

Wellman left a legacy to pipe smokers

Back about 1870, James N. Wellman developed a secret tobacco process which won widespread favor. But nobody else ever knew "Wellman's Method" until we acquired it and went

back to it in making Granger Rough Cut. It's an "old-fashioned" method, yes, but slow as it is, and costly, too—we have found no other process that brings tobacco to the same full, rich "rounded-out" mellowness.

COUNTY MARKET ROAD SYSTEM IS BEING MAPPED

Floyd Frear Designated as County Engineer Under Terms of New Law.

FUNDS ALLOTTED

Court Specifies Roads to Be Linked Up in Permanent System and Submits Plans to State.

The county court last evening adopted an order changing the title given Floyd Frear from County Roadmaster to County Engineer. This change was made in order to simplify the operation of the new state market road law, which is now in effect and which will be followed in the future by the county court.

The new law provides for a market road system, similar in its administration and operation to the state highway system. The market roads are placed under the control of the state, and are built according to state specifications and requirements.

The new law provides that the county shall designate certain roads, which shall be included in the market road system. These must be connecting roads supplying agricultural communities, and the county is stopped from naming dead end roads as market roads.

Under this plan the county or state is required to appoint a qualified engineer to take charge of the work in that particular county, this position of county engineer being conferred upon the county roadmaster, county surveyor or some special appointee of the state or county.

He is required to prepare a map showing the roads the market roads designated, and these are then presented to the state, highway commission for approval or amendment. If one county is working on a certain road, which links up with another road in an adjoining county, the state is empowered to require the neighboring county to designate the connecting road as a market road and make the needed improvements.

Such a case is now before this county. Work is progressing on the Tiller-Trail section of the Crater Lake cut-off. Trail is in Jackson county, and between that place and the Douglas county line there is a section over which Douglas county has no control. If Jackson county does not make the necessary improvement to open this road, after Douglas county has linked up its section as a market road project, the state can designate it as a market road and require that the market road funds be expended there.

In compliance with the state law Douglas county has mapped out the roads which it desires to include in a market road system. The first is the Canyonville-Trail road, forming the Crater Lake cut-off. This road is of great importance, and a large sum of money is being spent this year by the county and forest service in cooperation. The forest service has announced that it has another \$1,000 appropriation available for the upper section, if the county will match the sum, and the county court is arranging to set aside a sufficient amount to match the forest service on this improvement. \$8,000 has already been allotted to that section.

The Drain-Reedsport section of the Umpqua highway, is the second project on the list. No money has yet been allotted to that section as the county is waiting to determine the amount the government will allot, as the county will probably be required to match the amount.

On the Loon Lake road the county is spending \$12,500. This road links up with the road to Marshfield through by way of Alleghany, and will eventually be an important connecting link between Loon Lake, Coos Bay and Reedsport, and will serve a wonderfully rich agricultural community.

An appropriation of \$15,000 is being made on the Roseburg-North Umpqua road. This is to be expended on improvements between Roseburg and Dixonville, and Dixonville and Glendale.

The sum of \$2,000 goes to the Roseburg-Reston loop road, which has been set aside as the 5th market road project.

The Edenbow-Millwood road is given an appropriation of \$9,000, to be used in connection with a special tax for the paving of another section in Edenbow.

The other market roads included in the system are Yoncalla-Elkhorn, via Milltown Hill; Yoncalla-Elkhorn, via Scotts Valley; Sutherland-Umpqua; Oakland-Elkton, via Dodge Canyon, and Kesterson Hill; Kellogg-Elkton, via Beckley's; Glendale-Pacific highway; Roseburg-Melrose; Umpqua Park road and the Round Prairie Bridge.

The last two named projects, the Umpqua Park road and the Round Prairie Bridge, are to be dropped after their completion this year. The Umpqua Park road is to receive \$2,000 and the Round Prairie bridge \$3,000. An appropriation of \$15,000 is made for the removal of the Winchester steel highway bridge to the Kellogg-Elkton road, the cost being charged against that project.

On the other projects designated as parts of the market road system within the county no appropriations are being made at this time. These,

however, are included in the system, so that future improvement work under the market road act may be done upon them.

The county court expects in the future to apply market road funds as far as possible along the lines adopted in the past, making appropriations to the districts which show a willingness to help themselves by voting special taxes. The market money, of course, will be limited to the road projects designated as a part of the market road system, and a sufficient sum must be reserved for maintenance, the law giving the county authority to spend up to \$200 per mile for maintenance on market roads.

This market road system has the purpose of assuring future development upon a permanent basis. By designating certain roads, and limiting the expenditure of market road money upon these thoroughfares only, the state has a program which will develop the leading highway of each county along definite lines. All market roads must comply with certain state standards. The state requires certain widths of roadbed, certain grades and curves, certain types of bridges, and definitely prescribes the loads which bridges must be built to carry. All plans for market road improvement must be approved by the state, and all bridge plans must be submitted to state engineers. This insures roads of uniform kind, and improvements of

a permanent nature. By expenditures made over a period of years, these systems can be developed into first class market roads, which will be of much importance to the respective counties and the state in general.

GERMANY FAILS TO OBSERVE 13 PEACE PLEDGES

(Continued from page 1.)

and adequately handled during the present conference at Geneva. The conference voted in principle to accept the American proposal for a special protocol against poison gas in war to be adopted at Geneva. If this is finally adopted, it will make the suggested Washington conference unnecessary.

EAST ENTERS ON FIFTH DAY OF HEAT WAVE

(Continued from Page 1)

Pittsburgh and 96 in Baltimore.

ST. LOUIS, June 5.—The intense heat prevailing throughout the section, indirectly caused the death of one person and prostrated three others here yesterday and today.

DETROIT, June 5.—Two more deaths from heat in Michigan were reported today, bringing to nine the number of fatalities in the state. Seven more prostrations also were reported, several of the victims, aged persons being reported in serious condition.

CHICAGO, June 5.—After nearly a week of continued torrid weather, the midwest today gave up hope of an immediate drop in temperature. Having yesterday withdrawn his prediction of showers throughout this territory as far west as the Rockies, the weather man again posted the familiar summer forecast, "continued warm", for virtually all central states.

He said that possibly there would be local showers in Iowa, Minnesota, Nebraska and Wisconsin, but indicated that they would not bring any appreciable change in temperature. The heat fatality toll jumped every hour. Chicago led the country in the number of deaths attributed to the sun's rays. Since Wednesday noon 12 persons have died here.

In sharp contrast, the far west was much cooler. A four inch snowfall in northern Montana, although causing damage to trees and other foliage in Great Falls before it melted, improved crop prospects generally. Boise, Idaho, with an altitude of less than 3,000 feet, had a killing frost yesterday and a minimum temperature of 36 degrees. Although vegetables suffered, no damage was reported to fruit, the leading product of that area.

PITTSBURG, Pa., June 5.—The heat wave which was continued unabated early today with no prospect of relief was held directly accountable for 11 deaths and an uncounted number of prostrations in this district. Seven deaths have been reported

LUNATIC KILLS ANOTHER MAN AND IS SLAIN IN TURN

(Associated Press Local Wire.)

SACRAMENTO, Cal., June 5.—Suddenly running amok, an unidentified man shortly before noon today shot and killed another man beloved to be Richard Burnett, of Oakland, formerly of Vancouver, B. C. in the Crocker Art Gallery in this city and was himself shot and killed by a transfer man whose name was said to be Brainard.

Early details indicated that the unidentified man opened fire within the art gallery and shot down Burnett. Then, from all accounts, he left the interior of the building and sat on the steps, a smoking pistol in his hand.

Brainard, from across the street had heard the shooting within the art gallery and when the apparently insane assailant stopped to rest on the steps of the building Brainard opened fire.

The bodies of the maniac and Burnett were taken to the morgue and efforts were made to learn just what had occurred.

MOOSE MEET TONIGHT

Regular meeting of Roseburg Lodge No. 1937 Loyal Order of Moose tonight at 8:00. Maccahee hall.

WILLAMETTE YIELDS BODY OF MISSING PORTLANDER

(Associated Press Local Wire.) PORTLAND, Ore., June 5.—The body of Ralph Waldo Elden, former owner of an advertising and loan office in Portland, was found, this afternoon in the Willamette river at the base of a cliff at Elk Rock by the Portland harbor patrol. Elden has disappeared Wednesday. His automobile and hat and coat were found near Elkrock last night. Relatives of Elden said he had been brooding over financial reverses.

If you want a superior axe get a White hand made one at Wharton Bros.

WOULD BE ABDUCTORS OF MARY PICKFORD INDICTED

(Associated Press Local Wire.) LOS ANGELES, June 5.—Three men were indicted by the county grand jury today on a conspiracy charge in connection with an alleged plot to kidnap Mary Pickford moving picture actress, and hold her for \$200,000 ransom. The men, Charles F. Stevens, Adrian J. Wood and Claude E. Holcomb, were jailed in the absence of \$50,000 bail each.

TWO WOMEN HURT IN RUSH TO VIEW SHRINE PAGEANT

(Associated Press Local Wire.)

LOS ANGELES, June 5.—Two women were seriously injured and forty five other persons were treated for minor injuries or brought out of fainting spells as a result of the milling about and rushing of tens of thousands of spectators, eager for places of vantage along the line of the Shrine parade here last night. It was revealed today in a checkup of cases brought to the emergency hospital, maintained at the Los Angeles Coliseum, goal of the pageants.

One of the seriously injured women was kicked in the stomach by a horse; the other suffered a fracture of the hip during the mad rush for one of the entrances of the coliseum after the big bowl had been filled to capacity and gatesmen were turning people away.

OLD BUILDING REMOVED

The old addition to the Roseburg Apartment house is being torn down to make room for a modern concrete structure. This improvement which is being made by Henrie Andrie, is one which he has been planning for some time. Besides replacing an old dilapidated and unsafe structure, the new building will eliminate a great fire hazard.
