Anna Q. Nilsson Introduces a Popular Model for Warm Afternoons

With the waistline reaching amazing depths, the skirt which features a tunic takes on an air of importance in the fashionable summer frock. The waistline, this season, becomes an important thing in the mode.

Tunics show a decided tendency to profundity in the afternoon and evening gowns, and so lend themselves admirably to the low placed waist. The apron effect in front is another style which is well shown to give harmony of line with a low placed waist.

Anna Q. Nilsson, who is seen in the First National film, "The Talker," has a well earned reputation for dressmaking, and has selected several charming tunics for her latest film. One afternoon frock, decidedly suitable for the summer, is of white with material which features embroidered net for its collar and an inset down the entire length of the tunic. The abbreviated tunic is very smart and one of the latest whims of fashion.

The low waistline is cited with pleasing results in frocks whose bodies lack adornment, and relies upon its short skirt for its broken lines of shade or contrasting panels.

Where Sweaters Rule
When Sports Costumes are Correctly Chosen the Sweater or Jumper-Overblouse is Popular

The length of the blouse varies and it may come to the hips, or well beneath the hip line, so as to form a tunic effect.

The skirts which are so smartly used with these sweaters possess smart features in themselves. The pleats which distinguish them are variously placed. Many models are pleated all around, while others are pleated across the front, leaving the backs plain. Inverted pleats in front are used in the flannels and in the babriganas, while the lighter silks or striped materials use the *aliove* pleats.

Linen, in all the charming summer shades, is also used to bring into greater popularity the sweater overblouse, and some really smart effects are achieved in this material.

Buttons, in covered or novel pearl effect, are used to add a chic touch and frequently outline the collar or the front of the blouse.

Norma Talmadge, whose recent trip abroad has introduced many interesting fashion notes, has selected all white for a very chic sweater suit. Here is of the knitted material and is smartly designed, while a hat of trim lines in all white completes a cool and pleasing appearance for the warmest of summer days. Miss Talmadge finds it an appropriate outfit to wear to and from the studio when she is working on scenes from the modernized "Gruentark" for First National.

blocked patterns whose skirts may either match or contrast in plaits or in straight lines.

Crepe de Chine in all the lovely tones of the season are much used in fashioning the smart sweater-overblouse with matching skirt of plaited crepe. This forms a stunning ensemble effect and one which is well suited to the late morning or early afternoon in smartly dressed summer circles.

Pockets, ties, monograms and embroidered patterns add smart touches to these blouses, and add the individual note. Where all white, or pale pink, or pastel blues are used, contrasting ties in harmonious shades, or embroidered pockets add the correct note of chic.

The belt is another feature of importance. It may or may not accompany the sweater, but if it is present at all it is a conspicuous feature. The smartest shops are showing belts in brilliant tones in shades and in leather whose borders are brightly gilded. The shake-skin belt is a featured bit of chic, while the gold colored belt is one of the high spots of the season, and is very smartly placed on a jumper frock of all white.

Collars, cuffs, and pockets of plaid silks, or of striped silks which match the skirts are smart accompaniments to the sweater overblouse. Chanel has used this form of connection with stunning results on his summer sports outfit.

The "successful siege" of sports costumes upon the summer mode has introduced sweaters and overblouses to an amazing degree. Sweaters of silk, of wool, of kasha, of habibigan, of jersey, and of almost any fabric are introduced with stunning effects into the world of summer sports.

The neck line has become a thing of moment in selecting the favorite model in the sweater. The turtle neck vies in popularity with the cooler V shaped neck, while the round or Peter Pan model is also much desired.

Then there is the material itself to choose. The soft wools are old favorites, while the newer habibigan-come in sporting shades whose high tones add a colorful note to any field of sport. Serviceable tints also are much to be desired, and the sand and gray habibigan are much used where dust and sun are encountered.

The knitted silken materials are mostly found in gaily striped and
