## MAC MILLAN TO DELVE INTO EARLY NORTHERN HISTORY

CHICAGO, July 10.—(A. P.)—When Commander Donald B. MacMillan left on his Arctic expedition he offered to wager that he again would not see the whole coast of Labrador. Only once in 17 years has MacMillan been able to view its coast because of the wall-like fog. On that one occasion he saw it to be a line of enormous, unfriendly rocks.

Battle Harbor, among the last of the jumping off places, and where is located a radio station with which MacMillan hoped to do some experimenting, is rock bound and has what is called a "ticklish" entrance. It is typical of the whole coast. There is one store, a mission, a handful of native fishermen and sailors and the radio station.

From thence to Etah, Greenland, where MacMillan expects to base his ships, the voyage is one of sameness in view and routine but one fraught with danger and demanding great skill in maneuvering. If Etah is reached somewhere about August 1, MacMillan will establish an advance airplane base and radio station off Cape Thomas Hubbard, eleven degrees from the North Pole, and from the two points conduct his explorations, photo and map work.

Beside the work to be done in the Polar territory, MacMillan hopes to shed more light on early North American history. The first chapter in an American history generally says that the Norsemen were the first to visit this continent. Back of Disko in Greenland are the ruins of 120 farm houses and 21 churches, believed to be a community established in one of the expeditions during the time of Eric the Red. On the Island of Turnevik off the coast of Labrador there are other ruins which may once have been the homes of the same race. MacMillan will compare his findings to determine if they were of the same origin and were the people which the Eskimos have told him were exterminated in battles with them centuries ago.

Beyond 66 degrees North Latitude, once have been the homes of the same race. MacMillan will compare his findings to determine if they were of the same origin and were the people which the Eskimos have told him were exterminated in battles with them centuries ago.

## FIRE DEPARTMENT WILL COLLECT OLD PAPER ON JULY 22

As a means of ridding the city of a fire menace, the Roseburg fire department will hold a paper clean-up day on July 22. On that date the fire department will purchase all of the old paper delivered at a specified place, paying the sum of 25 cents per 100 pounds.

This plan has been found very successful by many fire departments in removing a source of fire danger, and although the local fire department will receive nothing from the sale of the paper, it will accomplish the task, it is hoped, of cleaning up many places where old papers form a fire hazard. Many places are to be found in the city, where quantities of old papers are stored. Several fires have been caused by papers piled near a chimney. It is such places that the fire department hopes to clean up by their campaign. They have made arrangements to sell all ball paper, such as old magazines, newspapers, scrap paper, and all other forms of waste paper, at 25 cents per 100 pounds, and they will pay the same price for everything accepted, the department taking care of the handling of all the bales that are turned in.

Arrangements are now being made to secure a suitable place, centrally located, to handle the paper, and as soon as that is secured, more definite information regarding the collection will be announced by the department.

Hay fever, asthma, catarrh. Relief guaranteed within 24 hours or money refunded. Lloyd Crocker.

## FRANCE AND SPAIN TO CO-ORDINATE IN RIFFIAN TROUBLES

PARIS, July 11.—The French and Spanish governments have arranged to co-ordinate their military operations against Abd-el-Krim's Riffian tribesmen. The French war ministry has decided to transfer three divisions of the colonial troops, now in the Ruhr and France to Morocco. General Stanislaus-Naulin will have about 100,000 men at his disposal, when he takes charge July 18.

PEZ, French Morocco, July 11.—The situation along the front, where the French forces are holding the Riffian invaders in check, appears calm for a moment. Abd-el-Krim's principal activities are of a political nature. These aim at weakening or destroying the loyalty of tribes friendly to the French. The natives on the western French wing are showing signs of succumbing to this intensified propaganda.

For concrete work call Taylor, 113 No. Flint St., Tel. 25-R.

## CHRISTIANS WIN FROM COMBINATION TEAM, SCORE 10-2

The Christian team of the Twilight League last night took a one-sided baseball game from the Baptist-DeMolay team by a score of 10 to 2. The Christians were hitting the ball hard, and Mathews, the twirler for the combination team, was pounded hard. A few also contributed to the large score piled up by the Christians. As the Legion forfeited to the Odd Fellows on Thursday night, the Christians now hold second place by a safe margin, while the Odd Fellows are in first position.

## DAYTON ON MAP BEFORE SCOPES IS CITIZENS' CLAIM

DAYTON, Tenn., July 11.—While the trial of John T. Scopes, charged with violating the Tennessee law prohibiting the teaching of evolution in the public schools, has attracted attention to this city from all parts of the country, its citizens insist that it was permanently placed on the map long before on its own account. The trial scheduled to begin Friday is expected to bring visitors who never have been here before, some, perhaps, who never have heard of the place.

Citizens of Dayton take pride in the city's claim to be the largest strawberry shipping center in the world, and they are optimistic that within a few years it will rival Port Valley, Ga., as a peach center.

The county seat of Rhea county, Dayton is the center of a rich agricultural county. Its strawberry shipments for this season amounted to 500 cars, which, lo-

## SECRETARIES PLAN TO MAKE OREGON BIG PLAYGROUND

EUGENE, Ore., July 11.—Eugene Chadwick of Eugene was unanimously elected president of the State Association of Secretaries of Chambers of Commerce of Oregon at the closing meeting of the members of the association. Other officers chosen are Earl Reynolds of La Grande, vice-president; E. R. Morris of Portland, secretary-treasurer; W. A. Reid of Corvallis, J. H. Fuller of Ashland, W. D. Dodson of Portland, W. W. Phillips of Hillsboro and F. A. Fullerton of Milton, directors.

Retiring officers are J. H. Fuller of Ashland, president, and W. A. Reid of Corvallis, secretary-treasurer. The secretaries in business session today voted to support the state Chamber of Commerce and to give whatever assistance as needed in the plan for financing the organization. The finance plan, as presented by W. G. Ide, of the state chamber, is that approximately 25 counties in the state, outside of Portland territory, sell 100 memberships each, at \$5 per year.

This will give \$12,500 per year or \$25,000 for the two year period. This fund is to be used for promotion work, and for the services of I. E. Vining, of Ashland, president of the organization. The report of the secretaries was given, following a long discussion. The drive for members will be staged by the state chamber in each county, following conference with the local chamber of commerce, the move read.

Added to the \$25,000 for the two year period will be a fund of \$45,000, which the Portland Chamber of Commerce proposes to raise for land settlement work for the state chamber. This will be a sum apart from the administration fund it is said. The publication "Oregon Business" will be continued.

During the early morning session, Oregon as a national playground was discussed at the round table meeting. Extension of highways and exploiting of Oregon's recreational spots was stressed. Utmost attention should be paid to the tourist the secretaries agreed.

See Pat for building, repairing and moving houses. Also have some fine property for sale. Phone 57-Y.
