## WE EXPECTED ROSEBURG TO TURN OUT

But the wave of buying enthusiasm that swept this store like a cyclone was bigger than we ever expected. We wish to thank the public for their generous response to our advertising—and if any customer was kept waiting longer than they thought necessary, we ask your pardon, for each of our large force of extra salespeople who were unacquainted with the stock did admirably under the circumstances. We are now organized and can go the pace.

### Various Kinds of Seal

Hair seal is the term applied to animals of the seal family. It is found in extra tropical portions of the sea, along temperate and colder portions of the globe. Only the variety known as Greenland seal is of significance to the fur trade. The two-month-old cub of the Greenland seal has a skin used in the trade, and is known as white seal. According to age this animal passes into grades known as small spot seal, middling spot seal (two years old). Later it becomes spot seal, and when finally full colored, harp seal.

### Old-Time Delicacy

The following is a recipe for old-fashioned hominy, which was recently published in a farm paper: In three quarts of water dissolve one tablespoonful of lye. Strain a quantity of good corn, but in the kettle of lye and boil until the hulls are removed. Pour on the lye, wash and rewash and boil in clean water. Pour off the water several times and supply fresh. This is much the same as the hulled corn of the New England states, which is eaten with sweet milk, but which may be served with gravy.

The Army and Navy Union of the United States was organized on March 21, 1888. On that date a temporary organization was formed and adjourned to meet later in the month, February 19, when a permanent organization was effected and styled as "The Regular Soldiers' Union."
