

If you spent 60 days straight at the kitchen stove

—you'd see why it is that nearly eighteen hundred homes within reach of the Copco lines are now using electric ranges.

Two hours a day, every day in the year, is probably a low estimate of a housewife's time in the kitchen. Sixty full days, in all—and they're worth making easier!

Electrical cooking is easier, and cleaner. It puts an end to dirt and ashes. It means less sweeping of floors, less cleaning of walls, cleaner utensils.

Electrical cooking is tastier. Uniform, controllable heat saves the flavor of dainty foods.

Electrical cooking is economical—surprisingly so. The average cost of electricity for cooking is only about twice the cost of the electric lighting current in the same home. (Actual average figures for your own neighborhood will be shown you upon request.)

Don't pass the next display of electric ranges without just dropping in and asking your dealer more about them—and about the convenient payment terms he is offering.

THIRD DAY GALE HITS NEBRASKA; DAMAGE HEAVY

(Continued from page 1.) most intense the last day or two, and the southern states due to have the heaviest wave with them.

Only Kansas, of the middle west commonwealths, was favored in the weather bureau's prognostications.

Showers and thunderstorms, the weather man said, are to be the order in every state from Michigan and Indiana to Montana and Wyoming.

Iowa, whose familiar "tall corn" is not yet tall enough to stand up under such violent rain and windstorms as have hit that state this week, received the forecast with appreciation. It has had more of these disturbances of late than probably any other central state, and just last night a severe wind and rainstorm struck western Iowa.

While the midwest had several deaths due to storms during the past 26 hours, in addition to others previously, the east announced a death toll of 12 in three days, due to heat and prostrations.

Two deaths and two prostrations from the baking heat in Chicago today were reported up to 2 p. m., when the thermometer had steadily mounted to 91 and was still rising.

Storm Aid Heat Toll 64 So Far. CHICAGO, June 4.—At least 64 deaths have been attributed directly or indirectly to the heat wave of the last few days over the middle west and east. Of these, 27 were listed as the toll of heat, as follows:

Two in New York. Seven in New Jersey. Six in the New England States. Twelve in Ohio. Six in Michigan. One in Indiana. Three in Chicago.

In addition, 27 other deaths were traced to storms and bath fatalities, as follows: Eleven storm deaths in Iowa. Five storm deaths in Minnesota. Four storm deaths in Nebraska. One storm death in Montana. Five bathing fatalities in Milwaukee.

One bathing death in Chicago. East Is Sweeter. BALTIMORE, June 4.—All the local public schools were closed at noon for the remainder of the day because of the excessive heat which has continued unbroken for five days, coupled with a depressing humidity. The maximum temperature up to midday was 94 degrees. Two prostrations were reported.

PHILADELPHIA, June 4.—For the fourth successive day Philadelphia sweated in a temperature well in the nineties. At 1 p. m., the thermometer was 92 with the prospects that yesterday's maximum of 96 would be reached.

COLUMBUS, Ohio, June 4.—The weather bureau thermometer in the state house grounds Kiosk registered 105 degrees at 2:30 p. m.

NOTATION ON BONDS FORMS DEFENSE OF JOHN L. ETHRIDGE

(Associated Press Leased Wire.) PORTLAND, Ore., June 4.—The defense in the trial of John L. Etheridge, Portland bond dealer, accused of using the mails to defraud in advertising Seattle local improvement district bonds, was permitted to introduce one of its witnesses today before the government case was finished.

H. L. Boyd, of Seattle, secretary of John H. Price & Company, Seattle bond dealers, who wished to return to Seattle today, was the witness. He identified a circular issued by his house in April, 1922, upon which was printed in black face type:

"The faith of the city of Seattle is pledged to prompt payment of principal and interest of Seattle local improvement bonds through the local improvement revolving fund," writes City Treasurer Ed L. Terry.

The defense sought to prove that Etheridge based the statements contained in his advertisements on the declaration he read in the price circular.

Boyd testified that after this circular had been issued Terry went to John E. Price & Company and had the quotation corrected. On the stand yesterday Terry denied ever having made such a statement.

J. W. McCoy, cashier of First National Bank of Ashland, was a witness for the government today. McCoy's bank purchased \$3,000 worth of the bonds in question. When he was asked by Etheridge's attorney, Martin L. Pipes, if he could read, he replied that he could.

Pipes then asked: "If you can read, didn't you read across the face of these bonds the statement that the city is not liable for the payment of these bonds?"

Cashier McCoy told of getting the circular through the mail, also various letters explaining the issue that were written by Etheridge. He declared no interest had been paid on the bonds since they were purchased by the Ashland Bank.

Miss Anna Schmidt, of Grants Pass, testified to buying nearly \$2,000 worth of these bonds, and that several interest bearing coupons that are past due had not been paid.

FARM NEWS

CONTROL OF BROWN ROT IN PRUNES AND CHERRIES (By B. W. COONEY) Every grower in the county realizes that present weather conditions have been ideal for maximum culture of this fungus disease in their orchard.

This condition points to one of the worst attacks of this disease in several years. There is only one way out and that is to spray.

If any grower has experienced severe losses from this disease within the past three years he would do well to spray now with 24-50 Bordeaux on prunes. Cherries can be sprayed with either 2-4-50 or the new spray known as dry-mix which consists of 8 pounds fine sulphur, 4 pounds hydrated lime and 1 pound lime casenate, commonly known as Kayso. Cherries should be sprayed without delay unless the work has already been done. The spores are present on the fruit and will destroy the fruit even after harvest before the product reaches the consumer.

If any grower wants to take a chance on prunes he should not carry his sporting chances farther than the first week in August, when 4-4-50 Bordeaux should be thoroughly applied.

A spray investment at this time of one dollar may mean a saving of several dollars during harvest. In the realm of insect and fungus disease control ninety-eight percent of our campaign will be on the basis of prevention, not cure. We have no cures to offer.

MARSHALL FUGITIVE AS SIMPLE AS HIS LIFE (Associated Press Leased Wire.) INDIANAPOLIS, Ind., June 4.—Thomas Riley Marshall was laid to rest here today. Such simple obsequies as might be tendered any humble citizen were accorded the man who served the nation as vice-president during the World War and his native state of Indiana as its twenty seventh governor. It was the widow's wish that in death he should be unostentatious just as he was in life. A tribute was paid by Rev. Matthew Smith, Mr. Marshall's math friend and pastor. Scottish Rite services for a departed brother were read and then the body was taken to Crown Hill cemetery where it will remain in a receiving vault until Mrs. Marshall decides upon its final resting place.

SHRINERS UNLOOSE BARRAGE OF WIT ON POOR LOS ANGELES

(Associated Press Leased Wire.) LOS ANGELES, June 4.—Barraging repetition of yesterday's "unusual weather" the colorful paucity of the 1925 Shrine convention will come to a climax tonight in two spectacular parades, one including all the nobles with all their bands, patrols and chanters representing half a hundred temples, and the other dazzling with the massed Kleig lights of Hollywood and scintillating with the celebrities of the screen "in person."

The official shrine parade was to have been held last night but a drizzling rain that blanketed the city all day caused its postponement. The rain also brought on a tidal wave of "kidding" from the wits of the various delegations. An artificial blizzard manufactured with the feathery insides of several hundred pillows from the upper floors of a downtown hotel furnished the piece de resistance of the day-long jollification.

Election of Dana S. Williams of Lewiston, Maine, as Imperial outer guard and the selection of Philadelphia as the scene of the 1926 convention were important features of the day's business sessions. In keeping with Shrine custom, the retiring imperial potentate, James Chandler of Kansas City, was succeeded in the uncontested elections by his deputy James C. Hubber of Denver, other imperial officers moving up in line accordingly.

The imperial council passed a ruling to the effect that a life membership fee should not be less than ten times the annual dues. The annual dues of the order were raised from \$5 to \$10 and the annual fee to maintain crippled children's hospitals was fixed at \$2.
