MAURICE NEWLAND HAVING FINE TRIP IN CHINA

Mr. and Mrs. J. O. Newland have received indirectly a cablegram from their son, Maurice, who is travelling in China with a group of students, stating that they are in good health and having a fine time. In a recent letter Mr. Newland tells many interesting facts concerning his trip. They are in the midst of China's rainy season and consequently are somewhat handicapped. The tour is one of friendship, a group of representative students from the leading schools of the coast being selected to meet with like groups in China. They are visiting all of the principal cities and provinces and are being royally entertained by the officials of those places.

CARD OF THANKS

We wish to thank all our dear friends and neighbors who were so kind during our recent bereavement and we especially thank Mrs. May for her loving care. Also for the many beautiful flowers.

Mrs. Jennie McKay and Children
Evan Martin and Family.

Tubby is thinking of the shortest cut to the Ideal Bakery, Sheridan street, but he just must get that loaf of

Grimm's Milk Bread

or it'll seem like there is nothing to eat for dinner. You'll think so too, after you have tried it once.

M'MILLAN PLANE PROVES O. K. ON A TRY-OUT AT ETAH

(Associated Press Leased Wire.)

WASHINGTON, Aug. 4.—Two of the navy planes with the MacMillan Arctic expedition have been assembled at Etah, Greenland, and a successful flight with one of them was made for 30 minutes last night.

The take-off was made from the water and it is assumed it will not be necessary to build a runway.

Lieutenant-Commander Byrd, commanding the navy section, in a dispatch filed last night to the navy department said:

"Naval unit started work early with first sunlight since arriving here.

"All mechanics sent to work on NA-2, which was erected at 2 p. m. and hauled out and tied up to buoy 100 feet from beach. NA-2 took off for test hop at 9 p. m. and had broke down. Hop-(sic) at 9 a. m. and remained in the air 30 minutes and at 9:35 p. m. is moored to buoy near 6A-3. Lieutenant Schur, pilot, Recheville, (aviation machinists' mate), a mechanic and Commander MacMilan, passenger. The flight was successful." (Some details of the message apparently were garbled in transmission).

NATION'S LEADING GOLFERS INVADE PORTLAND LINKS

(Associated Press Leased Wire.)

PORTLAND, Aug. 4—Headed by half a dozen of America's leading golfers, 214 Knights of the Links from the east and middle west, arrived here today from Spokane for a day's visit on their 5,000 mile tour of the country. Some of the golfers preferred seeing the Columbia River highway to playing golf here, and they were taken on trips arranged by the Chamber of Commerce.

Those who preferred playing golf were taken to Portland's courses. Jim Barnes, British open champion, and Captain Ernest Carter, former Irish champion, were paired against Rudolph Wilhelm, former Pacific northwest and Oregon state champion, and John Junker, professional at the Portland Country Club.

The special exhibition match this afternoon was arranged with Chick Evans, former national amateur and open champion, and Jock Hutchison, former British open title-holder, paired against Dr. O. E. Willing, former Pacific northwest and Oregon state champion, and Mel Smith, professional at Waverly Country Club.

Increase Your Beauty and Look Younger

Delightful New Vanishing Cream Containing True Buttermilk Must Make You Look Years Younger or Money Back.

The old-time application of Buttermilk and Cream to whiten and preserve the skin and remove harsh little wrinkles and ugly sallowness is grandmother's recipe and women throughout the country are again using it to ensure a beautiful complexion and snow-white hands and arms.

Buttermilk, however, is not always obtainable, but a specialist has at last perfected a method of concentrating buttermilk and combining it with a perfect cream, which you can buy in small quantities ready for use at any first-class drug store by simply asking for "Howard's" Buttermilk Cream.

There is no secret about it nor is there any doubt about the result—it's just a common ordinary buttermilk in the form of a wonderful cream, gently massaged with the finger tips around the corners of the eyes and mouth.

Buttermilk Cream is sold by all druggists on a positive guarantee of satisfaction or money back.

GOITER MENACES AMERICAN GIRLS; IODINE ITS FOE

(Associated Press Leased Wire.)

LOS ANGELES, Aug. 4—Half the girls living in a belt extending from New York to the Rocky mountains have incipient goiter and the number so afflicted is increasing with the growth of the population, declared Dr. J. W. Turrentine, of the United States Department of Agriculture, in a paper presented today at the seventieth meeting of the American Chemical Society, which is being held here.

This increase might be checked, Dr. Turrentine said, if growing children were given a daily portion of four-millionths of an ounce of iodine. The readiest form in which this may be taken into the system is sea weed, one thousandth of an ounce of dry algae or seaweed contains the essential quantity of iodine. The same result may be expected from eating 2.5 ounces of oysters, 24 ounces of seafish, 200 ounces of fresh water fish, 200 ounces of eggs, 440 ounces of butter, 500 ounces or milk or 2400 ounces of wheat.

"These figures," explained Dr. Turrentine, "show how difficult it is to plan a menu from ordinary articles of diet which will provide adequate quantities of the essential iodine."

RAINBOW GARDENS OFFERING NEW DANCE HITS THIS WEEK

Blair Stewart, the Oregon Agricultural college famous baritone, will again be the feature attraction at Rainbow Gardens next Wednesday and Saturday nights. Mr. Blair possesses a rare voice and his song offerings have made a big hit with the patrons of dance. Hundreds of motorists who do not care to dance flock to the Gardens each week to hear him.

Deedle's Swanee Six orchestra, Society Syncopators, now furnishing music for the Rainbow Garden dancing parties will feature two brand new fox trots this week: "We're Back Together Again," and "My Sweetie Turned Me Down." These numbers are sure to be popular. Judging from the large crowds that have been patronizing the Winchester dances of late this new musical organization is exceptionally well liked. Miss Pitchford, who chaperons, states that the Garden dances are conducted in a very orderly manner and the deportment of its patrons is of a very high standard. The management extends a cordial invitation to those who do dance as well as to those who do not, to enjoy the refreshing atmosphere of Rainbow Gardens. Special attention will be accorded out of town patrons.

NEW MENTALITY IS WAR BARRIER SAYS ADMIRAL PHELPS

(Associated Press Leased Wire.)

WILLIAMSTOWN, Mass., Aug. 4.—The Washington conference on the limitation of armaments absolutely settled the peace of the Pacific, Rear-Admiral W. W. Phelps, a member of the naval board in Washington, declared at the institute of politics today. The four-power pact, he added, has insured the integrity of our possessions.

"I do not believe in any war with Japan," he said. "Both nations would be perfect fools to promote a conflict. I think that a new mentality is developing and that commerce is gaining between the two nations. People who talk publicly of conflict are doing a disservice. The Washington conference has removed the mental fear that brought about vast armaments."

HAYNES STAYS ON JOB, BUT ANDREWS WILL BE SUPERIOR

(Associated Press Leased Wire.)

SWAMPSCOTT, Mass., Aug. 4—It was reiterated today at the summer White House that President Coolidge understands that Roy Haynes will continue as prohibition commissioner despite persistent reports that he might resign.

The president has received no official information of any change in enforcement policy curtailing Mr. Haynes' powers.

It is his understanding that Mr. Haynes is functioning as usual except that he is immediately responsible to Assistant Secretary Andrews of the treasury, who has been placed in charge of the government campaign against prohibition law violators.

Mr. Coolidge, however, has taken the position that administration of the Volstead law now is in the hands of Mr. Andrews, and he should be given a free hand to make such shifts in personnel and changes in policy as he deems desirable.

$700,000 SAWMILL AND TIMBER DEAL IN LANE

EUGENE, Ore., Aug. 4.—The largest mortgage deed filed in the Lane county clerk's office in many months was recorded when the Anderson-Middleton Lumber company submitted a deed that provides for a bond issue of $700,000. The mortgage is held by the Portland Trust and Savings Bank, and the bonds are offered by Blythe, Witter and company.

Timber lands in Lane county, two saw mills and a railroad are posted as security for the issue.

MOUNT HOOD FOREST FIRE REPORTED GETTING WORSE

PORTLAND, Aug. 4—The forest fire on Cedar Swamp Creek, in the Mount Hood National Forest, was reported worse today. It now covers an area about a half mile wide and one and one-half miles long, the forest supervisors office reported.

EXECUTOR'S NOTICE TO CREDITORS

In the County Court of the State of Oregon for Douglas County.

In the matter of the last will and Testament and estate of Millie A. Webb, deceased.

Notice is hereby given that the undersigned was on the 18th day of July, 1925, by order of the County Court of Douglas County, Oregon, duly appointed executor of the estate of Millie A. Webb, deceased. All persons having claims against said estate are hereby notified to present same, with vouchers above-ed and verified as by law required, to the undersigned at the Douglas Hotel in the City of Roseburg, Oregon, within six months from date of this notice.

Dated and first published July 21st, 1925.

PERCY A. WEBB,
Executor of the Last Will and Testament and estate of Millie A. Webb, deceased.

John T. Long, attorney for the estate.

FIRST BOY SCOUT CAMP CAME TO END WITH BIG PROGRAM

BOY SCOUT CAMP, Wolf Creek, Ore., Aug. 4.—(Correspondence to News-Review).—The regular program ended last night around the camp fire with just a good time for all. Mr. Britton thanked Mr. Tomlinson for his services during the two weeks. Mr. Tomlinson has given his time gratis and has rendered a large service which has been greatly appreciated by all concerned. George Weber led the boys in a hearty yell for him. Mr. Britton then turned the meeting over to him. Songs were sung, stories enjoyed, final instructions and a last song and the boys were off to sleep.

During camp ten tenderfeet were passed to second class and six second class to first class scouts. In addition to that sixty-one merit badges were awarded as follows: Pioneering, 1; swimming, 12; handicraft, 2; first aid to animals, 6; firemanship, 9; carpentry, 3; painting, 2; safety first, 1; personal health, 1; plumbing, 1; first aid, 1; camping, 3; pathfinding, 2; bird study, 1; cooking ,1; life-saving, 4; scholarship, 1; music, 1; public health, 2. A long list of tests having to do with the passing of scouts to a higher grade were passed. That means that there are several scouts, who, on completion of one or maybe several, will be raised a notch in scouting.

Today, Elton Jackson, Eugene Love and Robert Oppie were passed in the Junior Red Cross Life-saving test and Sten Lobek in the Red Cross swimming test. The first three are now entitled to wear the Red Cross Life-Saver's emblem. They are qualified to act in case of necessity and to assume authority in handling helpless or drowning persons.

In spite of the fact that there were only two leaders (adult) to the fifty-one boys, instead of one man to every twelve boys, as really should be, the scout officials, parents and leaders at camp are highly elated over the success of the camp.

During the last few days considerable stomach ache was experienced among the boys. The fact of the matter is that there was too much sweet stuff and "fancy" eats sent up to camp. Of course, the folks who sent it meant it with the best of intentions and for the sake of the boys. It must be said that all those things were greatly appreciated and enjoyed—until the boys got too much—and then Oh, Boy!

During the second camp there will be twenty-eight boys during the first week and twenty-one during the second week. They will be divided into four patrols of seven scouts each and competition in scout-craft and athletics carried on.

BULGARIA FACES NECESSITY OF IMPORTING SUGAR

SOFIA, Aug. 4.—Due to a smaller harvest of beets, Bulgaria's sugar crop is expected to fall far short of that of last year, when the country had sugar to export. The reason is said to be due partly to the refusal of the factories to furnish beet seed to the peasants.

Last year there was such a bumper crop of beets and so much sugar manufactured that the price dropped. The manufacturers are said to have guarded against a similar situation this year with the result that many beet raisers withheld the seed from the farmers. Thus the beet acreage was greatly reduced and it is predicted that Bulgaria will be obliged to import sugar from Czechoslovakia.

NEWSPAPER PLANT IS SHATTERED BY BOMB

(Associated Press Leased Wire.)

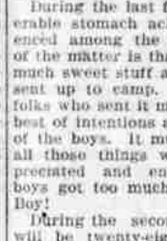
CHICAGO, Aug. 4.—A bomb exploded today at the plant of the South Town Economist, a weekly newspaper, which also operates a radio casting station.

The explosion shattered all the windows in the plant and did other slight damage.

WOMAN VERY NERVOUS

Weak, Blue, Discouraged—Relieved by Taking Lydia E. Pinkham's Medicine

Cincinnati, Ohio.—"I was nervous and could not sleep, had crying spells and the blues, and didn't care if I lived or died. My right side was very bad and I had backache and a weakness. I read about your medicines in the papers and wrote for further information. I took Lydia E. Pinkham's Vegetable Compound, Blood Medicine and Liver Pills, and used Lydia E. Pinkham's Sanative Wash. I have had good results in every way and am able to do my work again and can eat anything that comes along. My friends tell me how well I am looking."—Mrs. F. K. CONELL, 129 Peete St., Cincinnati, O.



Willing to Answer Letters

Philadelphia, Pa.—"I have used your medicines for nervousness and a run-down system with a severe weakness. After taking Lydia E. Pinkham's Vegetable Compound and using Lydia E. Pinkham's Sanative Wash I feel like a different woman and have gained in every way. I am willing to answer letters asking about the medicines."—DORA HOLT, 2649 S. 11th St., Philadelphia, Pa.

New Beauty for the Better Buick

Duotone Duco, now introduced by Buick, is the latest, smartest, most striking color and finish combination for motor cars. Its soft splendor charmingly enhances the beautiful new Buick body lines. It establishes a new custom vogue in motor car dress. And Duotone Duco is only one of many 1926 Buick improvements. The Better Buick is on display today in the showroom of every Buick dealer.

FARM NEWS

ARSENICAL DUST, DEATH TO GREEN CABBAGE WORM

Oregon gardners who are troubled with green cabbage worms can be rid of this pest by using an arsenical dust, says Don C. Mote, entomologist for the experiment station. Calcium arsenate is the best poison, as the dust is more toxic than lead arsenate and there is little danger of burn on the cabbage from this material. Powdered lead arsenate can be used, however, if calcium arsenate is not available.

The powdered poison is mixed with some dust carrier at the rate of one part of poison to six of carrier by weight. Carriers that are suitable are sifted wood ashes, hydrated lime, air-slaked lime, or powdered sulfur. To insure a good mixture, the poison is first thoroughly mixed with the carrier and then passed through a fine screen to break up all the lumps.

The dust can be safely applied every 10 days from the time of setting out until the plants begin to head. The best time to dust is early in the morning when there is little breeze and when the dew is on the plants.

Humus Helps Clay Soil.

Clay soils containing organic matter are much more friable than similar soil without organic matter, says the experiment station at O. A. C. When a greenmanure crop is turned under, the various fertilizing elements that have gone into the making of the crop are returned to the soil and a quantity of organic matter not before in the soil is added. Besides improving the physical condition of the land, the organic matter serves as food for the necessary micro-organisms.

The way in which hay is baled makes a great difference in the price it commands on the market, the college specialists point out. Well-baled Oregon hay, with respect to neatness and uniformity, is sometimes classed as improperly baled if the bale happens to be of a size or weight not in demand on the market on which it is offered for sale.

Liming the soil contributes to the efficiency of manure. It also protects inoculation and substantially adds to the capacity of the bacteria and plants to utilize free atmospheric nitrogen, reports the experiment station.

In irrigating potatoes, the average amount of water giving most percentage returns in many years experiments on the station grounds at Corvallis is 2.7 inches per acre, the total water consumed, including soil and rain water, was 9.5 inches. The average yield was 280.6 bushels obtained at a water cost of 545 pounds of total water consumed to the pound of dry matter produced.

Experiments by the Oregon station strongly indicate that sulfur is applied. A thorough acidity test an especially critical elements in plant growth but that only a small amount is necessary. Yields have been increased and water requirements strikingly decreased by adding a little sulfur when this element is low.

A practical means of replenishing and maintaining organic matter in soils in Oregon is cover crops. Because of mild winters in western Oregon these cover crops are usually barley and common vetch. Crops for this purpose should be sown before the fall rains begin, at the rate of 30 to 40 pounds of vetch and 25 to 30 pounds of barley. In the spring they are turned under.

Oregon farmers usually prefer to use limestone which contains some rock ground to a dust powder and some which is ground to pass through a 10 mesh sieve. The fine stone sweetens the soil quickly and the coarser material remains to keep it sweet.

Small Laying Flocks Need Commercial Feeds.

In handling the small flock in Oregon, unless it is being kept on a farm or in connection with other livestock where considerable feed would be used, use of a commercial laying feed is recommended by the experiment station. By so doing the owner will be reasonably sure of getting a well-balanced ration and eliminating the possibility of getting poor ingredients with which to mix the feed. A good laying mash is kept before the chickens in a box or through so they can eat it at will.

A scratch grain should be fed morning and night, advises the station. This, if made by the owner, is made of two parts wheat, one part corn, and one part plump oats. A sufficient amount is fed in the morning to last the birds two hours — it should be cleaned up in that time. In the afternoon a sufficient amount is given to insure the chickens going to the roost with their crops full. This means that about one-fourth of the total grain is fed in the morning and three-fourths in the late afternoon.

For young growing stock a developing mash can also be obtained, but if this is not possible, for a small flock the laying mash with equal parts of milkrun can be used. This is fed in the afternoon, the reason for this being that if the mash is fed in the morning there is the possibility that they will not get out and exercise or work as they would if not fed until the afternoon. Grain is fed, of course, morning and night, as with the laying stock. Green feed, grit, shell, and charcoal should be kept before the old and young stock at all times.

Two lime-loving crops in Oregon should never be sown in succession, even after liming unless lime applied has been excessive, says the experiment station. Different soils may react differently to different amounts of lime applied. A thorough acidity test will often save considerably in lime applications.

"I don't believe the results from the use of lime on grain are very marked the first year," says J. J. Doerfler of the Inyian Karia farm near Silverton, "but our records show that it does increase yields even on grain the second and the following years.

Growers in the Willamette valley will apply the third codling moth cover spray not later than August 8. The first moths of the second generation appeared in the rearing cage July 25. It is estimated that the maximum number of moths will appear during the first week in August. The egg hatching period will begin about August 3, and the peak of the egg hatching period will probably be about the middle of August. The poison cover spray should be on the foliage, pears and apples before the worms hatch. Increasing the dosage to five pounds of powdered arsenate of lead to 200 gallons of water in this spray is a frequent practice.

In going through the potato fields often outstandingly vigorous plants may be seen—large growers, that are healthy and not next to any diseased plants. Such healthy plants should be marked with a stake for separate digging. If these are good producers, they should be saved for next year's seed plot, says the extension service.

NOTICE OF SALE

In the County Court of the State of Oregon for Douglas County.

In the matter of the estate of Ralph M. Knight, deceased.

Notice is hereby given that the undersigned, administratrix of the estate of Ralph M. Knight, deceased, will sell at public sale for cash in hand, all the right, title and interest of Ralph M. Knight, deceased, in and to the following described premises, to-wit:

The Donation Land Claim of John T. Boyle, Notification No. 127, Claim No. 41, being parts of sections 7 and 18 in township 29 south, range 4 west of the Willamette Meridian, Douglas County, Oregon, according to the official plat of survey returned to the General Land Office of the United States by the surveyor General, being bounded and described as follows, to-wit:

Beginning at a point 20 chains west and 12 chains and 25 links north from the corner of sections 7, 8, 17 and 18 in township 29 south, range 4 west, and running thence south 80 chains; thence east 20 chains; thence north 80 chains; thence west 20 chains to the place of beginning, in the District of Lands subject to sale at Roseburg, Douglas County, Oregon, and containing 160 acres,

Subject to one mortgage for $9,000.00 in favor of the Federal Land Bank, of Spokane, Washington, and one mortgage for $6,500.00 in favor of the Roseburg National Bank, of Roseburg, Oregon, and also subject to the widow's right of dower, and will also sell at private sale for cash in hand, 19 shares of the capital stock of the Umpqua Date Prune Orchard Company; said sale to be held on the 4th day of September, 1925, at the hour of ten o'clock a. m. of said day; said sale to be held on the premises of the late Ralph M. Knight, deceased, about four miles east of Canyonville, Douglas County, Oregon.

Dated and first published this 4th day of August, 1925.

LOU KNIGHT,
Administratrix, with the will annexed, of the estate of Ralph M. Knight, deceased.
