structed in Laurelwood, is com-
pleted.

GEORGE MACIVER HURT IN WRECK

George "Shorty" Mac Iver, local
S. P. employe, was badly cut about
the head and received a broken rib
yesterday evening when the car, in
which he was riding with Frank
Ostey, turned turtle on the highway
about 7 miles south of the city.
They were traveling along the road
at a moderate rate of speed when
the steering knuckle broke and al-
lowed the car to run off the grade
and turn over. Ostey who was
driving was not injured, but Mac
Iver, who was in the seat with him,
was cut by glass from the wind-
shield and one of his ribs was broken.
He was brought to the office
of Dr. Melvin, where treatment was
given.

TRAINMEN KILLED IN HEAD-ON SMASH

PUEBLO, Colo., Aug. 13.—Seven
trainmen were killed in a head on
collision between a Colorado and
Southern passenger train from Pueblo
and a Santa Fe through train from the
east at Fowler, Colorado today. The
former was detouring over the Santa
Fe tracks by way of La Junta, because
of washouts at Walsenburg on the Col-
orado and Southern tracks. Both the
engineers and firemen of the Color-
ado and Southern double-header were
killed, and the Santa Fe engineer, bag-
gageman and messenger lost their
lives.

OAKLAND MAN INVENTS BRAKE

R. Macks of this city recently made
application for a patent for an auto-
mobile brake that is devised to stop
a car within the space of three feet
without skidding the wheels, says
the Oakland Tribune. Mr. Macks has
been working on this mechanism for
a number of years and is now in
communication with several manu-
facturers who are desirous of un-
dertaking its production.
Mr. Macks states that his device
operates on an entirely different prin-
ciple from any brake now in use and
is simple in construction and opera-
tion. It is direct in action, regardless
of the speed of car, and would take
the place of the emergency brake.
The new brake is the latest of a
number of inventions that Mr. Macks
has perfected. One of the most im-
portant ones was a gasoline filter
which is now being used in the large-
est dry cleaning establishments in
the country. Another is a mechanism
by which the heat of an incubator
may be regulated directly from a
thermostat. He has also invented
several smaller mechanical devices
and a number of chemical prepara-
tions of commercial value.

D.O.K.K. BAND GAVE EXCELLENT CONCERT

The D. O. K. K. band concert given
at the court house yard Saturday
evening, was an exceptionally fine
program and was greatly enjoyed by
hundreds of music lovers who gath-
ered to hear the selections. The
band was composed of Medford and
Roseburg musicians who are on the
way to Portland to participate in
the convention which starts there
today. The band furnished some ex-
cellent music, playing the most dif-
ficult of band selections. A vocal
solo, "Out Where the West Begins,"
given by one of the members of the
party, was an exceptionally pleasing
number and brought forth enthusi-
astic applause from the large audi-
ence.

CANAL IN NEED OF AIR FORCE

(By Associated Press.)
WASHINGTON, Aug. 13.—Various
means of strengthening the
defenses of the Panama canal are
suggested in an official navy depart-
ment critique, prepared as a result
of a study of last spring's maneu-
vers in Panama bay.
The weaknesses of the present
canal fortifications, the memoran-
dum said, include the improper
grouping of defensive batteries, the
lack of sufficient air force in the
canal zone, and the susceptibility of
certain vital parts of the waterway
to air bombs. It is suggested that
the defending fleet should be bal-
anced by the addition of scout cruis-
ers, and that a study should be made
of the possibility of obtaining by
treaty the right to establish air-
craft bases at certain unwarred
points on foreign soil nearby.
