SCIENCE TRIES POWDER PROCESS ON NEW FOODS

ITHACA, N. Y., June 23.—G. W. Cavanaugh, professor of agricultural chemistry at Cornell University, is endeavoring to apply to other foods and food crops the methods by which milk is reduced to a powder containing all the nutritive properties of the fluid product.

He believes his experiments thus far indicate that means will be found to concentrate, and thus save, many perishables in which the percentage of loss is now very high.

Would Save Perishables. "One of the chief functions of agricultural chemistry," he said, "is to show man how to make the best possible use of his food after nature has done her part by growing it. If we can preserve foods by concentrating them rather than by using preservatives we will have made a great economic gain. It is towards these ends that we are working."

"Food crops when harvested contain certain constituents which should be preserved. Among these are proteins, fats, carbohydrates, bone-producing mineral salts, acids and vitamin oils which give flavor, digestive enzymes, and the important food accessories known as vitamins."

Fruits In All Seasons. "As an illustration, the study of the chemical, physical and biological properties of milk has resulted in the preparation of a dry milk in which the original constituents of the fluid are retained in an unchanged condition. This concentrated food, it has been found, can be shipped great distances and kept for a long period of time, and still retain the characteristics of its original state."

"By somewhat similar methods why would it not be possible and practicable to process fruits and grains so that the crops could be used in their entirety each year, making them available not only during the season but at other times, and assuring the farmer of a market for all he could raise?"

ANNUAL STOCKHOLDERS MEETING

The annual stockholders meeting of the U. M. Savings and Loan Association will be held at 248 North Jackson street, Roseburg, Oregon, at 7:30 p. m. Wednesday, June 23, 1926, for the purpose of electing directors for the ensuing year and such other business as may regularly come before the meeting.

Called this 11th day of June, 1926.

H. O. PARGETER, Secretary.

INSECT DAMAGE TO GRAIN REDUCED BY EARLY HARVESTING, FUMIGATION

It is best to harvest grain crops as soon as possible after maturity and to fumigate them properly in order to kill any stored-grain insects, says the United States department of agriculture. Farmers who suffer enormous losses from insect damage to grain. Farmers' Bulletin 1183-F, just issued, brings out many interesting facts relative to the causes and extent of insect infestation of grain.

The idea that insects develop from the germ of grain, although long since discarded, still persists among grain handlers and producers. The fact is, says the department, that grain often becomes infested before it is harvested. The rice weevil and the Anthonomus grain weevil live over the winter in the grain bins. By the nearby fields of ripening wheat and corn a sthese are bearing maturity, and lay eggs upon the wheat heads or corn kernels. These eggs hatch and the young pests burrow into the immature grain.

Illustrations are given in the bulletin of corn cobs designed to permit effective fumigation and treatment of grain for their destruction. The most successful grain fumigations are carried on at temperatures ranging from 75 degrees to 95 degrees F.

The new publication also discusses the fumigation of grain with heavier-than-air gases, effect of fumigation of seed, heating grain, and other related topics. A copy of the bulletin may be obtained free on loan after the supply last, by writing to the United States department of agriculture, Washington, D. C.

Studebaker builds no yearly models. LUMBERMEN APPRECIATE GOVERNMENT'S ACTION

SEATTLE, June 22.—Friendly appreciation of the government's action through the department of commerce in appointing E. A. Selfridge, Jr. of San Francisco, as timber trade commissioner at Tokio, Japan, was expressed today

ISSUE OF "REFLECTOR" IS TRULY A FAMILY JOURNAL

SEATTLE, June 23.—Published by W. E. Hiquet, his wife, and their nine children, the Lake Washington Reflector of Bellevue, near here, is a real family journal.

Under the direction of Sylvia, 14, who is foreman and assistant manager, seven of the children set type and print the tri-monthly issues. Gloria, 13, is the composition type setter, hoisting four sticks full in an hour. Janet, 5, printer's devil, folds the sheets on press day and can already set her name in capital letters.

Mrs. Le Hiquet collects and writes the editorials and manages the business department.

House paint for any kind of job. We handle Purdy brushes. A quart of good floor paint for \$1. Varnish that will not turn white. Powell's Hardware.

Flashes of Life

MAMARONECK, N. Y.—Nathan Straus, philanthropist, thinks that if wealthy people in good health would follow the generous example of the Rockefeller in relieving suffering, it would add much to their happiness. He quotes the proverb: "What you give in health is gold; what you give in sickness is silver; what you give after death is lead."

ATLANTIC CITY, N. J.—One bride believes it is more blessed to give than to receive. Each of seven hundred hotel employees when wishing Dr. and Mrs. Daniel J. McCarthy happiness, received a ten-dollar gold piece in an envelope inscribed: "From Elizabeth White with her wedding day best wishes." Mrs. McCarthy is the daughter of one of the owners of the Marlborough Bleheim.

CHICAGO—Full text of an interview with Governor Al. Smith: "Yes."

DENVER, Colo.—The Rev. Hugh L. McClellan thinks Chicago needs just such a spiritual awakening as it is receiving. He has written that thieves entered his hotel room and robbed him of \$150 while he slept the sleep of the innocent and just.

WASHINGTON—Wets take note: Official figures show the consumption of milk to be breaking all records.

SCHENECTADY, N. Y.—Some folks who entertained a gentleman representing himself as Baron George Von Krupp, of the famous German family, are regretting it. One of his checks has been returned as worthless.

NEW YORK—Accused of having hooded George Harvey, "English Bob" McCormack in the tolls. He was smartly clad, wore a cane with English accent. Mrs. Mary Johnson, his landlady is out \$500.

GREIZE, Saxony.—The Germans like cylinders. There are the rotor ships, and now dwellings are being built in cylindrical shape to solve the housing problem. They are comfortable and cheap.

NEW YORK—The Yale crew of '26 wants to row the crew of '25 on the Styx 100 yards hence. Timekeeper—Charon. Trophies—Asbestos shirts.

SACRAMENTO—Why do worms leave home? George H. Forbes of San Jose who raises angle worms for the fish and bait market writes to G. H. Fowler, director of agriculture, says that his stock of worms are restless, "scrape during the night." He wants Hecke to tell him how to make worms happy.

SAN RAFAEL—Fred E. Grainger, Oakland merchant, lost his life yesterday when he attempted to rescue his daughter, Joan, 16, who went overboard with the Grainger automobile at the Richmond-San Rafael ferry pier. Mrs. Essie Grainger, wife and mother, was rescued.

SAN FRANCISCO—A water company may charge \$1.25 per family with 25 cents per month extra for each extra, but the same method may not be used for each additional child, the state railroad commission told Paul Hunter, owner of a water company at Fortuna, Humboldt county, when he sought to increase water rates on that basis.

SANTA CRUZ—Two students operating an old game new to Manuel Espindola obtained \$2500 from him yesterday. Both strangers told Manuel they wanted to hire him to give away their money. Then he was invited to pit in

Attention—Annual Legion and Legion Auxiliary picnic

to be held Thursday evening, June 24th at Alexander's Park. All members invited. For further information call 316-R.

Lumbermen have wanted an impartial lumber expert in the Japanese field for a long time, stated the bureau, for the great benefit which they expected would result in increasing, through friendly arrangement, the amount of Douglas fir west coast hemlock and western red cedar the Japanese might buy. Japan, according to the bureau, now buys approximately 600 million feet of lumber from Oregon, Washington and British Columbia and is the largest foreign purchaser of American forest products.

Shippers long experienced in the Japanese trade have told the bureau that the above figure could be increased probably 25 per cent by a reasonable amount of trade promotion work. These believe that the appointment of an experienced lumberman like Selfridge will serve to stimulate lumber buying throughout the Orient and make this heavy branch of their export trade more stable and profitable.

See our large stock of dry nature flies, they work wonders in fooling the fish. We carry large line of fishing tackle at Powell's Hardware.

GILA DAM WILL OPEN UP 150,000 ACRES TO CROPS

FLORENCE, Ariz., June 23.—A half-century old debt owed the Pima Indians by the United States government will be paid with the construction of the Coolidge dam on the Gila river, about fifty miles east of here. Government engineers are ready to begin construction.

Eighty thousand acres of land will be irrigated by the dam which will be the first so-called "dome-type" to be built. Half of this acreage will be cultivated by the Pima Indians of the Gila river reservation, whose once prosperous fields were rendered unproductive by diversion of water from the Gila by settlers on the upper stretches of the stream.

The dam itself will create an opportunity for land development such as attended the building of the Roosevelt dam in 1912. The Coolidge dam will rise 220 feet above the bed of the river and have a total length across the top of about 1,000 feet. It will impound 1,200,000 acre feet of water.

Engineer claim that at least 150,000 acres of land in this district are susceptible to reclamation. Granges, cotton, figs, dates and other semi-tropical crops can be raised. Six harvests of alfalfa may be obtained during a single year.

NOTICE: Bids will be opened July 8, 1926 for audit of School Clerk's books of Douglas County, Board reserves right to reject any and all bids. Signed, Mrs. Edith S. Aekert, Secretary of Board of Education.

WYOMING WAS EARLY IN GIVING VOICE TO WOMEN

CHEYENNE, Wyo., June 23.—"Petitest government" has had a long way in Wyoming. From the time Wyoming became a territory in 1890 blazed the way for woman's suffrage by enacting an equal suffrage law, which later was enacted into a state statute, women have played many varied roles in its government.

The appointment of Mrs. Esther Morris in 1869 by the territorial government as the first woman justice of the peace in the United States, culminated in 1924 with the election of Mrs. Nellie Taylor Ross, the first woman governor.

Other milestones in woman's progress in public life have been marked in Wyoming by the selection of the first jury in which women served at Laramie, Wyo., in 1870; the election of Mrs. Estelle Reed Meyer in 1894 as state superintendent of public instruction, who is now the general superintendent of Indian schools, and the operation of the entire municipal government by women of Jackson in 1920 and Cokeville in 1922.

BURNS: Cover with wet baking soda— afterwards apply gently— VICKS VAPORUB Over 17 Million Jars Used Yearly

GRASS VALLEY—When an air compressor he was operating burst, Allen D. Anderson, 26, was killed. He was working at the Lake Fordyce Power dam of the Pacific Gas and Electric company, 50 miles east of here.

SAN FRANCISCO—Major Douglas A. Francis, Palo Alto and Mrs. Amy Gilman, were critically injured last night when the auto in which they were riding reached the Alherton crossing simultaneously with the Shore Line Limited. Both are in a Palo Alto hospital.

LOS ANGELES—D. Barr of San Diego today had before the coroner here a letter saying that he held a photograph of a torn taken at the Venice pier June 12. The torn is that of Almee Semple McPherson, Barr believes. The coroner has not commented on the letter.

SACRAMENTO—The last of the old tin drinking cups are being hoisted out of existence. The state board of health field workers spy a cup and paste on it a label reading: "Don't drink from this cup—it may carry disease."

GARDONE, Italy—Gabriele d'Annunzio's wife, from whom he has been separated thirty years, visits him occasionally. She came from Paris to help in a ceremony relating to an authorized edition of his books. And he has ceased his literary-monastic solitude. As part of the ceremony he boarded his miniature warship and fired a salute of five guns.

NEW YORK—A. E. Lefcourt has come up in the world quite a bit since he sold newspapers. Already owner of four Broadway corners, he has just bought the Consolidated Stock Exchange for \$1,400,000 and will tear it down to erect a \$10,000,000 skyscraper.

LONDON—Coroner Oddie has been doing some moralizing on the suicide of Mile. Flory, French actress. His official finding is that her death was penalty of a life that was one thrill of excitement. Women of her type, if they cannot get what they want, sink and shoot themselves, he notes.

NEW YORK—Views of Otto H. Kahn, banker, on American women: More vocative and more subtle than man; no man can fool them. As for charges they are frivolous, spoiled and self-centered, they are none of these things.

PASSAIC, N. J.—Josephine Grabow and Elizabeth Kratnowski have gone to jail to save their dogs' lives. The sentences were pronounced on destruction of the unleashed dogs when the girls refused to pay fines. Cash of friends opened the cell doors after a few hours.

NEW YORK—Peaches Homan Browning has to observe her sixteenth birthday tonight by receiving a loving cup from the Victory club at a Venetian feast. She won a millionnaire.

PHILADELPHIA—Styie is news and news also overnight; therefore advertise women's clothes in the daily newspapers—advise by Miss Grace Walton of New York.

QUINCY, Mass.—Having built a big boat here, Uncle Sam is now perplexed about getting it where it will be of use—in the ocean. The airplane carrier Lexington draws more than 30 feet and the channel at best is six inches shy of that.

CONSTIPATED? LYDIA E. PINKHAM'S Pills for Constipation. A reliable laxative for the whole family. Buy in bulk or by the case. Prepared by Lydia E. Pinkham Medicine Company, Lynn, Mass.

No, we are not out!

Of Binder Twine at \$7.25. And it is a good, smooth, high-grade twine. "Cheapest by the foot."

Place your orders now for grain sacks. Buy your old crop flour while it lasts, \$8.60 per barrel.

MEXICAN ARID LAND MADE PRODUCTIVE BY ITALIANS

NOGALES, Ariz., June 23.—Transferring 5,000 acres of arid, unproductive land in the heart of the Sonora river delta, state of Sonora, Mexico, into a farmer's paradise has been the feat of a man named by the name of an Italian colony of Italian, and in a space of seven years.

The settlers have built a thriving little community and have constructed twenty miles of substantial canals, canals and drains. The Italians have raised 150 crops a year on necrotic waste lands, including those of beans and corn (in December and January) and wheat in a project to plant grape vineyards.

HIGH SOUNDING NAME USED FOR BIG FRAUD

Ever hear of bacteriological fertilizer for plants? It sounds big as described by an agent, but is of little or no value," says G. H. Hyson, agronomist of the Oregon experiment station.

Last year a Portland dealer, who had an opportunity to engage in the selling of a sort of "bacteriological fertilizer," called at the station, and asked that the material be tried on some crops.

Some months later the dealer returned and viewed the results of the experiment. It was readily apparent that absolutely no good had been done by the material. "The plants did not grow bigger, faster or better. Consequently it was worthless as a material for any legitimate concern to soil, and worthless also for farm application. This result checked with some results recently reported by the department of agriculture. Because of this, farmers were warned against the purchase of bacteriological preparations, that are said to contain a number of different types of bacteria, whose activity in the soil is supposed to produce a considerable amount of available plant food.

This, of course, should not be confused with the inoculating bacteria are not present, it is doubtful that are supplied by the inoculating station, and by a number of reputable bacteriological laboratories. These require inoculating cultures, when applied to the seed or soil, are very useful in inoculating fields where the right kind of bacteria are not present. It is doubtful, of course, if they receive any useful purpose where that crop has been grown in recent years, but in many of the newer sections where legumes have not been commonly grown, an alfalfa in many sections of the Willamette valley, and vetch in many of the sections of the coast, the inoculating bacteria are useful.
