

What would you do without electricity?

Interesting essays have been written—pages long—describing the calamities that would happen if the world ran out of electricity.

Interesting—but idle.

The practical question is—what do you do with electricity?

Few homes have as many convenience outlets as every housewife wants—but they are easily and cheaply installed.

A vacuum cleaner—an electric sewing machine—a washing machine—an electric range—these take most of the drudgery out of housework.

Would you—if you could—do without electricity?

Electricity
is the cheapest service
you can buy.
