AIR TRAVEL DEVELOPMENT.

The announcement officially made in the house of commons regarding the government's attitude toward the new commercial air line project, which has been so long mooted, leads to the conclusion that Great Britain's cherished dream of rapid contact with the distant parts of the empire is about to become a reality.

The airships selected to carry on this imperial communication—communication which from its very nature and by its example bids fair to revolutionize world travel—will be dirigibles larger than any hitherto constructed, capable of developing a high rate of speed and having an exceptionally long cruising radius.

In return for its subsidy the cabinet has stipulated with the company for certain rights and privileges, such as the conveyance of officers and men to India by air and the use of the stations en route without payment.

MARRIAGE AND DIVORCE.

The report of the United States census bureau on marriage and divorce, giving the results of its canvass of six northeastern states (New Hampshire, Vermont, Massachusetts, Connecticut, New Jersey and Delaware) contains at least one surprising fact. It shows that in 1922 there was a decrease in the number of marriages in these states of 11,648, or about 12 1/2 per cent, as compared with 1916, and an increase in the number of divorces of 1,720, or about 30 per cent.

language newspaper until the discovery of the plot, the authorities said. He is charged with having manufactured a number of plates for the printing of the bills.

Instead of using the plates himself he sold them to other persons throughout the islands. The result is that the counterfeit money is appearing from many different places, each place producing them being unknown to the other plants. One printing press was found working on a sampan anchored in a bay off the island of Hawaii.

The bills are in \$5, \$10, \$50 and \$100 denominations and are an exceptionally good imitation, the only noticeable difference between the spurious and genuine currency being in the quality of the paper.

Although federal authorities have knowledge that many of the participants in the plot have escaped to Japan and China, carrying with them large sums in counterfeit money, more arrests are expected, as the officials say they have merely scratched the surface.

COUNTERFEIT MONEY SPREAD BROADCAST

HONOLULU, Aug. 27.—An international counterfeiting ring, centering in the underworld of Honolulu and with ramifications into the Orient, which is being unearthed slowly by federal officials here, is expected to prove one of the largest conspiracies of the kind ever brought to light in American territory, according to the authorities.

Nine persons, eight Japanese and one Spanish-Hawaiian, are under arrest and the federal officials have \$250,000 in counterfeit money and two plates designed for the manufacture of the bills. The operations have been in progress for approximately two years and began, apparently, among persons engaged in the opium traffic.

The authorities said that the smugglers of opium into the territory were the victims of a grim little joke and "the double-cross supreme"—an return for the opium they managed to bring into the territory they received large sums of counterfeit money. The fact that they were engaged in an illegal operation was counted on to prevent them from notifying the authorities.

The persons in custody constitute only a part of the conspirators and the bills are believed to be spread all over the islands. It is known that large amounts have been taken to the Orient for distribution there. Many of the bills here were passed on Orient shopkeepers.

The authorities said the conspiracy was unraveled like a popular fiction fantasy. Most of the persons in the alleged ring are not known to each other and probably not more than one man knows all the other members of the ring. He is a Japanese master engraver, now in custody, who was employed on a local Japanese
