MUCH TO DO IN FIXING FOR CAMP

(Continued from page 5.)

from any other cause. Trips that were intended to bring rest and recreation, brought hard work and discontent—all due to the lack of proper preparation.

The itinerary of a vacation tour should be planned weeks before the trip is begun. Definite plans should be formulated. How many problems must be solved? How many are going on the trip? What points of interest are to be seen? How many miles can be comfortably covered in a day's drive? What accommodations are to be had along the way? Where shall we camp each night? These are but a few of the problems that will need solutions before you start.

With a road map, such as may be obtained through any good automobile club, many of your touring problems may be worked out over your library table. This map, together with a list of auto camps, will help you in planning your stops each night.

The average amateur auto camper takes too much equipment, and the old-timer often takes too little. A happy medium must be struck between these two extremes. The man who gets the greatest amount of enjoyment out of his trip is the man who takes the least amount of equipment yet has everything that will be needed. The less you have to handle and unpack, the better you will get along.

Compactness and lightness are the true secrets of motor camping trips. Go light, carrying only the equipment that will be needed, and you will eliminate worry, will return hardened and fit, and can truthfully say that you have had a real vacation in every sense of the word.

Rainbow Gardens dance palace—open air pavilion—opens summer dancing season Saturday night.

FOREIGNERS FLEE FROM RIOT CENTER

(Continued from page 1.)

authorities could not guarantee life and property.

LONDON, June 24.—Colonial Secretary Amery told the House of Commons today that the British government has the Hong-Kong situation well in hand and is able to preserve law and order there.

Foreign Secretary Chamberlain was asked whether he had evidence that disturbances in China have been fostered or aggravated by agents of another government. He replied affirmatively, but did not specify the government to which he referred.

LONDON, June 24.—Dispatches from Hong Kong, received here today say Canton refugees who have reached Hong Kong declare a Russian officer was in command of the Chinese who fired upon the Shamen foreign settlement at Canton yesterday when J. Pasquier, a French merchant, was killed and several foreigners were wounded.

CANTON, June 24.—Several Europeans were killed and many others wounded today when fighting broke out between Chinese agitators and residents of Shamen, the foreign concession here. Women and children are fleeing on the U. S. S. Asheville, preparing to leave for Hong Kong tonight. The situation is extremely serious.

The outbreak today came after demonstrators fired in the direction of Shamen yesterday killing a non-combatant Frenchman, Pasquier, and injuring Commissioner of Customs Edwards and V. G. Murrell, a chemist. The latter was shot in the arm. Edwards was wounded in the knee.

It is impossible to foresee the outcome of the present trouble, which, apparently will last for some time.

NEW YORK, June 24.—Overnight dispatches from Canton, now hotbed of Chinese anti-foreign agitators, picture a serious situation. Apparently alarmed by yesterday's outbreak in which excited Chinese exchanged shots with the guards around the foreign settlement on Shamen Island, the authorities are sending reinforcements of foreign civilians from the trouble zone. A British steamer carrying 150 women and children arrived at Hong Kong from Shamen this morning. The American gunboat Helena is proceeding to Canton from Hong Kong.

The situation at Amoy, north of Hong Kong, is also reported to be increasingly grave due to the persistent anti-foreign propaganda in circulation there. Despite assurances from the Chinese authorities that the unruly elements can be kept in hand, the American, British and Japanese consuls have requested their governments to send warships and meanwhile a steamer is being held ready to take off the foreign women and children should trouble arise.

Disturbances are also feared at Peking on the occasion of the Dragon festival tomorrow and all of the legations are reported to be taking precautions to meet any violent movement.

Detailed accounts of yesterday's shooting at Canton show that the anti-foreign demonstration was comparatively peaceful until one section of the parading Chinese began firing from the band toward Shamen. A French merchant was killed and a British marine and three civilians wounded, including the white commissioner of customs.

British and French marines, immediately returned the fire of the Chinese, but were checked by the senior naval officer in command. The Chinese firing broke out opposite the British section of Shamen, giving further evidence that the anti-foreign movement is directed particularly against the British and Japanese. Report of assaults on Japanese subjects came from points in China yesterday.

The text of the appeal sent to Pope Pius by professors of the National University of Peking, given out in Rome last night, repeats the charges made in the Chinese vernacular press, that the foreigners have "perpetrated murders against unarmed Chinese citizens in the international establishments at Shanghai and Hong Kong and elsewhere."

The pope is asked to extend his sympathy and support to the Chinese cause. He has entrusted the apostolic delegate in Peking with the task of answering the appeal, deploring the bloodshed and wishing for the re-establishment of order and a spirit of understanding.

HONG KONG, June 24.—Carrying about 150 women and children, refugees from Canton, the steamer Honam arrived here this afternoon. At Canton the crew of Chinese stokers deserted and were replaced by men from the U. S. S. Asheville, a gunboat stationed off Shamen, the foreign settlement at Canton.

The Moorhen, a British sunboat conveyed the Honam as far as Whampoa. The refugees include a score of Americans, mostly missionaries. The government has requisitioned river steamers to accommodate refugees from Canton. The arrivals today included A. H. F. Edwards, who was shot in the right knee yesterday when Chinese demonstrators fired in the direction of the foreign settlement, V. G. Murrell who was shot in the right shoulder, and Charles Lamert who was injured in the left foot.

The refugees state that yesterday's demonstration at Canton was intended as a show of military preparation as Chinese in the procession were uniformed and carried rifles and machine guns.

LONDON, June 24.—The Daily Telegraph says today it has full corroboration of its report of yesterday that "ominous and serious disorders have broken out in Manchuria and are spreading."

It declares mutinies have occurred on a fairly large scale among the troops of Chang-Tao-Lin, the Manchurian dictator, who now is absent from Mukden, the capital. Bolshevik agents are credited with taking advantage of Chang's absence to provoke risings against him and the foreign colonies. The sudden departure of Chang Hsueh-lan, son of Chang Tso-lin, from Shanghai was due to the situation in Manchuria, the paper says, his father having sent him an urgent message to return immediately to deal with the trouble.

PEKING, June 24.—The Chinese government in a note to the foreign diplomatic corps today argued for the revision of old treaties giving foreigners special privileges in China.

In a second note also sent to the diplomatic corps today the Chinese foreign office reiterated its insistence upon the "thirteen points" advanced by the Chinese delegation at the recent abortive conference at Shanghai and expressed the hope that the new conference to discuss general Chinese questions, proposed by the foreign diplomats, may be held speedily.

The note insists upon the release of Chinese arrested at Shanghai during the recent strike troubles and suspension of sentences imposed upon them. It asks for "an apology" and for the "redemption" of the mixed court at Shanghai. It calls for the reinstatement of strikers, the improvement of the working conditions of Chinese and for Chinese participation in the Municipal council at Shanghai, as well as for "liberty of speech and assembly" and for the dismissal of the secretary of the Shanghai municipal council, W. S. Rowe.

The note declares these points are necessary for the settlement of the Shanghai incident and as a further basis for permanent peace says it is absolutely necessary to revise the "unequal treaties" by which foreigners enjoy special privileges in China. A separate note on the latter subject was sent by the Chinese government to the diplomatic corps today.

PLEA FOR LIFE OF SHEPHERD IS MADE TO JURY

(Continued from Page 1)

with them, and he did it," shouted Gorman.

The prosecutor had been talking an hour when a recess interrupted him. It was indicated he was near the end of his address to the jury. William Scott Stewart, attorney for the defendant, was ready to open for his client.

The estate of Mrs. Elizabeth Kay Coshaw, deceased, was admitted to probate today. The petition requests the appointment of E. B. Stewart, administrator and J. E. McClintock, Leon McClintock and B. W. Strong as appraisers. The estate is estimated at \$20,000. Attorney Ray B. Compton is the legal representative.

OH BOY, bought a bargain and there are many more cars advertised daily in the classified columns. Read 'em yourself.

DAILY WEATHER REPORT

U. S. Weather Bureau, local office, Roseburg, Oregon, 24 hours ending 5 a. m.
Precipitation in inches and hundredths:

FARM REMINDERS.

Watch the poultry litter at this time of the year and change it as often as it becomes damp and heavy, advises the experiment station. In some localities it is best to change it every ten days. Damp litter causes the house to be damp, and is the source of much disease.

The best treatment for poultry diseases in Oregon is prevention. Provide comfortable, sanitary surroundings, keep the house free from drafts, give the birds clean, wholesome feed, and you have reduced the disease problem to a minimum, the experiment station has found.

Range and exercise for the breeding stock in Oregon are

especially important factors in the production of eggs of high fertility and hatchability, reports the experiment station.

Red Spiders, which are likely to strike at almost any plant in Oregon from low-growing annuals to tall trees, develop most rapidly and become most harmful in dry weather. The best protection so far reported by the experiment station is spraying with lime sulfur. Most sulfur containing insecticides are effective if applied thoroughly, and some gardeners use superfine dusting sulfur.

Growers of newly planted orchards may save themselves much later trouble from the flat head borers by shading the trunk of the newly set tree, since the female weevils in sunshine and seeks the

direct light for depositing her eggs. Boards set up on the south side of the tree so as to lean against it offer good and adequate shade, the experiment station reports. If the boards are not handy, a very good substitute as recommended by the station is newspaper wrapped about the trunk to shade the tree.

Alfalfa which yields as much as six tons or more per season, uses nearly 500 pounds of limestone per season. That is, this legume uses nearly as much lime as nitrogen. The nitrogen comes from the air and when there is no inoculation to make this possible, the crop fails.
