GOOD BUSINESS IS LOOKED FOR IN 1926

C. W. Nash, president of the Nash and Ajax motor companies, just back from California and the northwest, sees every indication of a continuance of good business on the Pacific coast and elsewhere throughout the balance of 1926. Mr. Nash, long regarded as one of the outstanding leaders and spokesmen of the automobile industry, declared in summing up the general business outlook that crop conditions together with "confidence inspired by the present administration at Washington," justify the optimism that seems present everywhere.

Speaking of the business situation as he found it on the Pacific coast Mr. Nash said: "I have never seen California in better condition than at the present time. Everywhere, up and down the state, there is a fine feeling of optimism. Ample rains and other suitable weather conditions, encouraging the farmers, fruit growers and business men generally, have stimulated healthy activity in practically all lines.

"This condition is noticeable also in Oregon and Washington and, in fact, throughout the entire northwest territory, including Montana, the Dakotas and Minnesota, all of which states I visited. Everywhere I encountered optimism, based on splendid prospects of a fine crop yield.

"Since returning to the factory I have made a careful analysis of reports from our dealers and distributors in all sections of the country with the result that I feel there will be a continuance of sound business, except perhaps in a few spotty places, throughout the balance of 1926. While the east and central west have encountered a backward spring, this apparently has not proved a serious obstacle. Trade in most lines is active. The south and southwest have been very active and with settled weather in sight the general prospects are extremely encouraging."

HANEY STRESSES SHIP ISSUES IN HIS CAMPAIGN

(Associated Press Leased Wire.)

PENDLETON, May 18.—Stressing the need of an American Merchant Marine, Bert E. Haney, former member of the United States Shipping Board and now a candidate for the Democratic nomination for United States senator, addressed Pendleton citizens last night upon the main plank in his platform.

Mr. Haney traced the history of American maritime ventures and showed his hearers where the merchant marine was the life blood of the nation. He showed them the reasons Americans could not compete with foreign shipping because of costs, wages and standards of living.

Regardless of the price, he sees a need for the merchant marine. He sees futures in China and South America for American produce carried in American bottoms.
