CALIFORNIA CROPS DOING FAVORABLY

SACRAMENTO, June 3. — Aside from the damaging windstorm that occurred in the northern half of the state May 27, 28 and 29, weather conditions during the past fortnight were generally favorable to all lines of agriculture, says the report of E. A. Kaufman, federal agricultural statistician today.

Last week's hot north wind did little damage to the grain in northern California. Regarding the plum, cherry and other tree fruit, which was reported last week to have been seriously damaged, the report says: "In Placer county where about 27 per cent of the state's plum crop is normally produced, it is estimated that from 10 to 20 per cent of the plums were blown from the trees. It is reported that pears suffered to the extent of about 10 per cent in the Sacramento river district.

"There was also some loss to pears in other districts in northern California, but when considering the state as a whole, the damage to the pear crop was small.

"While a good part of the cherry crop has already been shipped, some of the later varieties, especially the Royal Annas, were injured to some extent by being bruised as a result to the wind. The damage in per cent of the total crop can not be ascertained at the present time, however, it would not be great."

CALL FOR BIDS ON NEW FIRE ENGINE

Bids will be received on July 7 for a new fire engine and other apparatus. It was decided by the city council last night. The fire committee reported that it had carefully gone into the proposition of buying a fire truck, and believed that nothing smaller than a 750 gallon pump should be procured, and will ask for bids on pumps having a capacity of from 750 gallons to 1,000 gallons. An attempt was made to include 500 gallon pumps in the bids also, but this was not successful. Bids will be received on the engine and apparatus jointly or on either separately so that combination bids may be secured. An ordinance is to be prepared at once to provide for the disposal of bonds in the sum of \$15,000 to buy the apparatus.
