

Do You Realize---

That we can sell you a Standard Six-Cylinder Automobile for

\$1190

F. O. B. Roseburg

Do You Realize
That the

STUDEBAKER LIGHT SIX

is freer from vibration than any car of its approximate size or weight yet produced? This has been accomplished by complete machining of the crankshaft and connecting rods on all surfaces. Only a few other cars have this feature, and they cost from three to ten times the price we are asking for a Light Six.

More Cars Shake Themselves to Pieces
Than Ever Wear Out

Just charge that up to vibration; vibration causes cars to grow old prematurely by racking their chassis, destroying the "metal life" of vital parts, loosening up their bodies and causing squeaks and rattles.

Many owners have never driven a Studebaker Six and are accustomed to noisy motors, rattling bodies, and put up with the riding qualities of a buckboard because they do not realize that real comfort can be had at the low price of \$1190; hardly more than the price of a four.

You owe it to yourselves to test the performance of a Light Six Studebaker before you buy. Consult Studebaker owners and ask them Why They Are Driving Studebakers. There are five good reasons why they prefer Studebaker Sixes to all others, namely:

- (1) Because of their quality, durability and dependable performance.
- (2) Because by manufacturing sixes exclusively on a large scale and by building all vital parts in its own plants, Studebaker can effect economies and save the middlemen's profits, and thereby provide maximum value and quality at a low price.
- (3) Because in the three models of Studebaker cars we have a car of the exact size, style and price to suit every buyer.
- (4) Because with \$55,000,000 of actual net assets, including \$45,000,000 of plant facilities, Studebaker stands unsurpassed in ability and resources to manufacture economically and give the greatest intrinsic value possible for a given price.
- (5) Because of the name Studebaker, which for 71 years has stood for high-grade transportation, integrity, quality, value and comfort.

Let's get real enjoyment out of our vacation this year by driving a new Studebaker. Come in and talk it over with us:

W. A. BURR & SONS

CENTRAL GARAGE

SALES AND SERVICE

SHEBLY WILL HAVE
THIRTY-TWO GATES

SELBY, Mont., June 22.—Work on Dempsey-Gibbons fight arena is rushed. The contract calls for completion by June 15th. The job is finished much sooner than expected.

The framework all up and the roof something of its size and design gives the curious sightseer a picture to gaze at.

The arena was built in Montana west of the Mississippi river like

is 1700 feet around the eight-sided wooden bowl.

There will be 32 entrances. The arena is so arranged that no one has to handle more than 2,500 people.

On the loading for the huge octagon by either steps or inclines. The gate number is stamped on the ticket. No one can get in the arena side.

Patrons will have a triple check on Federal men will check them at the outer gate; side ushers will check them at the next gate and the gate taker takes the last one.

The arena covers six acres. A high enclosure around the arena will take in thirty-three acres.

The new atmosphere angle has developed in this Montana cow country.

The hope is that Shelby, with an arena of over 3,000 feet and miles of any factors which produce the best of the air in the world.

It is said that a customer sitting in the arena admission seat in the city bowl can see as good as a wide view in the Jersey City

Whether this is true or not is a question for a scientist to answer.

MILL
WORK

It is true that the rarified air in this section of the prairies is like crystal to smoked glass as compared to eastern atmosphere.

On clear days, looking from Shelby Heights, you can see across the Canadian line thirty miles away.

The Montana law requires that a hospital tent with 25 beds be installed near the arena. It will be in charge of a red cross nurse and attendants.

If Gibbons upsets the dope being peddled around by some of the vineyard and stays 15 rounds on July Fourth, these same lounges will be filled with the folks that picked the round that never came around.

Streams Are Cooling
CATANIA, Sicily, June 22.—(U. P.)—Etna's lava flows are cooling and have slowed down to a snail's pace. Less than six yards hourly are now covered by the molten rivers.

Another hamlet, Mount Santo, is endangered however.

Premier Mussolini is here and the refugees from the buried towns are encouraged and comparatively calm.

BERRY GROWERS TO
MEET TOMORROW

Loganberry growers of the Umpqua Valley will meet tomorrow afternoon at 2 o'clock at the office of the County Agent B. W. Cooney at the Federal Building. The meeting is being called for the purpose of considering market conditions and endeavoring to arrange some method of disposing of this year's crop. The ideal weather conditions have resulted in a record breaking berry crop and growers are very anxious to find a suitable market as otherwise the loss will be quite heavy. The same condition prevails throughout the entire state and the various marketing organizations are working on the problem.

Come! to my regions that unbroken keep
Their solitudes, as ancient as the sun;

Come! to the canyons I have fashioned deep,
Where icy streams from snow-fed sources run.

Come! to my distant mountains, lofty, green,
Whose summits pierce the realm of cold thin air;

Come! where the grandeur of my works is seen,
And feel the silence and the rapture there.

Come! to my wilds, blow the breezes free
And leafy billows of the forest roll.

Oh! come and dwell with me, commune with me,
And peace, eternal peace, shall fill thy soul.

EARL'S FAIR DAUGHTER

Lives Happily with Parents
of Spouse and Receives
From Haughty Earl
Father's Blessing

By F. A. WRAY,
(International News Service Staff
Correspondent.)

SHOTS VILLAGE, Lanarkshire, June 21.—Lady Pleasance Elizabeth Rous, daughter of the proud Earl and Countess of Strathbrooke, has made good as the wife of a humble wireless operator, David Rous, living in the cottage of his father, a coal miner.

Her marriage was the result of a sea romance. The young couple met on a liner and despite the fact that she is one of the wealthiest heiresses in Britain, Lady Pleasance fell hopelessly in love with the ship's operator. Her parents were abroad and she could not communicate with them. So she took the law into her own hands and agreed to marry the young man who had won her heart.

Accordingly, although reared in the lap of luxury, she took up her 21 statutory days' residence in the house of Mrs. McKenna, washer's wife, of Shots Village. And there she quickly showed she could adapt herself to be the wife of a poor man. Refusing help, this girl not only did her own personal laundry, but she insisted on helping Mrs. McKenna in the work of the house. She helped to clean floors, bathed the babies, baked the bread and took on a great deal of the house-hold sewing.

At the end of three weeks she had made herself practically responsible for the five children and the entire work of the home. Mrs. McKenna says that for years she has not had such a restful or complete holiday.

Lady Pleasance found time to make her own wedding dress on the village sewing machine and also one for Ellen McKenna, her sixteen-year-old bridesmaid. And she made friends with the humble folk around and the miners of the district say there never has been a girl like her.

After the honeymoon she went back and lived in the cottage of her husband's parents and will remain until their own home is ready. Meanwhile she says she is deliciously happy and would not change her lot for any other.

And seeing her happiness her parents have withdrawn their opposition and wished her every joy.

This is a Studebaker year.

PIGEONS DAMAGE
CHERRY ORCHARDS

Ray C. Steel, United States game and fur warden, arrived in Roseburg today and will spend several days in this locality, investigating the alleged damage being done to orchards by the band-tailed pigeons. Cherry growers of the Umpqua Valley are complaining that the wild pigeons are stripping their cherry trees and causing a great deal of loss and damage.

Under the federal law protecting the birds from the hunters and making it a crime to kill them, the birds are increasing in great numbers and fly in large bands which enter an orchard and within a short time take all the cherries from the tops of the trees.

An investigation of the damage done with a view of finding some remedy is the purpose of Mr. Steel's visit here at the present time.

82 Years Old and As
Good As a Youngster

"Seven or 8 years ago I was a very sick man. Doctors said I had trouble of stomach and bowels, affecting the liver and heart. For more than a year I wanted to die, but could not. Upon the advice of a friend I tried Mayr's Wonderful Remedy, and although 82 years old, I now feel as good as a youngster." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and cures practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. At all druggists.

CHRISTMAS SEALS

NET \$25,000,000

SANTA BARBARA, Cal., June 21.—Christmas seals, sold in the annual campaign of the National Tuberculosis Association, have raised \$25,000,000 in the last 15 years. It was re-

EGGS ARE RECEIVED

A shipment of 500,000 trout eggs were received today at the Rock Creek trout hatchery. The eggs were taken from rainbow trout at Diamond Lake and were brought here from Klamath Falls. These eggs will be hatched out at the Rock Creek Station and will be distributed to various streams from there. The greater part of the fry being hatched for the North Umpqua and tributary streams.

vealed today at the annual meeting of the association.

Last year approximately \$600,000 persons contributed \$3,800,000 for the seals, according to Philip P. Jacobs, publicity director for the association. Discussing the association's campaign of prevention, Dr. William F. Snow, of New York, declared there were 400,000 deaths in the United States every year from preventable diseases.

Community organization in the application of scientific knowledge has caused a decline in the death rate, Dr. Snow said. The next step must come through co-ordination of the many agencies, he added.

"In addition to the officially constituted health officers in various states and cities throughout the country," he said, "there are from twenty to fifty voluntary health agencies, each striving to get over a particular program."

"To reduce the death rate from preventable diseases there must be a setting together of these organizations. This is a task which the National Health Council has set for itself."

"Breathing through the toes" was explained to the association members by Dr. S. Adolphus Knopf, of New York, as a breathing exercise to reduce the activity of the lungs.

Patients who formerly breathed 20 times a minute could train themselves to breathe only 10 times a minute and limit the breathing to the diaphragm, he said, thus lessening the strain on the lungs.

This method of breathing is perfected best, he explained, by imagining that the breathing begins at the toes of the right foot, proceeds upward to the diaphragm and exhales slowly through the toes of the left foot.

W. B. A. ENTERTAINMENT

The W. B. A. will give an entertainment at the Macabee Hall, Tuesday evening, June 26. A good program has been planned including the fancy drill given by the members at Portland recently. Refreshments will be served. Don't fail to be present. Admission, adults, 25 cents; children, 10 cents.

TELEPHONE LINES
ARE CONSTRUCTED

The forest service has just completed six miles of metallic telephone circuit between Tiller and Olds. The metallic circuit takes the place of the grounded circuit which put out of commission by the California-Oregon power line. The forest service in its telephone system uses a circuit consisting of only one wire, one side being grounded. This system is subject to interference when used in the presence of high voltage lines and consequently a system using two wires is being installed where the power line is followed.

Now is the time to put in that pumping system. Let us figure with you. We carry pumps, gas engines and pipe in stock. Wharton Bros.

INVESTIGATE MARKET
FOR LOGANBERRIES

C. J. Hurd, of the marketing department of the Oregon Agricultural College, and W. A. Hall, county agent of Clackamas county, spent last night and this morning in Roseburg investigating the local berry market situation. Loganberries are finding it very hard to market their crop this year and an effort is being made through the college organization to dispose of the bumper crop. Mr. Hurd and Mr. Hall came to Roseburg with the Oregon Growers' association yesterday evening and then came on into Roseburg where several growers were met in an informal conference. They returned north this afternoon and will spend tomorrow in Oregon City where Mr. Hurd is scheduled to speak.

TODAY'S MARKET
REPORT

Prices Paid Farmers for Produce.
Butter 25 to 30 cents.
Butterfat, 40c.
Eggs, 20 cents per dozen.
