Creeping Along For Five Years

Two Tubes of Joint-Ease Now Walks Anywhere
Cannot Praise Great Joint Remedy Too Highly, Says W. J. Roy.

Read his grateful letter and then if you can think of any reason why you shouldn't use Joint-Ease for stiff, swollen, inflamed or stiff, creaky, sore joints you must be a pessimist.
Gentlemen: I am sure glad to say to the Public I have not been able to get around only to just creep along for five years, until I got hold of Joint-Ease and I now can just walk where I please. I had the flu and it fell in my legs. My knees were swollen and my legs all the time. Now the pain has all left my legs and the swollen legs are normal and I cannot recommend Joint-Ease too high. I have just used two tubes of Joint-Ease only and will not be without it at all times.

Truly yours, W. J. Roy, Morgantown, W. Va. Feb. 26, 1924.
A tube costs but 60 cents at Nathan Fullerton's or any druggist, anywhere. Always remember when Joint-Ease gets in joint agony gets out—Quick.

WOMAN SURPRISES HER FRIENDS

"After a spell of typhoid fever 7 years ago I began to suffer from indigestion and gas in my stomach and colic attacks. This gradually became so bad that my doctor advised an operation for gall stones. A friend advised me to try May's Wonderful Remedy which I did with splendid results. My friends were astonished at my rapid improvement. I have no more bloating and can eat anything I wish. It removes the catarrhal mucus from the intestinal tract, and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded at all druggists."

ISSUE OF "VOLT" URGES PROTECTION

President Coolidge has set aside April 21 to 27 as "Forest Protection Week" throughout the United States. His official proclamation has just been released to the press, in which he strongly urges the governors of all states, organizations, schools, and all citizens to join in giving thought to the very heavy but preventable annual loss from 36,000 forest fires in the United States.

The California Oregon Power Company is doing its bit toward accomplishing the purpose of this all-important movement by devoting the entire April issue of "The Volt" to the story of "Forest Protection" in all its phases. An interesting article by Forest Supervisor, E. H. MacDaniels of the Baskin National Forest presents many salient facts regarding the timber industry and its importance throughout this territory.

The article is replete with many attractive photographs which not only bring out the lesson of "Fire Prevention" but present a striking picture of the recreational possibilities of this country.

The recreational feature makes this issue a popular one from its instant appeal to the tourist and visitors from other sections of the country. It is predicted that many extra copies of this number will be mailed by local people to friends and relatives throughout the eastern states. To provide for this additional demand the Copco management has secured a large number of extra copies which can be obtained from the local office.

Do You Know This?

"High-Grown" means EVERYTHING in Coffee!

Wherever coffee grows, the best coffee grows high on mountain ridges and plateaus—not in the lowlands or valleys. Only high grown coffee is top quality, rich in caffeol. (Caffeol is the aromatic, wholesome, flavor-giving element.) Quality in the cup of coffee you drink at mealtime, harks clear back to the coffee bean itself—the best coffee is made only from high-grown coffee berries.

Try Golden West—the High-Grown Coffee

High grown coffees are rich in caffeol—the aromatic essential oil which imparts the rich wholesome flavor to really good coffee. But coffee flavors vary—each climate—even each crop—has a flavor of its own. So Golden West is blended from the choicest high grown coffees of various countries, to produce the rich, mellow Golden West flavor which is always the same and always deliciously good.

Golden West tastes good because its quality is so high. It's grown right, blended right, roasted right, then cut with sharp steel edges (not crushed), and vacuum-packed in the handiest container ever!

Opens with a key that comes with the can—as easy as peeling a banana—and you have a good snug-fitting lid for the opened can that helps retain the Golden West flavor till the last spoonful is used.

A High-Grown Coffee Bean
Hard, high quality.
The hard, strong fiber, high-grown coffee bean is rich in caffeol. It holds its fine flavor, rich aroma, and high quality intact until released by roasting and steel cutting.

A Low-Grown Coffee Bean
Soft, inferior.
The larger, softer bean, grown on low lands is poor in caffeol and lacking in flavor, aroma and quality.
