

NOTICE

To correct an erroneous impression now existing as to disposition of the proceeds from the dance given for my family I wish to state that no payment was made to Mercy Hospital. The amount was expended as stipulated. In fairness to the hospital administration's attitude in not asking for any portion of it, this fact should be known by certain well meaning but misinformed citizens who are increasing by embarrassment.

GORDON V. COOK.

Appropriate gifts for graduation. See our windows. Lloyd Crocker.

New Coats Have Horizon's Color

The "bleu" of the horizon is the color of some of the smartest new coats. The simple lines of this model are too graceful to be mannish, but a top coat with so jaunty an air cannot escape being called boyish.

Flier After New Endurance Mark

Piloting a six-ton modified Douglas torpedo plane, Lieut. Ben H. Wyatt, flight officer of North Island naval air station, San Diego, Calif., will attempt early in May to smash the world's sustained flight record for seaplanes of 14 hours and 53 minutes.

Use Electric Shocks for Regulating Hearts

One of the most remarkable of recent medical inventions is the static wave device. Its purpose is to regulate the beating of the heart, should it be too fast or too slow. The patient sits in an insulated chair connected with a machine which passes an electric current through the body. Outside the machine is a revolving ball, fixed to the end of a metal rod. Every time this ball passes another stationary ball, electricity is discharged from the body, causing the muscles to relax.

If the heart should be beating 74 times a minute, but is six beats fast, says the Detroit News, the revolving ball is timed to go around at 74 revolutions a minute and the heart is thus slowed down to its correct time. In the same way, the heart can be quickened.

This wonderful machine was exhibited at a recent medical exhibition in London. The force of the current is such that a person putting his hand within six inches of the chair receives a powerful shock. The first Swiss watch was made by a blacksmith. In 1680 a distinguished Englishman was traveling through Switzerland when his watch failed him and the nearest approach he could find to a watchmaker was a young blacksmith, Daniel Jean Richard. This young man undertook to repair the watch, which he did successfully. He profited so greatly by this experience in the knowledge he acquired of the design and construction of watches that he became the first watchmaker of the country and the pioneer of a great industry.

When to Find Acorns

Many members of the tree-planting army like the oak. As a group, oaks carry general marks of distinction from other trees. One of these marks is the bearing of acorns, in which the oak has no competition, says the American Tree association of Washington, which for a two-cent stamp will send you tree-planting suggestions. All of the oaks may be grouped as either white or black. To the former group belong the white oak proper and the bur oak, swamp white oak, chestnut oak, overcup oak, the post oak, and live oak, which may be recognized by the rounded lobes of their leaves, with the exception of the post oak and live oak, which have no lobes; and by their light gray or light buff-brown bark, which breaks off into loose, flaky scales. The bur oak is distinguished from its close kinmen by its corklike branches. The trees of this group mature their acorns in a single year, and for this reason acorns of old and new crops are never found on the same tree.

Relic of Feudal Days

The old Norman tower of Holy Trinity church, at Richmond, in Yorkshire, England, dates back to the Eleventh century. It is one of the few, if not the only church where the old custom of ringing the curfew still survives. The tower contains two bells. For centuries the larger bell has been rung every day at six o'clock in the morning and again at curfew hour—eight o'clock in the evening. The smaller bell is rung at eleven o'clock on Shrove Tuesday morning to bid the housewives tend the fires and cook the pancakes well. Another quaint survival at this church is the practice of ringing the "gathering bell" on the occasion of a funeral to give the mourners an hour's notice to prepare. Unless speedy restoration work is undertaken this ancient tower is said to be doomed.—Family Herald.

His Own Death Notice

Mike was working diligently in his potato patch when he saw the postman coming up the road, bringing a black-edged envelope. Mike became uneasy, and showed it.

"Hope it's not bad news," said the postman. "It is that," said Mike, looking at the address. "It's upset I am entirely. My brother Pat's dead. I can tell by his handwriting." From Everybody's Magazine.

Gave Name to Vogue

The name "silhouette" is derived from Etienne de Silhouette, a French minister of finance, who was famous for his measures of economy in 1750. All business was stripped of unnecessary detail. Paintings were reduced to mere outlines. Whence this was in conformance with the spirit of economy or because it was coincidence that black and white outline portraits became popular at this time, the name "silhouette" was applied to them and has clung.

Animal Highly Valued

The water buffalo is valued highly in China, especially in the fields, where it is used for the cultivation of the rice crop. It is said that they are more powerful than the ox and capable of dragging or carrying a heavier load. The female yields a much greater quantity of milk than a cow, and of excellent quality, from which the ghee or semi-fluid butter of India is made. The hide is valued for its strength and durability.

All Set for It

Fair Motorist—Really, I didn't hit you intentionally. I was a Victim—What have you got that bumper on your car for if you aren't aiming to hit someone?—Williams Furlo Cow.

All kinds of oostoves at Powells.

CARNIVAL SHOWS

HERE FOR WEEK

Although the official opening of the Strawberry Carnival, is not to be until Thursday morning, May 21st. The Abner K. Kline Shows, who are furnishing the Amusement features, will open at 7:30 p. m., Monday, May 18th. It can be truthfully said that there in the amusement history of Roseburg, has a carnival of such magnitude and varied attractions been seen in the county seat.

Abner K. Kline, will bring to Roseburg, in his huge circus wagons which are loaded, as a circus does, on a special train composed of 70 foot steel flat cars, especially constructed stock cars, and special arranged private living cars; in all totaling 15 cars; the result of a life time devoted to the catering to the public. The streets starting at Washington and Main, along Washington to Kane and on the vacant lot at Kane and Washington, will be transformed into a veritable fairland, with millions of varied colored lights, massive hand carved gilded and silvered circus wagons, turned into alluring tableaux all beckoning to one to come on and be transformed back to the days of youth. On Main street, across Washington, is to be the entrance; a special built arched construction, with a myriad of lights, artistically decorated and painted in striking colors, that will, as one comes into view of the Joy Zone, formally introduce you to the reception of what is to be seen inside. No attractions are permitted by Mr. Kline, that do not appeal to ladies, gentlemen and children, and all shows conform to the high standard that has permitted the Abner K. Kline Shows to be known as "America's Cleanest Amusements."

To members of Oregon Rose Lodge. We will have a handkerchief shower for our delegate at the Macabee hall Friday night May 15. Each member bring a handkerchief. GENERAL BLACKSMITHING and horseshoeing. All work guaranteed. Plenty room for farmers horses. 622 Winchester St. north of auto camp. E. E. Woodcock, Prop.

Candy is a food if pure and wholesome. Eat our Winstel Chocolates and be convinced. Lloyd Crocker.

SCOUTS PREPARE FOR HONOR COURT

In order to be O. K'd to appear before the Court of Honor Friday evening at the city hall, three Scouts took their reviews from the executive early this morning. Elton Jackson took review on Camping and Athletics at six; Harold Thomas reviewed on Conservation at six-thirty and at seven Tom McDowell reviewed on Bookbinding and Botany. Others who have already been reviewed are Ross Knetts, Daniel Barnett and Stanley Kidder. The best collection of species of flowering plants to be brought in this year, was produced by Stanley Kidder. There are still several Scouts to be reviewed today and tomorrow and a good many subjects to be covered. Adults attending the Court of Honor will meet with a pleasant surprise in noting the amount of information a Scout must have before he is allowed to wear insignia showing that he is proficient in certain subjects. The public is invited to attend. Order your graduation announcements at the News-Review office. New line of samples just received.
