Both of these reports were a source of astonishment to the trade, the United States report in particular showing about twenty million bushels more wheat likely to be harvested in this county than has recently been looked for. After the first rush of selling had somewhat subsided buying broadened out and a substantial recovery was witnessed. Chicago opening prices 2.58 to 2.78c lower, September \$1.60 1/2 to \$1.62 and December \$1.58 1/2 to \$1.60, were followed by a re-

action to \$1.62 1/2 for September and \$1.60 1/2 for December. The government report as to corn, however, was construed as bullish and corn prices soon scored a material upturn. After opening at 1.8 to 1.8c decline, September \$1.04 1/2 to \$1.05, corn rose all around, September touching \$1.04 1/2. Oats started at 1/2 to 5/8c setback. September 41 3/8 to 41 1/2. In line with hog values, the provision market was easy.
