TIDAL WAVE IN MEXICO; PORT UNDER WATER 2 HOURS

(Associated Press Leased Wire.)

MEXICO CITY, Nov. 20.—Dispatches from towns near Zihuatanejos, which has been inundated by a tidal wave, say that the wave was 35 feet high. It swept suddenly over the little port, which was submerged for two hours.

No estimate of the number of deaths are available.

The tidal wave, which occurred Tuesday, is believed to have been caused by a volcanic disturbances somewhere in the Pacific, although this theory cannot be cinfirmed. There is still no communication with Zihuatanejos and no direct reports have been received from there.

Zihuatanejo is a port on the Pacific 125 miles northwest of Acapico with an extremely small population. Therefore it is thought that unless there was some unusual gathering of people in the hamlet, casualties from a tidal wave could not have been large in number.

COOLIDGE SENIOR CHEERED BY SON'S SPEECH ON RADIO

The exchange of message climaxed a day in which the colonel improved greatly. Not only were the heart attacks less numerous and less severe, but the patients pulse was stronger and his appetite better.

TICKLE BABIES TO MAKE THEM STRONG, DOCTOR'S ADVICE

LONDON, Nov. 20.—"If you would have strong, healthy children, tickle them when they are babies and make them laugh." This is the advice of Sir Harry E. Bruce-Porter, a specialist in children's diseases and who is consulting physician to the American Red Cross in London. The advice was given before the members of the National Society of Day Nurseries. The eminent physician claimed that most of the cherished traditions of the nursery not only are fallacious but prejudicial to youngsters.

"It is a good thing to tickle babies," said Sir Harry, "It makes them laugh, and thus they expand their lungs and breathe fresh air."

Continuing his disserettion, Sir Harry contended that it was wrong in families where there are children to cease all noise when the babies are asleep. It was much better, he believed that the child should be prepared for the rough and tumble of later life through being allowed to sleep with noise going on everywhere.
