Although the smartest sports garments are of woolen, it does not follow that the scarf that accompanies it is of woolen, too. The scarf which Marjorie Daw, who wears an adorable sports outfit in full, is of silk in vivid plaid effects.

Miss Daw has selected a costume of tan woolen, with a faint green line running through it, and has matched the green coloring with a decidedly modish hat of green felt, built along the newest lines. While the entire costume is correct and lovely in detail, it is the scarf with its brilliant coloring which adds the dash so necessary to the sports outfit of youth.

### The Scarf Dominates

The Sports Costume Which Is Smart Favors a Scarf of Brilliant Hue

The sports suit which is being featured in the smartest shops for early spring—for long hikes or comfort on the golf links—is made in soft woolens in the neutral shades which are so fashionable this season. Inasmuch as the colors chosen in the fabric are neutral in tone, the costumes which are really chic are adding a touch of vivid coloring in the scarf which makes for warmth as well as smartness about the neck. This spring, the scarf is the thing in the correct sports frock outfit. Frequently these scarves are attached to the collar of the garment and are a permanent bit of coloring, whereas others leave the choice of color harmony to the wearer and the scarf is an additional—but essential—accessory to the sports outfit.

Among musical events of next week will be the third musicale of the Helpline Conservatory, occurring again on Monday evening. An interesting and varied program has been planned for this occasion.

### Lenten Recipes

During Lent housewives usually find the food problem rather difficult. It is especially trying for those who have to prepare luncheons in addition to the other meals of the day.

Although there are many varieties of fish from which to make a choice and eggs can be prepared in a number of different ways, after they have appeared repeatedly on the table they are apt to become tiresome no matter how palatable. Fish or eggs, combined with vegetables and potatoes, make a very wholesome meal. It therefore seems desirable to reserve these for the big meal of the day, which is usually dinner.

The weather has now moderated enough to make one feel less desirous of hot luncheons and salads, especially fruit salads, can be made very tempting and are highly nutritious. They can be made with either canned or fresh fruit, together with cheese, shredded coconut, which has the real flavor and tang of fresh coconut, and dried fruits such as figs, raisins, prunes and dates, which contain "invert" or pre-digested sugar. Iron, lime and roughage—substances highly necessary for us all.

A few salad combinations are offered below for the housewives who have to prepare luncheons for grown-ups. And some recipes are included for the little tots as well. They will delight in these healthful dishes which contain many of the food elements which are essential for the growing girl or boy.

### PRINTED SILK ENSEMBLES THE FASHIONABLE NOTE FOR SPRING

RIGHTY as is the power of the printed word, so is the power of thought. It is equaled by the power of the printed silk in the realm of fashion. Printed silks have swept all before them this season, and the printed silk ensembles is the newest style thought, both here and in Paris. Such ensembles are composed either of plain and printed silk, or of light woolen materials, such as kasha. In either case the dress is composed of the printed silk, with a band of the plain material, and the coat is lined with printed silk. A charming example of this type of costume is shown in the sketch which was prepared for the Paris bureau of the Cheney Style Service. The printed crepe, one of the new Ferronier designs composes the dress in which it is effectively combined with the plain crepe of which the coat is made. The coat is lined with the printed crepe, and each of the buttons are artfully applied to the sleeves and pockets.

The design is worked out in one of the new "Camean" color harmonies shading from chartruse through amber, copper and bronze, which Henri Crone, the fashion authority, tells us will prevail this Spring. The arrangement of the design in the fashionable squared effect is also characteristic of the new Spring printed silks. The dress has three box pleats in front. It is made in a modified "suspender" style, with guimpe of finely pleated crepe. The coat, a regular type in staple line and offers no difficulty to the dressmaker.

Printed silks have swept all before them this season, and the printed silk ensembles is the newest style thought, both here and in Paris. Such ensembles are composed either of plain and printed silk, or of light woolen materials, such as kasha. In either case the dress is composed of the printed silk, with a band of the plain material, and the coat is lined with printed silk. A charming example of this type of costume is shown in the sketch which was prepared for the Paris bureau of the Cheney Style Service. The printed crepe, one of the new Ferronier designs composes the dress in which it is effectively combined with the plain crepe of which the coat is made. The coat is lined with the printed crepe, and each of the buttons are artfully applied to the sleeves and pockets.

The design is worked out in one of the new "Camean" color harmonies shading from chartruse through amber, copper and bronze, which Henri Crone, the fashion authority, tells us will prevail this Spring. The arrangement of the design in the fashionable squared effect is also characteristic of the new Spring printed silks. The dress has three box pleats in front. It is made in a modified "suspender" style, with guimpe of finely pleated crepe. The coat, a regular type in staple line and offers no difficulty to the dressmaker.
