Exposition—led by the magnetic Thaviu himself. Of the sixteen bands of nation-wide reputation which entertained the great crowds during the exposition season, Thaviu's was the only one requested for a return engagement. They had so successfully pleased the throngs during the opening that the directors commissioned their return for the closing weeks. The secret of Thaviu's popularity is not expressed so much in the size of his band as in the unusual personnel and the fact that Thaviu is a master director of his accomplished musicians. All band music critics comment on the sparkle, life and dashing brilliancy of his musical interpretations. Not only is Mr. Thaviu a conductor of renown, but he is also a wonderful artist and ranks with the best in the country. Unprecedented attendance is anticipated at each and every one of Mr. Thaviu's concerts in the West and certainly it is a musical treat no lover of inspiring music can afford to forego. Two full concerts will be given at Chautauqua the closing day and in the evening the band will be assisted by three grand opera artists. Unusual voices are required when supported by so large an instrumental band, and the soloists secured more than fulfill the requirements. You cannot afford to miss the two programs on the last day of Chautauqua.

LIFE LIVES 3 YEARS WITH SPOUSE WHO NEVER SPOKE

English woman, Mrs. Matilda, lived in the same house with her husband for three years and two months without a single word passing between them. She had just been divorced by Judge Hill, Mrs. Matilda, describes the years of silence following articles.

MRS. ADA DYER, Roseburg, Ore., for International News Service.

ROSEBURG, June 19.—For three years and two months my husband and I lived in the same house, and taking meals at the same table, but not a word to me.

My husband was in the house all day long, but I never saw him. He was so miserably alone in the house that I could not bear the monotony of that dreadful life. I was on the verge of suicide. I had some experience, few people know, and I had some, perhaps, will fail to understand the full horror of it.

I was married in 1909 and for three years we lived very happily together. Then, one day, I found that my husband was everything a man should be. He was kind and good-tempered, and I was a woman of the highest character and intelligence.

My husband, I worshipped the ground he walked on. If there was a complaint at all it was his. I was so nervous that I could not sleep. My husband's behavior was so strange that I was sure he was a spy. I was so nervous that I was sure he was a spy. I was so nervous that I was sure he was a spy.

My husband, I worshipped the ground he walked on. If there was a complaint at all it was his. I was so nervous that I could not sleep. My husband's behavior was so strange that I was sure he was a spy. I was so nervous that I was sure he was a spy. I was so nervous that I was sure he was a spy.

JUDGE ADVISES GIRL, 14, NOT TO WED UNTIL OLDER

(International News Service.) BROCKTON, Mass., June 21.—The romance of Mary Mendes, fourteen years old, and Dolphin Gomez, a 37-year-old store keeper, both of Wareham, was nipped in the bud by the refusal of Judge L. E. Chamberlain, of the Plymouth county probate court, to sanction their marriage.

Judge Chamberlain advised the girl to wait until she is older and understands her own mind. He had learned that Gomez had requested permission of the Mendes girl's parents to have her become a sort of a housekeeper and clerk in his store. Her father instead proposed the marriage.

RHEUMATISM Leaves You Forever

Deep Seated Uric Acid Deposits Are Dissolved and the Rheumatic Pains Start to Leave the System Within Twenty-four Hours.

Every druggist in this country is authorized to carry in every rheumatic sufferer that if a full pint bottle of Allenbur's, the sure conqueror of rheumatism, does not show the way to stop the agony, reduce swollen joints and do away with even the slightest twinge of rheumatic pain, he will gladly return your money without comment.

Allenbur's has been tried and tested for years, and really marvelous results have been accomplished in the most severe cases where the suffering and agony was intense and pitiable and where the patient was helpless.

Mr. James H. Allen, the discoverer of Allenbur's, who for many years suffered the torments of acute rheumatism, desires all sufferers to know that he does not want a cent of anyone's money unless Allenbur's decisively conquers this worst of all diseases, and he has instructed druggists to guarantee it as above in every instance.

Nathan Fullerton, the Rexall Store, Roseburg, Oregon.

COURT SHAMES EX-TAR WHO HAD BRASS KNUCKLES

(International News Service.) ELY, Nev., June 21.—Jesse Self, formerly of the United States navy, arrested with a pair of brass knuckles in his possession, is serving a term in the city jail—not because he had the brass knuckles, but because he was an American sailor.

"Is it true," asked Justice McDonald, "that one of the first things taught in the navy is the manly art of self-defense?"

With an affirmative reply from Self, the justice asked the big active young man if he could not take care of himself without the assistance of metal knuckles.

"I can, I guess I've made a mistake in carrying them."

The mistake cost Self his freedom for 75 days.

NOTICE TO CONTRACTORS

Highway Construction, Douglas County, Oregon.

Separate sealed bids will be received by the County Court of Douglas County Oregon, at the court house in Roseburg, Oregon, at 10 o'clock a. m. on the 30th day of June, 1923, for construction work on a section of road between Rochester Bridge and Elkton known as the Yellow Creek Section. The work involves approximately 1 mile of grading and surfacing, the limits being more particularly described as from Engra Sta. 34+00 to Engra Sta. 83+00 in Sections 11-12-13 and 24, T. 22 S. R. 7 W. W. M. Douglas County, Oregon.

No bid will be considered unless accompanied by cash, bidder's bond or certified check for an amount equal to at least five (5) per cent of the total amount of the bid.

A sufficient bond will be required for the faithful performance of the contract in a sum equal to one-half the total amount of the bid.

Plans, specifications, forms of contract, proposal blanks, and full information for bidders may be obtained at the office of the county clerk or the county roadmaster, Court House, Roseburg, Oregon, upon the deposit of five dollars.

The right is reserved to reject any item or all proposals, or to accept any separate item of the proposal or proposals deemed best for the county.

RAILROAD PROBLEMS CARRIED TO FARMERS

(By Associated Press.) CLEVELAND, June 18.—A traveling railroad museum, showing the evolution and present outlook of every phase of railroading in the United States, will operate continuously for four months over all the lines of the New York Central Railroad and its subsidiaries, leaving this city today.

The operation of the special train to all of the agricultural districts in response to requests from the heads of the American Farm Federation and along its right of way, is in direct response to the National Grange, according to the announcement made here by the railroad.

The announcement also says it is in answer to President Harding's official announcement made recently calling upon the people of this country to make a study of transportation with special reference to the railroads.

According to the outline the train will be made up of cars containing moving picture cameras that will depict the growth of the railroad, the various business transacted by the railroad, with special stress laid upon the pictures showing the handling of farm products, and lectures on the present taxation system and the taxes assessed against both railroads and farmers, and how the basis of taxation is arrived at.

There will be one car devoted exclusively to the models of all the steam engines from the very first invented to the model of the big "Mikado 5000" that will pull the special. It is also announced that old "999" which broke the world's speed record in 1893, is to see service in drawing the special over side trips from the main or trunk lines.

Arrangements have been made to have the school children in every town where the special stops, visit the exhibit and it is also announced the numerous stops will be made at the smaller centers in the agricultural sections.

BANISH CATARRH, HAD BREATH.

It's the simplest thing in the world to use Hyomel and end catarrh. Breathe the medication through the little inhaler in every outfit and you will get relief at once. Money back if it fails. W. F. Chapman.

SCIENTISTS PREPARE FOR INVESTIGATIONS

(By Associated Press.) CHICAGO, June 18.—The University of Chicago is planning to send out twelve professors on important research expeditions this summer. The largest group of investigators will go from the department of geology and will include Professor Adolph C. Noe, an authority on fossils, who will spend many weeks in the Illinois and Indiana coal fields searching for peculiar limestone concentrations, known as coal balls.

These coal balls, which are usually about the size of a man's fist, contain the finest tissues of plants living at the time of the laying down of the coal, and reveal the anatomy and climatic conditions, and evolution of ancient plant life. Although coal balls have been found from time to time in France and Germany, no such American fossils were known to exist until they were discovered by Professor Noe, last summer.

Professor Stuart Weller will go to Kentucky to hunt for coal balls in the Kentucky fields of that state. Professor E. S. Bastian will go to northwestern Canada to study ore deposits, and Professors J. Harlan Bretz and R. T. Chamberlain will examine the mountain structure of the Cascades. Professor Paul Miller will carry on blasting operations in the southwest.

CLAY DID THIS

A white, refined super-clay

By Edna Wallace Hopper

My complexion is the envy of countless young girls, and the marvel of millions of women.

For I, remember, have been 32 years a stage star, and am still. Mine is a grandmother's age. Yet my skin is just as soft and rosy, just as smooth and blooming, as 40 years ago.

Scores of my friends, on the stage and in society, have attained like results in my way. So I know that most women can do it, and I am going to help them if they wish.

A New-Type Clay.

You read much now about complexion clays. But those I see are crude and muddy, like I quit years ago.

A French beauty expert first told me about clay. Then few women used them, so some of those women became the marvels of nations for their wonderful complexions.

Now countless women use them. Clay is recognized as a prime essential of beauty at its best. Women who omit clay cannot hope to compare with women who employ it.

My exceptional results come from a new-type clay, perfected by 20 years of scientific study. It is white, refined and adnaty. And able experts have found ways to give it manifold effects.

Where It Excels.

It is found that only rare clays—certain mineral-laden clays—bring the

of the sun September 13. Professor James Henry Breasted is already in Egypt observing the excavations of the tomb of Tutankhamen.

Broccoli plants for sale at Vosburgh and Ward's.

A CRY IN THE NIGHT, gripping pains in the vitals, cramps, weakening diarrhoea—whether child or adult, immediate comfort and ease in CHAMBERLAIN'S COLIC and DIARRHOEA REMEDY. Pays to keep always on hand.

Professor Albert A. Michelson, of the department of physics, is going to Mount Wilson, Cal., to redetermine the velocity of light with an improved form of revolving mirror.

Professor Edwin B. Frost, of the Yerkes Observatory, will be at Catalina Island to observe the total eclipse

Douglas County Light & Water Co

R. M. JENNINGS, Manager

ITS CHEAPER THAN IN 1913

(By Associated Press.) SAGO, June 21.—The recent report from one of the statisticians of the United States government that the cost of living is approximately 67 percent higher today than ten years ago has brought comment from F. P. Waddell, vice president of Armour & Co., to the effect that wholesale selling prices for many commodities are lower than they were in 1913, and in others at exactly the same level.

Waddell submits the following comparative prices based on an average of the trading in May, 1913, and 1923:

Lard	15%	14%
Butter	12%	12%
Eggs	68	10
Corn	12	12
Wheat	10.15	10.60
Flour	21	23

It should be understood there are many grades of products that sell at prices higher than those quoted, and other grades that sell at lower prices. Mr. Waddell, "but the standard of prices is just as high as in 1913, and the average cost of living is about the same, but since the cost of manufacturing live commodities has increased material, the cost of distributing has also increased. The prices quoted are according to the grades of products and the service which a retailer gives to the householder."

MARRIES FIRST WIFE AFTER 25 YEARS APART

(International News Service.) SAGO, Mass., June 21.—What is said to be a record was made by Mrs. George A. Drake, who

was married twice to the same man by the same preacher the second ceremony coming thirty-eight years after the first.

The clergyman who performed both ceremonies is the Rev. I. P. Quimby, of Orange. In 1885 he married Miss Hattie A. Graves, of Montague, to George A. Drake, of Greenfield.

The couple were divorced April 25, 1898, and each married. With the passing of years Drake became a widower and his first wife a widow. The last marriage made the third time that Drake has been a bridegroom. He is 76 years old, while Mrs. Drake is 79. They will reside in Orange.

A. S. FREY & SONS

PETROLEUM OUTPUT IN CALIFORNIA INCREASING

(International News Service.) LOS ANGELES, June 21.—Production of petroleum in California during 1922 showed an increase of 23,749,622 barrels over the 1921 production, according to annual report just issued by R. L. Collum, State Oil and Gas Commissioner.

Total production was 138,326,490 barrels, as compared with 114,576,869 barrels for 1921, the report stated. The gasoline output for California last year was 492,497,748 gallons. The report said is part:

The gain of about 24,000,000 barrels in the production of petroleum is attributed to the rapid and intensive development of the Huntington Beach, Long Beach and Santa Fe oil fields in Los Angeles and Orange counties.
