ROSEBURG, OREGON, FRIDAY, JUNE 26, 1925.

**THE NATIONAL BIRTHDAY**

In the old days, the typical Fourth of July address was a kind of spread eagle glorification. The orators bragged about our wonderful country. We listened to statistics showing our marvellous growth, amazing power, achievements, etc. It is legitimate to dwell on this thought to a certain extent, but it is not one that specially inspires action. It has tended to national self satisfaction, and egotistic complacency, and led us to look with contempt on nations that did not have all these blessings. Thus we took credit to ourselves for the amazing things that the patriot forefathers had achieved, when perhaps we ourselves had done little or nothing to assume these results for the future, and perhaps the country would slip back if all showed no more virtue and resolution than many of us do. The time for such self glorification has passed, and we need to hear more today about the call to duty. The national birthday comes to each one of us and asks searching questions. It asks the citizen what he or she is doing to keep up the country to its old high standards and to help it on to still better ones? If we are failing to devote many hours to civic duties and study of civic questions, we have nothing to brag of. It asks the worker what he is doing in his job to make this a better country, in which there shall be comfort for all, because all work is done well. If we are working just for the pay envelope and not for the result, we have no reason for discharging fireworks. And so it goes for all of us. July Fourth should not today be so much a day for celebrating, as a day for questioning as to whether we are worthy of the ancestors who did these grand things.

**HAJDU NOISEMEN HUNT WHALES IN DISTANT ANTARCTIC WATERS.**

OSLO, June 25.—The whaling season in the Antarctic waters around South Shetland and South Georgia has been very successful, as far as the Norwegians are concerned.

The whalers secured 146,000 barrels of whale oil from South Georgia and 166,880 barrels from South Shetland, this being an increase in the amount obtained last year of 50,000 barrels. At South Orkney 54,000 barrels were ob-

tained, while off the Mexican coast Norwegian whalers got 22,000 barrels.

The total for the Norwegian companies this year has been 410,000 barrels, while other nations have produced 257,000 barrels. The Norwegian whaling fleet consists of first class vessels equipped with radio, and newly built tankers with cookeries. It sails practically over the whole of the globe, and it has about 4,000 Norse sailors engaged in the trade as whalers.

**SOME RELIEF FROM SOL'S RAYS OVER STATE REPORTED**

(Continued from page 1.)

day. Warm weather prevailed again today, the maximum temperature during the forenoon being 92. Farmers say but little damage has thus far been done to the growing wheat, but they would welcome cooler weather as the present situation is critical.

BEND, Ore., June 26.—The temperature reached 93 early yesterday afternoon, according to the government weather observer. This was within one degree of the maximum ever recorded in Bend. During the night the lowest temperature recorded was 61, a higher minimum than any time before this season.

**P. T. A. WORKER TO HOLD MEETING HERE ON JUNE 30**

At the request of the county council of the Parent-Teacher association, Miss Frances Hayes, national field secretary is coming to Roseburg on Tuesday, June 29, to give a one-day course of instruction to all who are interested, whether members of any association or not. She is an expert in this line of work and it is hoped that there will be a large attendance. She is accompanied by Mrs. George J. Perkins, state president of the P. T. A., who is already well known in Roseburg. The meeting will be held at the M. E. church at 9:30 a. m.

**THUNDERSTORM IN EAST DOES DAMAGE TO FOUR BUILDINGS**

NEW YORK, June 26.—Greater New York was recovering today from the effects of a severe thunderstorm.

A bolt knocked an arm from the cross atop one of the two majestic spires of St. Patrick's cathedral, while 400 persons were inside. Fragments of the 200 pound marble arm showered the street, but no one was injured.

A five-ton granite ball was knocked from a tower of the American Museum of Natural History by another bolt. The ball tore a hole in the roof, shattered windows and ripped up 25 feet of stone wall along a driveway.

Lightning hit the north Hudson Hospital and Emmanuel Evangelical Church in Union City, N. J. Fifty patients were thrown into a panic and a hole four feet long was torn in the tower of the church.

Hay fever, asthma, catarrh. Relief guaranteed within 24 hours or money refunded. Lloyd Crocker.

**NORTHERN PACIFIC ANNOUNCES PLANS FOR NEW RAIL LINE**

(Associated Press Local Wire.) MINNEAPOLIS, June 26.—Construction of a \$3,000,000 forty mile line of railroad in the Clear Water timber district of Idaho to serve the largest white pine lumber mill in the Pacific Northwest, was announced today by Charles Donnelly, president of the Northern Pacific Railway.

The line will run northeast from Orofino, Idaho, and will be constructed by the Northern Pacific and Union Pacific Railroads to serve the Clear Water Timber Company, a Weyerhaeuser interest which plans to erect a huge lumber mill at Lewiston, Idaho. Work on the new line will start this fall, Mr. Donnelly said. He also announced that the Union Pacific and his line may construct another line from Bend to Klamath Falls, Oregon, another heavily timbered district.

**OXFORD UNIVERSITY GETS A TREASURY SET OF ASTROLABES.**

(Associated Press Local Wire.) OXFORD, England, June 25.—The 63 astrolabes given to the university by Dr. Lewis Evans, brother of Sir Arthur Evans, the archaeologist, when taken with these now in the possession of the college, form the most complete and representative series of this rare and ingenious instrument.

The astrolabe appears to have been invented in the second century before Christ by Hipparchus, who measured the exact length of the year, the distance to the fixed stars, the time of revolution and eclipse of the moon, and invented trigonometry and the system of locating points on the map by latitude and longitude. It is a flat dial with a sight across it and a number of hands which

can be set against the numerical tables around the circumference. Its use is to measure the altitude of the sun and the stars.

The astrolabe is one of the few scientific instruments saved from the wreckage of Greek civilization. The Arabs, who in their great day were among the most enthusiastic scientists known until the present scientific developments in America and Germany, brought the instrument to a high standard of perfection and used it generally for navigation.

McClaren Autocrat Cord. The best fire money can buy today. Make your dollar get you more miles. Sold and serviced by Gilham's Highway Garage, 332 North Jackson Street.

**ARRESTS TO FOLLOW INCENDIARY BLAZE**

(Associated Press Local Wire.) KLAMATH FALLS, Ore., June 26.—The first forest fire of the year in Klamath county was of incendiary origin, according to a report made this morning by the Klamath Forest Protective Association. Arrests are expected to be made within the next two days, officials said. The fire was started yesterday in a six acre tract of green timber in the Big district, but was placed under control before it had opportunity to spread into larger tracts.

For full line camp equipment call Ziegler-Pee Hdw. Co.

**JIMMY BARNES WINS OPEN GOLF TOURNEY**

(Associated Press Local Wire.) PRESTWICK, Scotland, June 26.—Jimmy Barnes, American professional, won the British open golf championship today with 309 for the 72 holes. Macdonald Smith, who led Barnes by five points at the start of today's play, broke badly in the final round and failed to make the 68 necessary to win.

**BAND CONCERT LAST NIGHT ATTENDED BY A LARGE CROWD**

The Douglas County Concert Band last night played its first open air concert for the season. Hereafter concerts will be played every Thursday night, starting at 8 o'clock each night. A large crowd attended the program last night, the grounds being packed, while every available inch of parking space was taken. One of the pleasing numbers of the evening was the soprano solo "Il Dacio" by Mrs. Fred L. Straug with her accompaniment. Under the direction of Mr. Dale Strange, the band is playing some exceptionally fine music and the music lovers of the city were greatly pleased with last night's concert.

The band is having fifty park benches made to accommodate persons attending, but will be ready within the next two or three weeks, it is hoped.

Roseburg Rod and Gun Club. Regular meeting Friday night, June 26, at 7:30 o'clock at A T Lawrence's real estate office.

**BUNDLE DAY FOR NEAR EAST RELIEF BE HELD JUNE 30**

A "Bundle Day" for the benefit of Near East Relief is to be held here on June 30th. Old clothing, overcoats, blankets, anything that has any power to keep out the cold is wanted.

Winters in the Near East are every bit as severe as in the Northern United States, relief workers report. The thermometer, often touches zero and sometimes registers as much as fifteen and twenty degrees below. When this happens the suffering of the half clad refugees becomes intense. Shivering and chattering in the bleak winds and driving snowstorms, the miserable people huddle together in forlorn groups and try to keep each other warm. Many perish every winter from no other cause than cold.

The only hope these people have lies in the Near East Relief. At the first sign of cold weather the American relief workers set up distributing stations at which warm coats and blankets are given out. Only there is never enough to go around and never enough for everybody.

"I could have cried with shame and mortification," said a returned relief worker, "when I saw a little girl not more than six years old, clad in a few strips of burlap, nothing else, bravely fighting her way through the deep snow towards a relief station. I thought of all the warm garments lying discarded and forgotten in the closets and attics of America and somehow it all seemed so wrong and wasteful." Mrs. W. A. Smiek is Douglas County Chairman.

For concrete work call Taylor, 113 No. Flint St. Tel. 225-R.

SKAGGS

Money saving **SKAGGS** Cash stores

UNITED STORES

There is a saying that "nothing succeeds like success," and "success more often than otherwise comes from doing some common thing uncommonly well." SKAGGS UNITED STORES exemplify both truths.

Our organization has progressed to the point where, under our economic scheme of buying and distribution, it is our privilege to sell high quality merchandise at lower than prevailing prices, and in so doing offer the consuming public a service, definite, tangible and continuous—THE SERVICE OF SAVING.

It is our pleasure, also, to instill into the minds and character of our personnel, and establish and maintain in our stores, that air of cheerful promptness and desire to please, so commonly lacking in ordinary stores.

Just about the last word in pipe comfort

Here's a tobacco that's made for pipes—and pipes only! First of all it's fine, old Burley, meloed by Wellman's famous old 1870 method; and on top of that it's specially cut for pipes—cut coarser (rough cut) so that it burns slower and smokes sweeter and cooler. Pack your pipe with Granger and see if you don't agree that "for pipes it's mighty near perfect."

Packed in tea-foil, instead of tins—hence **10¢**
