

THESE exclusive engine features make the 1924 Oakland the finest of light-sized cars and justify the continuance of Oakland's 15,000 mile guarantee and the mileage basis gauge of value.

1. In-head engine with Ricardo-type combustion chamber insuring great power at all speeds.
2. New type intake manifold and Stromberg carburetor of latest design. Impossible to place this carburetor out of adjustment.
3. Full automatic spark control, timing the spark to give maximum power at all speeds.
4. Larger and heavier crankshaft with larger bearing surfaces; new and more rigid crankcase of a type found only on higher priced cars.
5. Special patented bronze-backed bearings—insuring at least 40,000 miles without adjustment.
6. Larger valves of highest grade special alloy steel—insuring 35,000 miles without grinding.
7. Cylinder walls honed to the smoothness of glass. Pistons, rings, piston pins, and connecting rods like those found heretofore in Liberty motors and expensive cars.

See many other exclusive features at our special showing all week of the True Blue Oakland. Test the four-wheel brakes—admire the new Fisher bodies. Note the new lower prices. Make your own comparisons.

DRIVERS MUST AID TRAFFIC OFFICERS

Prepared by the National Safety Council

The following article was prepared by the National Safety Council:

1. The traffic officer has a difficult job at the best and drivers should make every effort to assist him.

2. At times the officer's directions may seem to be contradictory or unnecessary, but we should remember that he may have excellent reasons for his action; reasons which we perhaps cannot understand at the time.

Good Will Desired.

3. He is responsible for all accidents which happen at his station. Let us treat him as we expect him to treat us. His good will is more desirable than his ill will.

4. If you expect the traffic officer to give you a good clear decision take pains to show him just what you want to do. The officer usually means to give clear distinct signals, so watch him closely; he can't repeat for you without loss of attention to his other duties.

5. Don't be headstrong or overbearing. The traffic officer has all he can attend to without stopping to argue over a minor point. He has authority, but seldom cares to use it to clinch an argument which could have been avoided by the driver with appreciation of modern traffic problems.

Set Good Example.

6. If you are a "distinguished" citizen and feel that traffic regulations are for others, by all means remember your position and set a good example. Make things easier for the officer, who is there for your safety by obeying the signals without question or argument.

7. Automobiles rush down on the traffic cop from all directions. The strain of keeping them moving smoothly is a job the ordinary motorist would not accept as a gift. Remember this and do your part as a law abiding progressive citizen.

NOT BEEN SUED, SAYS THE BUICK COMPANY

According to a statement issued by the president and general manager of the Buick Motor company, the corporation has not infringed upon any patents nor has it been sued therefor. The statement says:

"While we all realize that unfair methods employed by any company or individual will act as a boomerang and eventually retard prosperity of the originator, we felt called upon at this time to state that reports being circulated to the effect that the Buick Company has been sued by one of its competitors for patent infringements is absolutely untrue and without foundation in any way, shape or manner."

"As long as the buying public continues to appreciate our present design, as it certainly seems to, there is no intention on the part of this company to make any radical changes."

"We feel that you are entitled to the above information as a contradiction to propaganda being circulated by competitors who desire to retard our sales. You can emphatically state that such reports are absolutely without any foundation whatsoever."
