SLIPPERY CROOK AT TRAIL'S END

(Associated Press Leased Wire.)
FORT WORTH, Tex., Nov. 13.—Deputies from the sheriff's will depart for Miami, Florida, where they will take into custody W. H. Harkins, master forger who has fleeced business men and bankers out of more than \$275,000, according to his own confessions, and who has three times made his escape from officers and jails following his arrest on the forgery charges. Five months previous to his arrest at Pecos, Texas, Harkins had broken away from the California asylum. He was confined in that institution after he already had served one term in the California penitentiary.
Two months after his escape a woman told New Orleans police of his presence there and while returning to California with an officer from that state, Harkins again regained his freedom.
At another time he was forced to abandon a \$9,000 automobile in a small Arizona town when he managed to squeeze through a rapidly tightening police net.
Conservative estimates of the losses entailed by banks in this country through Harkins operations aggregate something in excess of \$275,000. He is said to have victimized banks in more than 50 cities in the United States.

MIAMI, Fla., Nov. 13.—William H. Harkins, master forger, arrested here Wednesday, declared today that he would fight extradition. Telegrams were received by police from Fort Worth, Salt Lake City, Nashville, Charleston, West Virginia, and other cities requesting that he be turned over to them to face charges of forgery and similar crimes.

This is a Studebaker year.

Charm of Woman Depends Upon Vital Glands

SCIENCE has found that a deficiency in certain glands in women results in mental sluggishness, irritability, despondency, forgetfulness and fatigue, tendency to sleep a great deal and morning weariness. Even the brilliancy and luster of the hair and the delicate beauty and softness of the skin are impaired if the glands do not function properly.

According to leading authorities the benefits of gland trans- fer may be had without operation; gland substance can be taken internally in tablet form.

Glandogen, the new scientific gland tonic, prepared in tablet form provides a simple method of taking glandular treatment. Glandogen, for men and women, Chapman Drug Co. Mail orders accepted.

OAKLAND DOG CASE GOES TO THE JURY
Circuit Court this morning com- pleted the hearing of the Medley-Davis case from Oakland, a suit for \$200 damages growing out of the killing, by Mr. Davis, of two dogs belonging to Mr. Medley, and the case was taken under con- sideration by the jury. The suit attracted a great deal of attention and there was a wide divergence of opinion. Mr. Medley's valuable dogs were turned loose to chase a stray dog away from the ranch, and failed to return. Mr. Medley later learned that they had been killed by Dr. Davis, and found where they had been buried. He tried to collect for them but Mr. Davis claimed that he shot the animals while they were in the act of running his sheep and refused to pay for them. The witness stand he claimed that he shot the dogs in his own sheep pasture and that wool was found between the teeth of one of the dead animals. Following the hearing of this case the court took up the case of the Riddle State Bank against the American Surety Company. This is a suit to recover \$1800. The Glen- brook Farms Corporation was sued by L. A. Martin, who attached the property a surety bond was furnished by the American Surety company which required a certifi- cate of deposit as security. The certificate was issued by the Riddle State bank and it was later cashed by the surety company.
A judgment was awarded Martin and was satisfied and the attach- ment was released. The bank de- manded the return of the \$1800 deposited as security on the bond, the claim having been assigned to the bank by C. B. Shipman, presi- dent of the Glenbrook Farms cor- poration. The American Surety company has refused to return the amount and is holding it, claiming that it is being applied on other obligations alleged to be owed by Mr. Shipman.

"It was not the intention of the act to prohibit home making and consumption of fruit juice that will not become wine. A fruit juice will not develop alcoholic content without the use of sugar. Some persons would become intox- icated on a small percentage of alcoholic content while others can consume large quantities of high content without exhibiting signs of intoxication."
"I do not feel that the ruling of Judge Soper will have any effect on prohibition enforcement."

PORTLAND, OR., NOV. 13.—

TINY REPUBLIC CONTROLLED BY MERCILESS REDS

(Associated Press Leased Wire.)
HOUSTON, Tex., Nov. 13.—Atrocities which will amaze the world when made known have been committed in the republic of Georgia in the Balkans, by Bol- shevists during the past year, ac- cording to an interview with Prince David Mdivani, of that na- tion, printed today by the Houston Post-Dispatch.
Determined to force the state, of such strategic and economic value, into submission to its rule, Prince David said, the red government is resorting to methods of cold blood- ed butchery. The prince was forced to flee from his native land be- cause of threats on his life. Since 1919, he said, there have been at least 20,000 Georgians slaughtered without trials. A ship load of na- tives was taken out on the Caspian sea and the vessel sunk, with no one rescued. Others were cal- led to their doom and shot down. Rigid censorship prevents the news being sent abroad.
