AUTO TOURISTS REPORT SUSPICIOUS OCCURRENCE

A report made to the police at Myrtle Creek that two men Sunday night threw a suspicious looking bundle off the bridge across the South Umpqua just north of the city, is being investigated. Tourists told Marshall Griffith at Myrtle Creek, that they were crossing the bridge late at night and saw a car parked on the bridge and two men, they said, were carrying a long object, apparently quite heavy, to the side of the bridge, and when they saw the approaching car they hurriedly dumped the load over the railing into the river. The object was about the size of a body, and apparently wrapped in a rug, the tourists stated. They thought little of the occurrence at the time, but as they went on the thought kept growing upon them that the men might have been disposing of a body, and they turned back from Canyonville and reported the matter. The river is being watched, and as soon as the water clears up sufficiently an effort will be made to raise the object.

ANNUAL CLEAN-UP TO BE HELD MONDAY, TUESDAY, MAY 11-12

The annual city clean-up will be held on the dates of May 11 and 12. It was decided by the city council last night. Following the usual policy the city will provide free drayage for all rubbish and refuse, which is set out by residents before the night of May 12. The dates of the clean-up were placed on Monday and Tuesday in order that residents who are unable to get their refuse in readiness for hauling away during the early part of the week, will have next Saturday and Sunday to gather together the articles which they desire to have hauled off.

All cans, bottles, trash and rubbish, which have accumulated during the year, will be hauled off without cost during the week, providing the rules are observed by residents.

All refuse must be placed in suitable containers, sacks or boxes, loose grass, ashes or shavings will not be handled, and residents should see that the containers used are firm and sufficient to keep the rubbish from becoming loose. It will be of great help if sacks are tied, although this is not required.

All rubbish in containers must be placed at the curb or line on paved streets before the night of May 12. During the balance of the week the city will provide teams and trucks to haul off all rubbish so placed.

Mayor Houck urges the residents of the city to make this clean-up complete and thorough. Many visitors are expected to be in the city the following week to attend the carnival, and it is desired to have the city looking as well as possible.

BURNS CUBOID SUPPORT All This Week
Walking on the Muscles of Your Feet as Nature Intended

There are only two natural ways to remove the cause of Rheumatism, Neuritis, Flat Feet, Bunions, Corns and Calouses, Pain and Aches in your feet, ankles, legs and back. One way is to walk bare-footed in sand; the other is wearing a pair of Burns' Patent Cuboids in your shoes. We build muscle tissue by forcing the blood through the arteries by walking on these muscles.

Children don't inherit bunions and flat feet. They do inherit weak muscles in their feet which develop into bunions and flat feet.

First symptoms: Feet get tired quickly, then followed by pains in feet, ankles, legs and back, which were unknown when people walked on the muscles of their feet.

Come in tomorrow. We want you to know about this, whether you invest or not.
