PIERCE DELEGATES LUPER TO ATTEND IRRIGATION MEET

SALEM, Ore., Oct. 27.—Rhea Luper, state engineer, has been delegated by Governor Pierce to attend a conference in Washington, D. C., December 11 and 12, called by Elwood Meade, commissioner of the reclamation service. Reclamation policies, particularly with reference to the western and southern states, will be discussed and the problem of settlement will be considered at length.

The government has had a policy of withholding money for development of projects until some arrangement of state aid in settlement has been made, but dissatisfaction of the states with this policy has led to the calling of the conference. Correspondence between Governor Pierce and Dr. Meade relative to the Warm Springs project near Vale in which Meade wanted a guarantee of state aid in settlement, which was not definitely promised by Pierce, was instrumental in the calling of the conference.

JOB HARRIMANN, NOTED SOCIALIST, CALLED BY DEATH

(Associated Press Leased Wire.)

LOS ANGELES, Oct. 27.—Job Harriman, attorney, candidate for vice president on the socialist ticket of 1900, died yesterday at Sierra Madre, it became known here today.

The death of the socialist leader at the little foothill town northeast of here was due to tuberculosis. He was 64 years of age, a native of Indiana.

Harriman was nationally known by his participation in a number of movements for social betterment of the laboring classes. He was admitted to the bar in Colorado and came to California in 1900. He was an attorney for the defense in the trial of the McNamara brothers, who were convicted of dynamiting the Los Angeles Times building in 1911. Later he polled a heavy vote here as socialist candidate for mayor of Los Angeles, although he failed of election. He had been ill for many years.

ZERO WEATHER ON ANNUAL VISIT IN ROCKY MT. REGION

(Associated Press Leased Wire.)

DENVER, Colo., Oct. 27. — Chilling blasts from the north, which yesterday brought heavy snow and freezing temperatures to the Northwest, today were enveloping the Rocky Mountain region in the first seasonal cold wave.

Havre, Mont., was probably the coldest spot in the United States today, when the mercury there decended to two degrees above zero. Other parts of Montana reported near zero weather, the thermometer registering eight above at Miles City and Helena.

Snow which today blankets the country from Northern Washington eastward across Montana and Northern Wyoming and South Dakota is expected tonight in parts of Colorado and Utah.

RECLAMATION SYSTEM NEEDS REAL FARMERS

They Should Have Capital Also, Commissioner Mead Points Out.

POLITICS HINDRANCE

Western Irrigation Areas Cannot Repay Federal Loans If Held by Incompetents.

CHICAGO, Oct. 27.—Federal reclamation cannot succeed unless it is divorced from politics, declared Dr. Elwood Mead, commissioner of reclamation, in an address here today before the Western Society of Engineers.

The fundamental question of all future projects also ought to be: will the productive value of the water in irrigation be worth what it costs to provide it, Dr. Mead said. Another evil of reclamation, he added, was land speculation.

Dr. Mead pointed out, however, that the best cultivated farms on this continent are in irrigation districts. Those around Greeley, Colo., he said, rival those of the Lothians in Scotland.

Western irrigation areas, he added, are now the main source of long staple cotton. Millions of dollars which now go to the irrigation farmer of Texas, Arizona and California would, without federal reclamation, go abroad to the cotton growers of Egypt. But along with these achievements, he said, there has gone a tragic waste of money, effort and opportunity.

Political Meddling Hinders

"Less attention must be given to local importunities," the speaker asserted in discussing the political phase of the reclamation question. "From the first western congressmen have been subjected to strong local pressure to get works built and afterwards to relieve settlers from their payments. The construction costs of today render it imperative that hereafter reclamation be freed from all danger of political control.

"The reclamation policy was founded on the theory that if irrigation works were built, settlers would flock in and succeed as they had done in Iowa and Kansas. The difference between the conditions which confronted the homesteader in Iowa, where a paying crop could be grown the first year, and in Arizona, where the land had been baked for centuries, and where, after costly preparation, a year or two of unprofitable watering and cultivation would be needed before good yields could be obtained, was ignored by these beginners. It requires skill and it is often enormously expensive, costing as high as $75 to $100 an acre. The settler sees his savings eaten up and when his capital is gone, he has to succumb.

Foreclosures Upset Plans

"Lack of aid in farm development has burdened settlers with heavy indebtedness and caused thousands of mortgage foreclosures.

This has demoralized reclamation finances. The unpaid assessments for construction and operation from 1920 to 1924 total $8,500,000. This was increased in 1924 by over $2,000,000.

In some cases, Dr. Mead said, failure was due to unfit lands while in others a policy of drift has caused good projects to remain undeveloped. He cited the lower Yellowstone project in Montana as an example of the latter type where good farmers on small farms would make the region as good an irrigation project as those around Salt Lake and Denver. A large part of the land, however, is held by speculators, and only 14,000 acres out of 58,000 acres were irrigated in 1924, fifteen years after water was first supplied.

Long Distance Farmers

Among other projects he was trying to salvage, Dr. Mead told of one early settler who was a deep sea diver, another the wife of a baseball player, and a third had been a missionery in China. A painter, a plumber and a carpenter all living in distant cities owned farms, all unoccupied and untilled.

None of these had paid water charges or delinquent county taxes in from three to five years. Real farmers, he said, were the need to make these projects a success.

Speaking of the increased cost of irrigation projects, Dr. Mead said the irrigation works of the Columbia Basin in Washington would cost nearly $200,000,000. The water right for a single acre would cost $158. The cost of changing raw land into farms would average $100 an acre.

"An act passed by the last congress requires that hereafter there shall be a thorough soil survey of the lands of each new project," Dr. Mead explained. "The land shall be classified according to earning power and that annual payments for water right shall be equal to 5 per cent of the average gross crop return. Recent regulations provide that settlers on public land must have a capital of $2,000 and have had at least two years' experience.

"The required qualifications of industry, experience, character and capital are indispensable to success if we are to subdue the desert."

The Testimony of Others

IN my new book which may be had FREE upon request, on PILES and other Rectal and Colon disorders, I have reproduced nearly 100 letters from among those received from my thousands of patients. These tell you frankly of their years of suffering of their trying home remedies and even operations, and, finally, of their complete cure by my NON-SURGICAL method. These are from men and women of every station, many of whom you may know. You will learn by reading this Book why I can give a WRITTEN GUARANTEE to cure your Piles or return your fee.

WILLS WINS FROM JOHNSON IN FIRST ROUND OF FIASCO

(Associated Press Leased Wire.)

NEWARK, N. J., Oct. 27.—Harry Wills today had a quick but indecisive one round heavyweight victory over Floyd Johnson to his credit.

While ten thousand spectators in the first regiment armory yelled "fake," a towel was flung unexpectedly from the corner of the boxer who had been heralded before the match as the "Iowa bulldog." What was to have been a 12-round, no decision event, ended two minutes and two seconds after the opening of the first round last night.

Johnson appeared to the spectators to be far from out when the towel fluttered. He was on his feet and had not been knocked down.

After the match, a physician representing the state boxing commission, examined Johnson and declared he was fit.

"I was punch-drunk," said Johnson.

Wills entered the ring weighing 215 pounds, 12 more than his opponent. The negro immediately carried the fight to his opponent, sinking a left to the stomach and then bringing the same hand up to the head. A right hand wallop to the head then drove Johnson to the ropes. He had his hands up in defense when the towel was flung.

When it costs no more, why not get the best? The Hotel Rose Barber shop and Beauty Parlor is now open for business and invites you to inspect and patronize this shop which offers individual hygienic service to each and every patron. All hair brushes, combs, neck dusters, razors, clippers, will be sterilized before they are used on customers. We solicit your patronage. PAYS SECOND FINE FOR SPEEDING; CAR AND LICENSE GONE

(Associated Press Leased Wire.)

BEND, Ore., Oct. 27.—Leonard Strom, local mill employe, is convinced luck is against him. Arrested for speeding 55 miles an hour on The Dalles-California highway, he was fined $50 and costs and his driver's license taken away for one year by Justice of the Peace E. D. Gilson yesterday. Meantime while waiting to appear in court, Strom parked his car, a sport model roadster, on a downtown street from which it was stolen, he reported to the police.

The speeding charge was made by State Traffic Officer Earl Houston, who said Strom went at the rate of 55 miles an hour for ten miles before giving heed to the officer's stop signals. It was the second time in five months that Strom has paid a fine for speeding, Houston said.

EXAMINATION MADE OF HIGH SCHOOL PUPILS

Great Number of Defects Discovered in Roseburg Students.

WEIGHT IS KEYNOTE

Practically Every Student Affected by Spinal Curvature Traceable to Underweight.

Of a total of 322 high school students examined by the Douglas County County Health unit recently only 9 were found to be free from some sort of defect. Six out of 187 girls were not defective and three out of 135 boys passed the examination without defects being found.

Twenty girls were found to have corrected defects discovered at a previous examination, while four boys had corrected defects.

Seven girls and four boys were found to be 20 per cent overweight and 49 girls and 23 boys were found to be 10 or more per cent under weight.

Forty-nine girls and nine boys had defective vision. Ten girls had defective ears. Twenty-five girls and 12 boys had diseased tonsils. One girl and two boys had adenoids. Twelve cases of bad teeth, four cases of glandular defects and two cases of skin disease, were also discovered.

Seventy-nine girls had defective feet and 90 boys were reported with some degree of flat foot or other orthopedic defect. There were 54 cases of goiter among the girls examined and 11 cases among the boys.

Nine girls and 14 boys had heart trouble. In practically every case of heart trouble the student also had goiter.

Very few of the students were free from some degree of spinal curvature. The curvatures were listed under three heads, schliosis, or round shoulders in some degree; kyphosis, a curvature in the central portion of the spine, and lordosis, a curvature in the lower spine. The examination results were as follows:

	Girls	Boys
Schliosis	145	63
Kyphosis	104	102
Lordosis	94	89

Spinal curvature and improper nourishment are very closely related, according to the health unit workers. In practically every one of these cases among high school students it was possible to trace the cause back to a period when the child was underweight and lacking in the materials necessary to provide the proper development of the spine. If a child's weight is carefully watched and he is kept up to standard in weight it is seldom that spinal curvature will develop, it is claimed.

All of the students, except two girls, passed the examination for defective lungs. No boys were affected by lung trouble.

The greatest difficulty, it is reported, is in keeping parents interested in watching the weights of their children. Careful check should be made on weights and measurements at very frequent intervals and if a child is kept at normal weight he will not be subject to defects as readily as those not properly nourished.

The examination of the high school girls was made by Dr. Lucetta Smith, aided by Miss Josephine Jones, county health nurse, and Miss Marion Porter, clerk. Dr. W. C. Belt and Coach Doubet conducted the examination of the boys.

Heat with gas.

NEWSY BITS

(Associated Press Leased Wire.)

SAN FRANCISCO—Acting on statements made by Charles Goff, formerly prohibition enforcement director, in this district, that South San Francisco a suburb, was the wettest city in the United States, the trustees of a municipality, ousted the chief of police and a patrolman.

RENO — Resignation of two guards at the Nevada state prison figured in the developments of the search for Claude B. Sweezey, Jr., who escaped from the prison Sunday after tapping the prison's cash register and confiscating a prison gun.

SACRAMENTO—The old family Bible and the family album still remain typical institutions of the American home, Judge Malcolm C. Glenn decided when he ruled that Sacramento was the legal residence of Mrs. Eddie Maud Gainsley, who died February 18. Mrs. Gainsley maintained two residences, one in Los Angeles, but the judge ruled that the finding of the album and Bible here compelled him to rule in favor of Sacramento.

MONTROSE, Colo.—The prank of school boys when they threw a quantity of blasting powder into the furnace of the school at McPhee, Colo., cost the life of one youth and four others suffered burns which may result fatally.

ALBUQUERQUE, N. M.—Signs reading "stop—prohibition officers" will shortly do away with the excuse of motorists that they mistake prohibition officers for holdup men. Now there will be no excuse for passing up the officers.

WOMAN VERY NERVOUS

Weak, Blue, Discouraged—Relieved by Taking Lydia E. Pinkham's Medicine

Cincinnati, Ohio.—"I was nervous and could not sleep, had crying spells and the blues, and didn't care if I lived or died. My right side was very bad and I had backache and a weakness. I read about your medicines in the papers and wrote for further information. I took Lydia E. Pinkham's Vegetable Compound, Blood Medicine and Liver Pills, and used Lydia E. Pinkham's Sanative Wash. I have had good results in every way and am able to do my work again and can eat anything that comes along. My friends tell me how well I am looking." — Mrs. F. K. CORBELL, 129 Peete St., Cincinnati, O.

Willing to Answer Letters

Philadelphia, Pa. —"I have used your medicines for nervousness and a run-down system with a severe weakness. After taking Lydia E. Pinkham's Vegetable Compound and using Lydia E. Pinkham's Sanative Wash I feel like a different woman and have gained in every way. I am willing to answer letters asking about the medicines." — DORA HOLT, 2649 S. 11th St., Philadelphia, Pa.

Notice of sale of government timber, General Land Office, Washington, D. C. Sept. 23, 1925. Notice is hereby given that subject to the conditions and limitations of the acts of June 9, 1916 (39 Stat., 218), February 26, 1919 (40 Stat., 1179), and June 4, 1920 (41 Stat., 758), and pursuant to departmental regulations of April 14, 1924 (50 L. D. 376), the timber on the following lands will be sold Nov. 16, 1925, at 10 o'clock A. M. at public auction at the U. S. land office at Roseburg, Oregon, to the highest bidder at not less than the appraised value as shown by this notice, sale to be subject to the approval of the Secretary of the Interior. The purchase price, with an additional sum of one-fifth of one per cent thereof, being commissions allowed, must be deposited at time of sale, money to be returned if sale is not approved, otherwise patent will issue for the timber, which must be removed within ten years. Bids will be received from citizens of the United States, associations of such citizens, and corporations organized under the laws of the United States, or any state, territory, or district thereof only. Upon application of a qualified purchaser, the timber on any legal subdivision will be offered separately before being included in any offer of a larger unit.
