Tip For Beginners.
Solve this puzzle by comparing the synonyms listed in the "Horizontal" and "Vertical" columns with the number of spaces extending crosswise or downward on the diagram, as the case may be. If a word occurs to you meaning substantially the same as the synonym and the correct number of letters to fit in the spaces between its number and the first shaded step following, write it in lightly. Work away the first words, the "easy" words, first, and they will give you plenty of clues to the difficult ones.
