## ADVICE TO GIRLS

## Trust Yourself!

One dictum to girls in the business world will always stand: "Trust yourself!" Faith in one's ability is essential. Unless the worker herself has faith in her powers and personality, few others will. But there is one ease in which no one should trust herself. Do not alarm. I urge no change in the underlying theory of self-confidence, but I do urge a change in one practice. Do not attempt to remember facts and figures that can easily be jotted down and kept handy.

Real Tragedy To do so will make your brain but a mangle's nest. A young girl was employed in a large wholesale concern. She worked very hard.

One day she broke down and cried.

"The whole price schedule has been changed," she sobbed, "and I had just finished memorizing it."

It was a real tragedy to her—there were more than 50 items involved.

"Dear child," said an older friend, "don't cry, for you have learned something. The entire price schedule can be typed on a card small enough to keep in your pocket. Why not try to keep that kind of information in your pocket and more useful information in your little head?"

Pencil and paper can be purchased cheaply. And the pad never gets a headache, no matter how much information is set down.

Application of the pad and pencil system must vary with each position.

Some girls keep a small notebook with changeable leaves in their pocket at all times. Prices, things to be done, appointments and miscellaneous information are jotted down, always ready on call.

Easy To Do A messenger girl, who had a reputation of never making a

## Chamoisette Is Fashion's Choice For Winter Gloves

ALTHOUGH milady still clings to the lure of Italian silk for her dainty underthings during the chilly months, she demands, for sport and general winter wear, the chamoisette glove, of which there are many charming varieties. Pictured here are two pretty novelties in chamoisette. In the sketch at the right and in the photograph above, is pictured a glove with a two-inch French cuff scalloped to give an applique effect. The edges are embroidered in the same color as the glove. The oval insets, embroidered in silk, are of contrasting color as is the band at the lower edge of the cuff. At the left is sketched a glove with a turnover pointed cuff and lining of contrasting color. The perforated edges are embroidered in the same color as the lining. The turnover cuff is fashion's latest dictate.

department to another revealed her secret to me. She kept a piece of opaque celluloid and a soft pencil handy. She jotted down her instructions and messages and wiped them off with waste paper or a rag when through.

Secretaries and stenographers probably get better results by using a desk calendar pad. Most offices are equipped with these, but few are used regularly.

One word of warning: First make sure that the fact in question is not something you may need when your notepaper is not handy. Then jot it down.

## DRESSING ON A LIMITED INCOME

By Hedda Hoyt (Fashion Editor United Press) NEW YORK, Nov. 29.—(United Press.) It's the girl who is working on two cylinders and who manages to look as though she were working on all six—who is the heroine of the fashion world. The girl who has sufficient money to support a six cylinder wardrobe lets many a little Ford outfit out-speed her on Fifth Avenue.

This fall there are so many inexpensive cloths of good material and of good lines that anyone with taste can be well dressed. Take for instance those snappy little short fur coats which can be made of anything from goat fur to sable! Some of these are selling so cheaply as to come within the means of any working girl. Cat fur and goat fur dyed in deep rich browns, may not resemble the more expensive furs but they do have smartness and chic. Who knows at the first glance whether they are real black or dyed cat? And who cares? It's the fit of the coat and the shape of the skirt that above all that creates an ensemble effect worth looking at.

A girl can spend several hundreds of dollars on a fur jacket and from fifty to a hundred dollars on her hat and snappy little person with quick wit seizes the opportunity of copying her costume and appears a week later in a cheap duplicate which she wears with an air that absolutely outclasses the owner of the original model. Sure enough, women know the difference between cat fur and sable and between \$50.00 bouclé and a \$2.50 one, but who dresses for women nowadays? For that matter, many of the very wealthy women are wearing imitation furs and jewels this year, so why worry about quality?

Follow the Standard The well dressed woman does not attempt to set styles of her own if she has a limited dress allowance. She knows that she can't hope to compete with the likes set by fashion designers. She sees something smart in a shop window or on a well dressed woman and, choosing her own material, follows in cheaper material the standard set by her wealthier sister.

Many women like to feel that they are original in dress. They will purchase a fashion book and create a gown with lacy linings, velvet waistline and Madeline skirt and add trimmings approved by some other designer. The finished dress looks like a Christmas tree. It has neither style nor chic and is

different patterns. The designer has a reason for everything he or she does. If her frock has long sleeves it should never be made without sleeves. If it is long as to hem it is because such a frock requires a long hemline.

The home dressmaker should realize these facts. Accessories are very important these days, and it is these cheap little accessories which make or mar one's ensemble. Just now well-dressed woman are wearing subdued shades of hosiery. One can tell at a glance whether one is up to the moment in hosiery shades. Planks and flash shades are no longer worn for street wear. Wood shades, light tans and browns and grays are good. Gunmetal accompanies the black shoe, occasionally one sees the white stock worn with a black and white shoe combination. White hosiery should be worn when this costume is a black and white affair.

Gloves and Handkerchiefs

Gloves likewise play a very important part this year. Tans and mauve shades are those generally chosen. White gloves are not being worn during the day time and only occasionally at night in which case they may either be glazed kid or suede. Most women are gloveless for evening occasions. A woman in a Spanish shawl with long white gloves looks ridiculous these days. Arms are always bare, it would seem.

Handkerchiefs are chosen with respect to the coloring of the frock. The all-white handkerchiefs of lace or lace-trimmed may be carried for evening use, but for day wear the pastel squares of linen, chiffon or silk are the mode. Little sets of six handkerchiefs may be purchased in the shops, with each handkerchief of a different color. The fastidious woman chooses a handkerchief that harmonizes with her frock for each and every occasion.

While these little details of dress do not seem important in themselves, the woman who dresses on a limited allowance must pay heed to them if she wishes to appear smart.

In speaking of fads and accessories, one can't omit the little burpin or brooch that is worn on the left shoulder nowadays. These may be real or imitation.

Another fad which doesn't apply to dress exactly is the painting of fingernails. One sees girls and women with nails painted as red as any Nautch dancer. And women of refine-
