Mr. Ewens estimates that there are possibly two tons of second growth fruit on his orchard tract.

To men whose pipes burn hotter than 'L and Maria

Gettin' hot under the bat-wing won't cool down the Fahrenheit in that old underslung... For any pipe 'll burn infernally fast and hot if you stoke 'er with tobacco that's cut too blame fine... But ream 'er clean and pack 'er full of Granger—it's cut rough to burn slow and cool—then you'll find it "20 degrees cooler inside" and the smoothest, sweetest piece of smoking you ever experienced.

It's cut rough to burn cool—a scientific fact

The finer tobacco's cut, the faster it burns—and the hotter! The rate of combustion depends on the oxygen around each particle of tobacco so Granger's cut coarse (Rough Cut, we call it)—to burn slower, smoke cooler and last longer.

You must say "QUICK QUAKER"

To get true Scotch flavor—famous Quaker Oats flavor—in quick cooking oats

THE difference in breakfast oats is flavor. Oats, originally a Scotch dish, must have Scotch flavor. Quick Quaker has the toasty Scotch flavor that's so wonderful... famous Quaker Oats flavor.

No other brand has it. None successfully imitates it. It's due to exclusive Quaker milling of the finest, plumpest oats. Milling methods which took some 50 years to perfect. Makes all the difference in the world. Quaker Oats spoils folks for ordinary brands of oats. Cooks in 3 to 5 minutes. No kitchen muss busy mornings. Due to Quaker milling methods, it supplies, too, the "roughage" you need to make laxatives seldom necessary. Look for the picture of a Quaker on the oats you get.
