

SENATE REJECTS WARREN'S NAME SECOND TIME

(Continued from page 1.)

other illustration of his legal capacity, declaring that through him the case was settled to "the satisfaction of all the countries involved."

Mr. Warren's diplomatic work in Japan resulting in a cancellation of the Lansing-Ishii agreement and his service in Mexico as ambassador were declared by Senator Goff to be in themselves a proof of his abilities. He read a letter from President Harding to Mr. Warren praising him for his services in Japan.

Similarly the senator then presented a letter from President Coolidge to the nominee congratulating him on his services in Mexico, which the chief executive characterized as constituting "notable achievement."

Concerning Mr. Warren's connection with the sugar interests, Senator Goff asked: "Are all lawyers expected to hold all contact with all the different experiences through which they pass?"

Senator Reed, Missouri, agreed with the West Virginia senator that Mr. Warren had been faithful to his trust, and added: "But his trust was the sugar trust."

He then declared Mr. Warren had represented the "sugar trusts" as late as 1922. Senator Bruce, democrat, Maryland, walked over and whispered to Senator Reed to speak louder.

Turning sharply on the speaker, Senator Reed replied: "I am speaking loud enough to be heard all over the block. Keep quiet and listen."

Senator Reed went over again the charges he has brought up against Mr. Warren in two previous senate speeches, reading at length from the records of the governments "sugar trust" case and pointing out the relationships Mr. Warren had with the sugar companies. This record, Senator Reed contended, showed that the nominee was an integral part of a plan to control the sugar industry in violation of the Sherman law.

Senator Gillett, republican, of Massachusetts, like Senator Goff, a newcomer in the senate, took up the defense of Mr. Warren and in his first speech, declared it "an extraordinary proceeding" that a president was denied the right to choose a member of his own cabinet.

The case against Mr. Warren, he said, was that several years ago, he represented certain interests, if that was to be a man from office, he declared, many able lawyers would be excluded.

Senator Conner, republican, of Michigan, Mr. Warren's home state, interrupted to suggest that Michigan house members did not want Mr. Warren confirmed.

Senator King, democrat, Utah, announced he would place in the record a resolution proposing return of the nomination to the president.

Senator Borah, republican, of Idaho, told the senate: "The president has the right to nominate and the senate must advise and consent to nominations. He has the power to appoint only to fill up vacancies during a recess of the senate."

A hundred years ago said Senator Borah, Senator Webster opposed the nomination of Martin Van Buren, to be ambassador to the Court of St. James and in doing so, said he had not opposed the nomination of a president except for cause, but "that I consider Van Buren an unfit and improper man for the place."

"Did President Jackson give Mr. Van Buren a recess appointment?" asked Senator Walsh, democrat, Montana.

"No, he made him president of the United States," Borah replied. "It is much easier in Washington to get along than to disagree," went on the Idaho senator, "if there is anything that weakens a man's backbone, it is the atmosphere in Washington."

After reading the correspondence between H. O. Havemyer and Mr. Warren regarding the sugar consolidations, the Idaho senator added he could draw no other conclusion than that Mr. Warren thought "these men" should escape the law if it were possible for them to do so.

"What senator," he asked, "would permit Mr. Havemyer to write him the letter he wrote to Mr. Warren?"

Senator Bingham, republican, Connecticut, another new member followed Senator Borah. He declared the opposition, in the Study of Mr. Warren's record had been unable to find a thing within the last ten years upon which to base their argument.

"They can find nothing since 1907," he added, "even granting for the sake of argument that they found anything before that time. The fact is that Mr. Havemyer, who wrote the letters, died in 1907."

Senator Butler of Massachusetts, close friend of the president and chairman of the republican national committee, declared that the senate was flying in the face of the sentiment of the country in its rejection of Mr. Warren. "Calvin Coolidge was elected on November 4, by an overwhelming majority of all the people of the country," he said. "That means that the country has confidence in his honesty, judgment and integrity. Do we believe that President Coolidge does not believe in enforcement of the laws of the country? Can you come to the conclusion that he selected an unfit man?"

"We examined the record of Charles B. Warren and learned as a lawyer and business man he engaged in the sugar business in Michigan but he abdicantly," "Some people don't want the prohibition law enforced," Butler asserted, "some people don't want other laws enforced, I predict

that Charles Warren will enforce all the laws." Taking up the fight against confirmation, Senator Norris, republican, Nebraska, reverted to Mr. Warren's sugar connections and charged that "the sugar trust" robbed the federal government of customs duties by short weight on sugar imports.

"But nobody went to jail," added the Nebraska senator. He then reviewed the "scheme of the sugar trust" in "reaching out and taking under its wings" the activities of its competitors. When it was ready to reap and harvest, it sent for Mrs. Warren, he said.

"Follow Coolidge and save the constitution," Senator Norris declared, but now it is "follow Coolidge and ruin the constitution." Senator Sherridge, republican, California told the senate that all its discussion of recent days had not disclosed one fact to alter his support of Warren.

"We know the president stands for law and its enforcement," he said, "and we know that he wants to continue to follow that policy. Therefore, I know the president in selecting Mr. Warren believed and I believe he was choosing a man who would be faithful to his oath and one who would fairly enforce all laws."

To this Senator Walsh, democrat, Montana, replied that if President Coolidge is "embarrassed," it is because, "the nomination is utterly indefensible," and not because of purely political opposition. He cited the six other cabinet members that had been confirmed by the senate since Mr. Coolidge took office as president and that the opposition was "not playing politics."

Declaring the country depends upon the opposition party to point out the flaws of the other, Senator Walsh said it would not be expected the president's friends would expose him.

Referring to Mr. Warren's connection with the sugar interests, the Montana senator declared, "he was as guilty in the trust proceedings as Henry O. Havemyer himself."

Taking up the argument of Senator Bingham that these are old matters, Senator Walsh said it was only 1922 that a consent decree was entered against the American Sugar Refining company and the Michigan Beet Sugar company in the government's anti-trust suit. He added it was true the bill of complaint had been dismissed some time ago as to Mr. Warren's but not as to the Michigan Sugar company of which he was president.

A full carload of McCormick-Deering farm machinery has arrived at Wharton Bros. If you order implements in this car they are ready for delivery now.

**Young Ducklings Early at Home in the Water**  
The woodcock, unlike most other ducks, usually builds his nest far from his natural element, water, writes Ellis Gilmore MacLeod in St. Nicholas. But no sooner are the eggs hatched and the ducklings about the size of bumblebees, than each parent bird takes a little one in its bill, wriggles through the opening in the chestnut tree or white oak which harbors the nest, and with a quick glance lest some enemy may lurk near, flies swiftly overland to creek or water hole. Here the two tiny burdens are dropped gently into the water.

Without previous swimming lessons, these newly hatched mites dart over the surface of the water for the cover of marsh grass or lily pad where they hide until the return of their parents with more of their brothers and sisters.

The flight of the old ducks continues back and forth from the home nest to the water until the family of from 12 to 18 are assembled, when, at a soft call-note from the parents, every little paddler darts to water and starts chasing water spiders, as if that were an old game.

**His Way Out of Dilemma**  
The commanding officer looked down the charge sheet to see what

type of case he had to deal with that morning. Suddenly he started. "Mutiny!" he muttered. "Private King charged with mutiny!" Then aloud: "Where is the corporal who made this arrest?" "Here, sir," answered a corporal, stepping forward.

"Do you charge Private King with mutiny?" was the stern inquiry. "I do, sir," was the reply. "On what grounds?" The corporal hesitated for a moment. Then: "Well, sir," he said, confidentially, "It was really insubordination, but I didn't know how to spell that, so I put 'mutiny.'"

**Heat Kills Germs**  
Radiant (or visible) heat was emphasized by Prof. Leonard Hill—at a recent meeting of the London Zoological society—as "most useful in helping to cage animals to fight against infection" from tuberculosis. Hot-water pipes, he pointed out, though an economical way of raising temperature in the animal houses, do not provide all the benefits of radiant heat such as we know best in the form of sunlight and, in another form, in the domestic coal fire. In fact, central heating—excellent in its place—is not healthy heating, as the prevalence of tuberculosis in steam-heating countries such as Sweden, Russia and the United States goes far to prove.

For your information, milk bread contains pure butter, pure milk, and hard wheat flour, above government requirements. GRIMM BROS. MILK BREAD. Phone 133.

**MARKETS**  
PORTLAND, Ore., Mar. 16.—Large holdings of storage butter a few months ago was a bearish factor that caused a sharp concern throughout the country. At that time it appeared very gloomy for the dairy industry during the coming season.

Big storage operators, too, were worried and plans for a national campaign to encourage the consumption of butter were considered.

Today the situation has changed considerably. The big surplus in storage has been reduced far beyond expectations, although holders took a loss to move it out. The last government report showed a total of 28,862,000 pounds in storage on March 1 as compared to 45,748,000 pounds on February 1. Locally the butter market is in a healthy condition. A carload was shipped south Friday and this helped to take care of the small accumulation in the cube market.

Country dressed meat receipts were light today and prices held firm at 17 1/2 to 18 cents for choice light hogs and 16 to 16 1/2 cents for choice light veal.

Live poultry shipments were moderate with only a nominal call. No change is shown in prices.

An easier trend is shown in the local egg market with prices unchanged. With the California market lower today a decline is expected in sympathy with the south.

"I was cured of Rheumatism," says Sam Miller.

"I was cured of Rheumatism," says Sam Miller.

Sam Miller, aged 39, a cook at the Ryan Hotel, Tacoma, Wash., says: "I want to tell everybody I meet who is troubled with rheumatism this story of mine and what Moorite did for me. I was taken to the hospital suffering from rheumatism and although I had fine attention for two months, there was no relief.

"I then had my teeth extracted without result. I was totally discouraged and disgusted and gave up hope of ever being cured.

"By chance I heard of Moorite and I tried it. The wonderful relief I received in a few days was amazing. After taking Moorite eight days I was back to work. I lost 40 pounds while under treatment, but I will soon gain my weight back again. I can honestly say to any one suffering from rheumatism that I owe my health today to Moorite and I want sufferers to use it and recover as I have done."

"Seven Years of Pain," says H. P. Creager.

H. P. Creager, 3515 North 9th Street, Tacoma, Wash., 56 years of age, and an engineer employed by the Puget Sound National Bank, states that he was a sufferer of a very serious case of stomach trouble and rheumatism for seven years. He was worn out and in such poor health that work was a burden to him and he was forced to spend much of his time in bed. In fact, would not have arisen from bed had not the necessity of earning his daily bread forced him to. On the advice of friends Mr. Creager tried Moorite and stomach trouble and rheumatism vanished and he is now robust and in perfect health and never misses a day's work.

perkins Bldg

with the help to be received from the market road fund and from the general county fund enough money will be available to complete the

structure. It may take several months to complete these projects, as the state highway commission will not allow the bridges to be removed immediately, as they are necessary for detours while paving operations are put through.

The county court has asked the state to pave up to the new concrete bridge at Winchester immediately so that the steel span on the old county road may be removed, as it is desired to get the Elkton bridge in as soon as possible. It is understood that the state is preparing to comply with the county's request and will pave within the next few months, so that the bridge can be taken out early in the summer. It will be quite a task to move the two spans to Elkton, so that the county desires as much time for the job as possible.

Work has already been started on the Oakland bridge and overhead, and as soon as it is open the span at Oakland can probably be removed, as it is downstream from the new bridge, and consequently will not be needed. The county hopes to get both the Elkton and Round Prairie bridges in this year.

The Tiller road job is a part of the plan for the ultimate opening of the Tiller-Crater Lake cut-off. The county has been endeavoring to secure aid from the government

in opening through this important piece of road, and has been promised help as soon as the money becomes available. In the meantime the lower sections are being widened and put on good grade so that they may be used at all times, and will be ready for the heavy traffic which will come over the cut-off when that section is opened. The state has approved an appropriation of \$8,000 for work between Tiller and Milo, which should be sufficient to put that section in good shape.

The Tabor section of the Looking Glass road, is the low section joining on to the road running west to Melrose. It is a comparatively new grade, and the money is to be used for surfacing.

The \$2,000 set aside for the Mr. Nebo road is expected to be enough to complete that project. The grade has already been completed and a few cars have gone over it, but considerable money will be needed to surface it properly and the state has agreed to the expenditure of market road funds on this project.

There is still a small amount remaining in the market road fund as yet undistributed. The county, however, is required under the new law to hold back sufficient funds to provide maintenance for the new work and before any more appropriations are made the county must determine the amount of

STAMPED GOODS  
Yes, that new fancy wool is in at Carr's. If you had any pieces ordered from this shipment kindly get them at once. If you haven't seen the new spring line at Carr's, stop in and feast your eyes. Beautiful worked patterns on display, work anyone can do. We invite your inspection. Sold out other shipment in 3 days.

DISEASE GOES

When You Learn Health Secret

New Health Message Brings Hope To Thousands

A simple truth has won back health for people who have never drawn a well breath in years. Learning just one fact has banished sickness in hundreds of cases where thousands of dollars and months or years of time spent with doctors brought no relief; has put people on their feet who were bed-ridden for years; has freed them from suffering and pain and made them again know the happiness of perfect health and robust body.

This simple truth a special lecturer from the Moorite Laboratories has come to tell you. No matter what you suffer from, how long you have been sick, how weak and rundown you may be, how hopeless your case may seem;—no matter what name the doctors have given your trouble, come and hear this simple truth—it will cost you nothing and it may be your salvation.

Scientists tell us that our bodies can be reduced to about twenty basic chemical elements. These elements vary in quantity, of course. For instance, there is only a trace of Iodine and Silicon, but over 31 pounds of Carbon in the average 150 lb. man.

Your stomach with the help of other organs serves as a laboratory which extracts these chemicals from the foods you eat. When these elements are present in your body in their correct proportion you are healthy, but when thru some cause or other your body is not supplied with enough of one or more of these life-giving chemicals in its correct proportion, then trouble commences. You become weak or run-down—perhaps the germs which your well body was able to fight and throw off get a foothold. Then, certain symptoms develop and the doctor says you have this disease or that disease.

The Moorite Laboratory has demonstrated to hundreds of people that almost all diseases spring from the same cause—lack of one or more of the twenty basic chemical elements. Replace the needed element in your body and quick recovery of health and strength will frequently follow.

FIFTEEN MINUTES TALK WITH

MOORITE

LECTURER MAY SHOW YOU THE WAY TO GLORIOUS HEALTH

Moorite contains many of the most precious of life-giving chemicals—but that is not all. Experimentations covering years of time and proved by hundreds of cases shows that Moorite thru a remarkable action stimulates the stomach and other organs to extract the deficient elements from the food one eats so that soon after you start taking Moorite your body regains its correct chemical adjustment, the stubborn sickness vanishes and the body recovers its old health and strength.

Moorite contains many of the most precious of life-giving chemicals—but that is not all. The above seems so incredible that we can understand that at first it will seem almost impossible to you—but remember, it will cost you nothing to investigate. We want you to come and hear all of the facts from our special lecturer. We want him to tell you of the marvelous cures effected by the use of Moorite. We want him to show you his hundreds of testimonials from people whose lives have been saved by the use of Moorite. Then he will say to you—this "We are so sure of what Moorite will do in banishing disease and restoring health that we will take all the chance. Try Moorite in accordance with the directions that accompany each package on our absolute guarantee that if it does not help you your money will be refunded."

Special Lecturer From Moorite Laboratories in Attendance for a Few Days Only.

A special Lecturer from the Moorite Company will explain how Moorite has brought glorious health to hundreds of sufferers from stomach and kidney troubles, blood impurities and other ailments.

"Boils All Over Body Cured," says F. L. Cox.

F. L. Cox, 1440 East 30th Street Tacoma, states: "I am thankful to Moorite for restoring me to health. If not actually saving my life."

"Without it I was destined to continue ill health, a discouraging view of life and despair. Now I am feeling fit and fine and can thank Moorite for what it has done.

"I am 46 years of age and my stomach had bothered me so badly for five years that I could not sleep well and could not enjoy my meals. Every time I ate anything I was distressed. It had boils all over my face and body and I was so sore that I felt uncomfortable all the time.

"My kidneys and bladder bothered me so that I would have to get up four or five times a night. For the whole of these five painful years I had been doctoring to fine relief. Then a friend advised me to try Moorite. I can never be too thankful for what he has done for me. After taking two one-pound packages of Moorite I am entirely free from boils and stomach trouble and do not have to get up nights.

"I feel so grateful for what Moorite has done for me that I willingly give Moorite Products Company full permission to publish this letter, together with my photograph, in the hope that other sufferers may find relief, health and happiness as I have done by the use of Moorite."

"Unconscious for Two Days," says Mrs. R. C. Judy.

Mrs. R. C. Judy, 3214 Naasan Street, Everett, Washington, states: "My case was diagnosed by my doctor as nervous prostration. I was threatened with nervous paralysis. I had kidney trouble. I was just a nervous wreck. I got so bad I was confined to my bed, and suffered terribly. My jaws locked and I was unconscious for two days. I learned of Moorite and immediately began its use with astonishing results. I can honestly say to anyone suffering from nervousness that Moorite is worthy of a thorough trial. I owe my health today to Moorite and want sufferers everywhere to use it and recover as I have done."
