CHAUTAUQUA TO COME IN JULY

Representative of Ellison-White Company Spends Day in Roseburg.

TO HAVE FINE PROGRAM

Opera Company, Play and Famous Marimba Band Among Musical Features.

Earl Nott, representing Ellison-White Chautauqua was in Roseburg today for the purpose of completing the contract for the summer Chautauqua here, and arranging for local committees to handle the advance work. At the close of last season's work, the contract for this year was not signed up, although only seven names were lacking on the list of guarantors. Mr. Nott expects to complete the list and have the contract signed within the next few days.

Mr. Nott states that the program this year is the best that Ellison-White has ever offered on this circuit. The best of music and speakers, with the finest entertainers possible will be presented, and the people of Roseburg and vicinity are assured of a Chautauqua of more than usual merit.

One of the principal musical features will be the Marimba band from Guatemala. This band has played at the Hippodrome in New York City, at the Million Dollar Pier at Atlantic City, and for great social functions given by Mrs. Vincent Astor, Mrs. George Vanderbilt and other prominent social leaders. The band has made a number of records for the Victor company.

Ada Roach and Ruth Freeman, in the Roach-Freeman Duo, are very popular entertainers. They were on the circuit three years ago and were one of the main attractions at that time.

The Ernest Gamble musical company, a collection of artists presenting chamber music, will also be presented. One of the big features will be the presentation of Robin Hood by an opera company consisting of twenty-five people. This company is directed by the woman who was assistant to Ralph Dunbar for many years, and Mr. Dunbar has also assisted the company in arranging the production.

There will also be presented the Ralston trio in music, readings, and sketches, and the Cambria musical company, five artists appearing in mixed quartets with pianist.

The play this year is "The Great Commoner," a dramatic interpretation and visualization of Abraham Lincoln. This play was produced on an eastern circuit last year, and was exceedingly popular.

Mr. Ellison saw it and was so impressed that he immediately negotiated for its purchase. He says that it is the finest play he has ever seen on the Chautauqua platform.

There is also an unusually strong staff of lecturers. Arthur Waylen Evans, one of the most sought for and popular lecturers on the platform. He is a rapid fire talker and is dealing with the topic, "What America Means to Me."

Another interesting number will be Chief Strongheart, the noted Indian orator.

Sam Grathewell, one of the best examples on the platform of a self made man, a man who has fought against odds and won, will speak on "Getting Your Hoochie."

Norman V. Pearce, the Australian lecturer, poet and explorer, presents a fascinating lecture on "Australia, the Curiosity Shop of the World."

Senator Frank B. Willis, of Ohio, former governor and now United States Senator from that state, will also be one of the speakers.

Ralph Bingham, is one of the best known men on the platform, and presents a clean, forceful and humorous philosophy in his talk.

Edward Amherst Ott, has a message of an inspirational nature. He is well known in the east, but it is the first time he has appeared on the western circuit.

The Chautauqua will come the second week in July, a little later than last year, Mr. Nott says.

COOKED FOOD SALE.

The Past Noble Grand's club will hold a window sale Saturday, January 26, at Picken's Book Grocery Store.

Mrs. George March, who resides in Looking Glass was in town for several hours this morning shopping.

Average precipitation for 46 wet seasons (September to May, inclusive)... 21.48
Fair and continued cold tonight and Sunday.

WILLIAM BELL, Observer.

TOWN LIFE IN NEW REPUBLIC

Community Building in Czechoslovakia Includes Theater and Other Forms of Recreation.

Village life in Czechoslovakia is much fuller than the life on our main streets. As in most of Europe, the farmers do not live on isolated farms cut off by bad roads and weather from their neighbors, but after their work in the fields come back into town and have a real community life there—social, political meetings, dance and song festivals, sokol entertainments, outings, according to Viola I. Paradise and Helen Campbell in Scribner's.

In one village of only 1,200 inhabitants—a village consisting of a single street and down near the railroad station a malt factory owned co-operatively by the farmers in the village—was a community building erected a year ago with public funds—800,000 crowns. It had a theater, lecture rooms, a well-equipped gymnasium, a large garden, an athletic field, an excellent coffee house and restaurant and a number of rooms in which visitors to the village could be accommodated—the whole building modern and attractive.

The day we visited this village a play for children was being given in the theater, preparations for a sokol lecture in the evening were being made, in the coffee house men were reading papers from all over the country or were playing billiards or chess. The opera from the nearest city was to come next evening.

STRETCH OUT BODY MUSCLES

Do as Animals Do if You Wish to Keep Fit, Advises Walter Camp.

I went to the Bronx zoo, and I watched the lions and tigers. I saw none of them standing and kicking out their legs 50 or 60 times for exercise. I did see them stretch the great body muscles a hundred times by getting hold of the bars of the cage and then stretching that great back, says Walter Camp in the World's Work. You find the same with the domestic animals.

Call your dog off the sofa; what does he do? The first thing after he has jumped down is to make one long stretch backward and forward, seeing that those muscles of his body are all right. He does this a hundred times a day.

Are these simple exercises sufficient to keep one fit and strong? The answer to that question is another question: Would you dare open the door of the cage of one of these wild animals? And yet he may have been in that cage for six or eight years. If you were put in a twelve-foot cage for six or eight years you would be powerless, but they can run and jump. They keep themselves fit by this stretching of the long muscles of the body.

Recession of an Old Master.

In London the other day a certain insurance company was requested by a firm of auctioneers to insure an oil painting for \$500 (\$2,250). It had been in the possession of an old English family for many years and was said to be very valuable. The insurance company officials had the old painting cleaned in case identification should be required. The title submitted to the auctioneers was "A Storm at Sea." After the cleaning this title was amended to "Two Little Girls and a Dog." No value could be placed by either the company or the auctioneers upon the painting. Experts were called in and values were fixed all the way from \$100 (\$450) to \$200 (\$800). Finally the picture was sent to a firm of famous dealers who declared without reserve it was just worth 18 shillings (\$4.32)—Insurance Press.

The New Loper Cure.

The treatment with the ethylsters (of the Chaulmoogra or Hydrocarpus oil) seems the beginning of a solution of the, up till recently, hopeless problem of leprosy. "The doctor conducts a constant hand-to-hand struggle with the bacilli, fighting now one way and then another. It is worth it all. What a treat to go about our home now! They may have no toes, but you can see them stumping round as if they were hale and hearty. . . . Instead of 90 or 10 daily dressings, now we have only 15, and these are largely new-comers." This is from Dr. Isabel Kerr, who is working among the lepers at Ditchpall.

Always Safe.

A man was taking dinner at the home of a friend. The dinner consisted chiefly of hash, and on being offered some he refused. The host, not wishing to see his guest go hungry, insisted that he take some. Upon that the guest replied that he never ate hash, not even at home.

"Why is that?" asked the host. "Well," answered the other, "I never eat it at home because I know what's in it, and I don't eat it away from home because I don't know what's in it."

"Diggold" a Substitute for Gold.

The Swedish cheap jewelry alloy called "Diggold" is claimed to combine the color and lustre of gold with the hardness and durability of steel, also to have great resistance to the action of acids and alkalis. It seems to be an aluminum bronze with copper in varying proportions up to 50 per cent. It is stated to be a good substitute for German silver, which contains considerable nickel as well as copper, with small amounts of aluminum and zinc.

ARE YOU AWAKE TO OPPORTUNITIES

Do not let good opportunities pass you by without taking advantage of them. Sometimes the reason for not improving them is want of the ready cash. You make good preparation when you deposit weekly or monthly with the Roseburg National Bank.

Christian church Sunday evening, Jan. 20, Children's Evening, Those taking part, Ardath Manna, Maxine Smith, Kenneth Radabaugh, Ona Lancaster. All fine. Orchestra and anthem. Come. Revival begins Feb. 3.

WOMAN NEARLY DROWNED IN DITCH

Mrs. Dora Garrison of Medford, was nearly drowned yesterday when the car in which she was riding with Mrs. Edith Haydn Jones of Medford, turned over into a ditch filled with water near Yoncalla. Mrs. Garrison and Mrs. Jones visited here for several days with Mrs. George Daudel, and left yesterday morning for Portland, traveling in a Dodge roadster.

A short distance north of Yoncalla the car skidded on wet pavement, and turned over into a ditch full of water. Mrs. Garrison was pinned down and by the time she was rescued from her perilous position she was unconscious. She was taken to the home of J. H. Kruse, near Yoncalla, where she is recovering from the injuries. She was almost drowned, but will be all right again in a short time. Both women sustained minor bruises also. Mrs. Jones was formerly in the photography business in Roseburg, and is well known here.

HOMAGE TO THE MEMORY OF ROBT. LEE

(Associated Press Leased Wire.)
ATLANTA, Ga., Jan. 13.—The city paid homage to the memory of General Robert E. Lee, Confederate leader, and man and woman in rank in national and state monuments, were drawn aside as granite crashed down the slope of stone mountain, leaving a 10 foot square, the head of the general standing in relief, set in native rock. As the stone tumbled its way from the top of the mountain to the ground below, two American flags, covering the features, were drawn aside as C. Helen Plane, 94 years old,

widow of a confederate colonel who died in battle and a charter member of the United Daughters of the Confederacy, commanded stone mountain to give forth the head of Lee, symbolic of the arms of the Confederacy.

Lee's head is the first unit of what is destined to be one of the world's greatest monuments. Cut in living stone, the head of General Lee is the central figure about which will be carved a panoramic group of Dixie's immortals as an everlasting memorial to those who died for the Confederate cause.

NOTICE TO ELECTRIC CONSUMERS

Current will be off Sunday, Jan. 20th, 1924, from 8 a. m. till 4 p. m. affecting all territory east of Winchester St. in North Roseburg.
THE CALIFORNIA OREGON POWER COMPANY.

THYE AND DERN WRESTLE TO DRAW

(Associated Press Leased Wire.)
SALT LAKE CITY, Jan. 19.—Ted Thye, of Portland, Oregon, claimant of the world's light heavyweight wrestling championship, wrestled to a draw in a 30 minute time limit here last night.

Rev. Brown Here—

Rev. F. A. Brown, pastor of the Methodist church at Sutherlin had charge, last evening of the song service at the revival meetings being held in the First Methodist Church. He has a good voice and delighted the congregation with one of his solos.

What the World Is Doing

AS SEEN BY POPULAR MECHANICS MAGAZINE

Sun's Rays Make Alarm Clock Cannon

Alarm is called upon to inform the world of a community in southern California when high noon has arrived, by

the firing of a charge in a cannon. Fixed to the piece is a small lens that focuses sun's rays on the timepiece of the gun in such a way that they do not reach the clock until the sun's position is directly in line with a tiny opening. The sun's rays of the "alarm" are arranged to admit it to the light beams at the same time every day of the year. Often the clock fails to work because of cloudy weather that prevents sufficient heat from passing to ignite the explosive. The clock is indicated on a clocklike dial.

Grayhound Is Speed Demon of Animal Kingdom

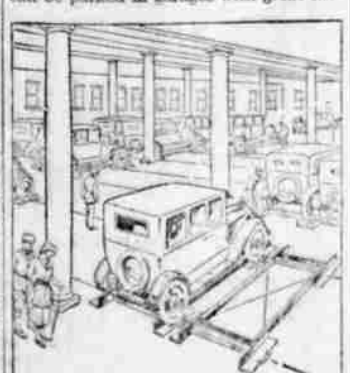

Through a series of recently completed tests, the speed of animals are reported to have been determined as follows: the cheetah, race horse, prong-horned antelope, hare, Texas jackrabbit, cat, coyote, foxhound, and gray wolf. The records were made by noting the number of bounds made by each animal in a given space of time, by means of a stop watch, and then measuring the length of the leap. The grayhound, it was ascertained, can travel a short distance at 35 miles an hour, about four times as fast as the hare. None of these animals, however, can keep up a steady pace for any considerable distance, although the fox and wolf can beat either the cheetah or race horse in this respect.

Bees, Color-Blind, Must Learn Way by Experience

Bees are color-blind and they learn their way about by experience rather than by instinct, according to tests recently conducted by scientists. The experts show that to these honey-making insects, red and black look alike, orange and yellow are the same as green, and there is no difference in the appearance of blue, violet, and purple. However, they can see ultra-violet rays, which are invisible to the human eye. It was found that the guiding influence which takes them back home is nothing more than experience. It has been long known that bees locate hives quicker, the longer they have occupied them. During the experiments, some of them were put to sleep by ether, taken from a new hive, and moved 12 yards away. On the third day 30 per cent returned and 90 per cent had reached home on the eighth day.

Auto Stored on Sliding Shelf to Save Space in Garage

Rolled from a driveway onto platforms that slide to their storage spaces on steel rails imbedded in the floor, automobiles can be parked in garages with great saving of space.

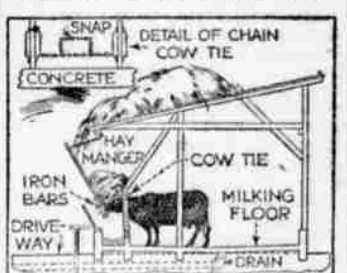

ing of rooms and little danger of damage from contact with posts, walls, or other parts, by the invention of a mid-western engineer. The system, it is said, permits a third more machines to be accommodated.

dated than by other methods. Any of the moving "shelves" can be pushed to the passageways for loading and returned to position in a few moments. Owing to the ease with which they can be moved, hand power alone is required. Attendants are also relieved of the trouble of manipulating the cars to guide them into stalls of crowded garages.

A Novel Dairy Farm

Milking and feeding go together, and therefore provision should be made to milk and feed at the same time. A novel

dairy barn, which is arranged to permit this, is shown in the drawing. The hay manger is located above the heads of the cows so that they have to reach up a trifle to pull the hay out; the bottom has a row of 1/2-in. bars to allow this. A hay mangle of this type has the advantage of containing enough hay to last the cows for a number of days. The trap door of the hay manger hangs outward on chains and can be pushed back into vertical position whenever necessary, as in cold or stormy weather.

The grain manger is of the ordinary type, except that it is much larger and also lower. Both mangers can be filled from the outside, from a wagon or truck, the surplus hay being temporarily stored on the roof, ready to be raked into the manger when needed.

Another interesting feature of this dairy barn is the chain cow tie, which is an improvement on the stanchions usually used, as the cows have greater freedom to move their heads about, the bars permitting the chain to be moved up and down, but preventing the cows from moving backward.
