WEDDING JOURNEYS

The first aftermath of the June wedding season is a large number of young couples on the railroad trains and tourist routes doing their best to conceal their sentimental looks and appear as if they were old married people. To accomplish that result, they would have to manifest a studied indifference to each other, coupled with a slight rudeness and unconcern. A wedded couple may care for each other very deeply, but not many of them will maintain through the years the same solicitous attentions that prevailed on their wedding journey. It would be better for them if they did. These little attentions cost nobody anything, and they soften over many indifferences. Instead of the just married folks trying to imitate the old timers, the latter would better copy the newlyweds, and realize that the little courtesies sweeten all life, and bring people into closer comradeship.

Congress at its next session will consider an amendment to the Federal Constitution which provides for taxing the income from future issues of state and municipal bonds by the federal government. It also provides that states may tax the incomes from future issues of government bonds that are owned within their borders. In plain English this means that the income derived from tax-exempt bonds, instead of being tax-free as in the past, would hereafter be subject to taxation in the same manner as income earned in any manner whatsoever. More than a billion dollars is now diverted every year from agriculture and business to tax-free bonds. This is a knife that cuts both ways. It deprives industry of the needed capital and it shifts heavier taxes upon agriculture and business. If that leak is stopped by the passage of the amendment, agriculture and business will thrive as never before. Tax-free bonds and heavy surtaxes do not promote good times. Lower surtaxes with no more tax-free bonds will promote prosperity.

The folks who are anxious for newspaper publicity can always get it by getting out and doing some useful thing for the community.

PRUNE PICKIN'S

BY BERT G. BATES

GOOD EVENING FOLKS—
Ye ed. was out
Pitchin' hoss-shoes
The other day
And hot diggety dawg
But the ol' game
Hain't lost
None of it's charm
And it's no
Wonder the fellers
In the rural districts
Giggle when they
See us go by
With knickers on
And a sack of
High priced
Golf Clubs
Slung over our back.

BE FOOLISH WITH US.
With the beginning of warm weather each year many of Prune Pickin's regular contributors quietly sneak out on us. Now ye ed. doesn't want to be hard-hearted, but we want to announce right here that if contributors want to take a vacation they should have to do it in the winter. It is all foolishness that ye ed. has to sit here and write all day when the trout streams are yielding such choice beauties—get that?—it's all FOOLISHNESS that we have to write.

THEN AND NOW.
BELINDA, 1824.
Belinda was demure and shy,
A gentle, well-bred, modest maid;
Her sudden blush and downcast eye
A tenderness of heart betrayed.
She was a shrinking violet,
A valley lily, coy and meek,
Who having loved could not forget,
Who knew maids must be sought,
not seek.
But ah! alas! and well-a-day!
A handsome rake her favor sought,
Then trampled on her heart, they say,
And havoc in her bosom wrought.
Belinda in a deep swoon fell,
And pined away with tear and moan—
Her grave is in a bosky dell;
A dove is carved upon her stone.
LINDA, 1924
She is a self-reliant miss,
Gay Linda, bobbed of heart and hair;
In jazz and movies is her bliss;
The latest style, her greatest care.
She holds her job, is proud of it,
And spends her money free and fleet;
Love does not trouble her a bit,
While escorts grovel at her feet.
A wealthy rascal her promise won,
Then with a flapper ran away;
Lin did not moan, "Oh, life is done!"
Nor droop and die; that was passe.
She changed from street to evening
dress,
Achieved a make-up chic and cute,
Sent out her picture to the press,
And brought a breach-of-promise suit.

BEAR ATTACKS CAMPERS.

(United Press.)

PORTLAND, Ore., June 14.—The woodsman's tradition that a bear does not attack has been proved to be untrue by an exception to the rule.

The exception, a big brown bruin, came to the notice of Mr. and Mrs. O. L. Markham while they were fishing on the upper Lewis river in Washington.

Appearing on the opposite side of the river from the Markham camp the big bear endeavored to catch a salmon and then started to swim in the direction of the watchers.

Markham fired into the air with a single shot pistol, and shouted to drive the animal away. But the beast, crazed by the unusual summer heat or confused by the noise, kept on coming. The Markhams did not fear the animal because of the proverb of the woods that a bear will not attack humans unless hurt. Markham did not want to shoot the animal with his small .22 calibre weapon for fear of antagonizing him.

But the bear did not stop. He lumbered out of the river and came toward the campers until about 10 feet away. Then h rose on his hind legs as if he meant to attack and in a desperate attempt at self defense Markham fired his single shot pistol and the bear fell, a paw's reach away, the bullet having penetrated his brain.

An Announcement by
THE CALIFORNIA OREGON POWER COMPANY

The California Oregon Power Company announces the completion of arrangements for the immediate investment of several million dollars in Southern Oregon and Northern California.

This new investment will become a permanent asset of the entire territory served by the company, as it will be converted into new power plants, dams, transmission lines, equipment and other productive additions to its properties.

This announcement is made to our customers in appreciation of the wide public interest in constructive developments of such magnitude.

Its Real Significance

The California Oregon Power Company points out, however, that the importance of this construction program to the communities with which it is a "Partner in Progress" does not lie in the mere investment of millions of new capital in the territory which it is privileged to serve.

The chief significance is found in the cold facts that justify the investment; in the continuously increasing use of electric power and light; in assurances and contracts already in the possession of the company which guarantee the profitable absorption of this increased production of electricity.

The Company is also pleased to be able to inform its Preferred Stock holders that as soon as the new construction is placed in service the financial strength and net earnings of the company will be even more satisfactory than at present.
