KITCHEN CUPBOARD

Seasonable Food

WHILE oranges are plentiful let us use them freely in our menus. They add vitamins, mineral salts and fruit acids to our diet which are very essential to health.

Orange Charlotte Russe.—Take six round sponge cakes, baked in gem pans and scoop out to make baskets. Peel oranges, remove the white membrane and cut into small pieces, reserving all the juice. To one cupful of diced orange add one-fourth cupful of powdered sugar and allow to stand for thirty minutes. Whip one cupful of heavy cream and moisten the cake baskets with the orange juice, then fill with the fruit. Pipe whipped cream on the fruit and garnish with pieces of orange.

Eggs and Mushrooms.—Dried mushrooms that have been well soaked and chopped may be used for this dish if the fresh ones cannot be obtained. Take four eggs, four pieces of toast, and a cupful of mushrooms. Make a white sauce of two tablespoonfuls each of butter and flour and one-half cupful of milk. Cook until smooth and thick; season with salt and pepper, adding one tablespoonful of caramel. Toast rounds of bread, cover with the sauce to which the mushrooms have been added, then drop an egg on each, place in the oven long enough to cook the egg. Garnish with watercress.

Rice Pudding.—Well cooked rice is one of the most easily digested cereals. Put two tablespoonfuls of rice into a quart of sweet milk with one beaten egg, salt and sugar to taste and a handful of raisins and bake for several hours in a slow oven. Serve with a hard sauce.

Eggs With Rice.—When eggs are scarce and high this makes a good egg extender: Put three tablespoonfuls of washed rice into an omelet pan, stir with a tablespoonful of butter until a light brown, add a little water and steam until the rice is tender. Now add three eggs and one-half cupful of rich milk. Stir and cook until the eggs are set. Season with salt and pepper and serve at once.

Cockney's Absent "H"—In Latin and the languages, such as French, derived from it, the "h" is not pronounced, its omission being due to the slightly different throat formation in different races.

For centuries after the Norman conquest Latin and Norman French were the official tongues of England and the aspirate, therefore, was never sounded. With the gradual rise of English as a national language, the "h" came into fashion, though even today one may occasionally find an old-fashioned clergyman who clings to the ancient tradition and speaks with conservative correctness of an "humble man" in the main, however, the dropping of the "h" was left to the less-educated classes, particularly those in London, which as the court and official center, had of course been more affected by the French non-aspiration than the more truly English north country.
