BOASTFUL OUTLAW MAKES TWO HAULS

KLAMATH FALLS, Ore., Sept. 15.—A lone outlaw, who early last night broke into the safe of Coker Bros., building contractor, and obtained \$50 in cash, later at night succeeded in a house in the underworld, according to the police, whose method of the "job" he had just pulled.

He was allowed to remain in the house while the two women inmates left it for an hour. Upon their return they missed several suitcases and a large quantity of wearing apparel, including a mass of expensive lingerie. The police are still looking for the boastful robber.

INTERNATIONAL GAMES HELD IN GERMANY FOR WORKERS

FRANKFURT, Germany, Sept. 15.—(A. P.)—The first international Olympic games for working classes took place recently in the new Frankfurt Stadium and through the five days attracted more than 250,000 spectators. Competitor athletes included 2,000 Germans and 1,500 foreigners. The latter represented Finland, Czechoslovakia, Austria, France, Belgium, Italy, England, Yugoslavia, Poland and Portugal.

The prominent qualification to compete was considered the advocacy of a war against all class distinction. The Social Democrat News Service described the games as "the birth of the peace idea in the most modern settings and typifying in classical style the thought of a genuine brotherhood among nations."

In the athletic contests a new world's record for the 400 meters relay race for women was established by the Finnish women's team which covered the distance in 51.2 seconds. The Frankfurt Volksstimme recorded the games in German, English and French.

A HUGE ORDER FOR HOSIERY

The largest single order on record for women's hosiery, said R. B. Strawn, local manager, was placed by the J. C. Penney company the other day to partially take care of the 1925 business of its 476 department stores. The order was for 2,400,000 pairs, embracing besides the staple colors, many of the attractive shades which will be in vogue.

MARKET AGENT DEPARTMENT

(State Market Agent.) Shortweight Scales. Many interesting and ingenious devices to cheat the public are brought to light in the state sealer of weights and measures, which department is now under State Market Agent Spence. In one case of platform scales it was found that one of the large weights had been drilled out and lead filled in, to make the weight register less. It took the third inspection to discover the trick, as on former inspections the owner slipped out the false weight and substituted a correct one.

In eastern Oregon the deputies found a washer of half inch thickness applied to a gasoline pump at a filling station which, shortened the sweep and cut back one quart on each five gallons.

Another instance the scales used at the receiving end were correct, but those used in weighing out had been drilled out. Very often weights are drilled out at the factory to balance the scales, and only the deputy strictly onto his business would discover such a trick. Many reports are made of all kinds of trickery to rob the seller, and many prosecutions have been made. The sealer of weights reports great improvement over former conditions.

Potato Law Enforcement.

Recent announcement by the State Market Agent that the potato grading law is to be rigidly enforced has brought a deluge of requests for copies of the law, grades, rules and regulations. Many of the wholesalers and large dealers have written in that they will cooperate with the department by refusing to buy any stock offered by growers unless the potatoes are graded and sacks stamped, as required by law. Mr. Spence says he hopes it will not be necessary to make any prosecutions, but that he will be compelled to if violations continue. The law provides that before any person shall offer potatoes for sale same shall be graded and the grade and grower's address be stamped on the sack. Any person selling potatoes without these requirements, in lots of more than 50 pounds, is liable to arrest and prosecution, and the last legislature provided severe penalties for violation.

Daily Market Reports.

Potato growers and dealers may have the federal daily market reports without charge by requesting same of the State Market Agent 714 Court House, Portland. Team Work Results. The Manitoba, Canada, co-oper-

active wheat pool handled eight

and one-half bushels of wheat last year at an administrative cost of slightly over three-fifths of a cent per bushel. Interest, insurance and elevator charges were a little less than half a cent, and the total cost was slightly over one cent per bushel. This is the kind of management that makes co-operative organizations successful. Too many are managed by inexperienced men at the head. There must be loyal backing and there must be a large percentage of the acreage under contract. Without these as foundations co-

operative undertakings will fail.

State Loans Will Be Paid. Practically all of the loans made to eastern Oregon farmers by the state, with which to purchase seed to re-seed the frozen out acreage, will be repaid this year. But for this state aid many a grower would have been compelled to let his wheat fields lay idle this summer.

Grain, Hay and Potatoes.

Grain, hay and potato yields in the state are considerably larger than last year in Oregon. In the U. S. the potato yield is estimated to be 100,000,000 bushels more than last year and the outlook is good for fair prices.

A SIMPLE PROBLEM

We have always been rather fond of problems, but this Used Car "problem" has given us real enjoyment. It looked so hard and turned out to be so simple. Just a case of being fair and honest!
