Westerners know what a tire should be

ONE glimpse of California, or Oregon, or Washington, or any Western state proves that the West is the motor ground of America!

California, for instance, leads New York and every other state in registration of passenger automobiles!

A group of successful Akron tire engineers caught a vision of the opportunities in the West. Its vast resources and possibilities for growth appealed to them.

Digging into the facts, they learned that 30 per cent of the nation's tires are used west of the Mississippi. And only 3 per cent were made there!

They transferred their skill and resources to the West.

Their C-T-C Cord today is regarded as one of the three or four really fine tires in America. Nine western states give it a remarkable sale. Farther East its good name is rapidly spreading.

We shall be glad to give you expert information about your tires—if you need them—put on C-T-C—either balloons, semi-balloons, heavy-duty cords or oversize cords!

Exp-Oregonian Still Interested— A. T. Lawrence was recently the recipient of a letter from a former resident, who is still interested in Oregon and its progress, especially this part of the state, and will likely return to make his home here. Frank Carll, the writer, was born here 53 years ago, moving to another state at the age of 7 years. He states in his letter that he expects to make a trip here from his present home, at Casper, Wyoming, about in June or July, and intends to invest in some good stock ranch property. He is especially interested in the ranch property at one time owned by his father, situated at the head of Cow Creek. He will probably decide to make his home in Roseburg.

Wharton Bros. Fined for Drunkenness— Jimmy Wells, of Los Angeles, who has been visiting at You-calla for a short time, was arrested there yesterday by Deputy Sheriff Daugherty, charged with being intoxicated. He entered a plea of guilty, when arraigned this morning by Justice of the Peace J. J. Brown, and was fined \$25 and given 10 days in jail. Injury to Looking Glass Man— Loren W. Jordan, who is employed by the Coan Lumber company at Looking Glass, received a very serious eye injury yesterday afternoon at about 1:30 o'clock. He was writing a bunk to the logging wagon, when the wire slipped and in some manner penetrated the left eye in the center of the corner striking the iris. He was brought to the office of Dr. A. C. Seely today, and was sent to Mercy Hospital for observation, until it can be determined whether or not the eye-sight can be saved.

AMBASSADOR TO ENGLAND GIVES A FINE SPEECH (Continued from page 1.) "If human society is to function as a whole that good faith must at least be assumed. Peace cannot come from within. "Now we in America, as you know, are not wholly without experience in the kind of problems that have been tormenting Europe. We know the meaning of the wreckage and devastation a great war brings in its train; we know what it means to borrow capital under difficult conditions; we know the meaning of devaluated money, for we saw our paper dollar shrink in value until it took almost three of those dollars to buy one gold dollar. "We know wholly the natural unrest and resentment which these unhappy conditions create and foster. And that knowledge naturally enough has taught us to look upon the aftermath of the war in Europe sympathetically and with an honest desire to help. But— we, too, are a practical people. When we lent our savings to make it possible for the peoples of central Europe to get to work, it was, we knew, that only in this way could Europe as a whole be made to function economically. When we lent our savings to rebuild the markets which had been destroyed, it was because we knew that in no other way could they again be enjoyed. That was necessary in the beginning; that was mere common sense. If we went at the job with a certain moral earnestness let that go to our credit. "It is natural for us to assume that those who have suffered so much from war should seek a settlement which, so far as is humanly possible, should be free from conditions leading directly to war. To that end and in that spirit, we have helped. But we have never forgotten that there was a limit beyond which we could not go. "The full measure of American helpfulness can be obtained only when the American people are assured that the time for destructive methods and policies has passed and that the time for peaceful rebuilding has come. They are asking themselves if that time has in fact arrived. And that question they cannot today answer. The answer must be given to them. It must come from the people in Europe, who alone can make the decision. "If the answer is peace, then you may be sure that America will help to its generous utmost. If— which God forbid—that answer shall continue confused and doubtful—then I fear those hopeful processes which are now in motion must inevitably cease. "We are not as a people interested in making speculative advances. We can undertake to help only those who try to help themselves, and in saying this, we are not thinking specifically of any one nation, but rather of a situation in which all are alike involved. "Now with the working out of that problem in its details, the American people will have no will nor desire to meddle. They recognize in it factors in which they are only indirectly concerned. Their geographical position alone frees them from considerations which other nations must regard. They offer no advice. But I may say to you that they hope and that they fervently pray that a peace may soon be reached—not a peace of mere contrivance and arrangement, based primarily on force, for that would merely be the prelude to another war, but a peace which contains the elements of permanency—a peace which will deserve and receive the moral support of mankind because it is just. "And they believe that such a peace can come in only one way. It must be based upon the assumption of good faith by all who participate in it." Dust guns and dusting powder to destroy aphids and other garden pests are sold at Wharton Bros.

LOVE TRIANGLE ENDS IN DEATH TACOMA, Wash., May 4.—First degree murder charges were being prepared by county officials today against George A. Conger, 34, who early Sunday morning ended a love triangle here by shooting and killing Robert S. Heale, 44, a prominent contractor. Conger is held in the city jail until the information against him is filed directly before the superior court. Conger, a custom inspector came here from Bellingham shortly before midnight Saturday night. He went to the home of his wife, who had obtained an interlocutory decree of divorce, and found that she and the two Conger children were out riding with Heale. When they returned a violent quarrel between the two men ensued. Conger fired four shots, three of which hit Heale. Mrs. Conger and the children saw the killing. Heale was divorced by his wife some time ago and she named Mrs. Conger as co-respondent. Conger, according to statements of himself and his wife, had been endeavoring to affect a reconciliation and to induce his wife not to make her interlocutory divorce decree final. Training for Service KEEPING pace with America's telephone needs means keeping ahead. The work of preparation never ends. There must be complex engineering studies, careful financing plans, and thousands of manufacturing operations before new facilities can be built and made ready for public use. And when they are ready, the workers must also be ready, skilled in the multitude of tasks incident to the operation and maintenance of telephone plant and equipment.

In every important center in the country, new members of the telephone forces are in continuous training, preparing to meet tomorrow's telephone needs. For your telephone system is a living, growing organism. Last year 836,163 telephones were added to its national service. Millions of miles of wire interlace the continent, to interconnect your telephone with nearly 16,000,000 others. Tomorrow there will be more telephones, for the nation demands and expects them.
