PROCEEDINGS INSTITUTED AGAINST POWER COMPANY

SALEM, Ore., July 5.—The public service commission today instituted, through the district attorney of Grant county, penalty proceedings against the Prairie power company of Prairie City, because of the company's failure to furnish power in Canyon City. There is a statutory provision, whereby the company would be liable for a penalty of \$100 to \$10,000 for a penalty of \$100 to \$10,000 to be paid the state, and also for treble damages to users who are injured.

HUGE BOND ISSUE TO AID LONG BELL LUMBER PROJECTS

(Associated Press Leased Wire.)
CHICAGO, July 5.—Completion of the financial program of the Long Bell Lumber company, the world's largest lumber manufacturer and distributor under single ownership, is to be effected today. The final step is the offering of \$8,720,000 first mortgage 6 per cent sinking fund bonds.

Chas. Stewart and company are the head of a banking group which is offering the bonds at 97 and interest yielding about 6.25 per cent. The new issue is made up of \$720,000 of bonds due in 1943 and \$8,000,000 due in 1946.

Eventual moving of the principal plants of the company from Louisiana and Texas to the Pacific northwest is contemplated. The company's southern mills are still in operation, but they will be closed down as timber is exhausted.

STREET CONDITION CAUSING PROTESTS FROM RESIDENTS

Residents of Pitzer, Fowler and Court streets are making a vigorous protest against the condition of those streets. They maintain that the pavements were patched and given a surface coat of tar, which in hot weather melts and becomes so sticky that cars pull up large sections of the surface, while one resident's car was stuck in the soft tar for a time. The constant tracking in of asphalt to the damage of porches and rugs, is exasperating housewives, it is claimed. The city council will probably be asked to see that the streets are sandied to prevent further difficulties.

It's unreasonable to expect a good nickel collar when bay is selling at present prices. And when cotton brings a figure the growers like, you shouldn't look for low prices on all-wool-clothing, olive oil or silk stockings. But regardless of market conditions, you can always expect a REAL buy in a GOOD used car here. And you can always get it.

FOREST INN WILL BE U. S. CAPITOL FOR SHORT TIME

Coolidge Off for Vacation
in Adirondacks—100
Marines to Guard
Headquarters.

(Associated Press Leased Wire.)
WASHINGTON, July 6.—President and Mrs. Coolidge will leave today for their vacation in the Adirondacks.

Timing their departure so they will arrive in the morning, they will go by special train to Paul Smith's, N. Y., and proceed from there by automobile four miles through the forest of spruce, pine and birch to White Pines, the luxurious camp on Lake Osgood, which will be the "summer White House."

Preparations for the trip have been in progress several weeks, and everything is in readiness for the reception of the president's party, which will include Everett Sanders, his secretary; Edward T. Clark, his personal secretary, confidential clerks and executive office attaches, the secret service men assigned to guard the executive and his wife, and a dozen or more White House servants.

Summer executive offices have been established in the Paul Smith's Hotel and 100 marines have been detailed to guard the camp during the president's stay. Since a number of cottages are included among the 30 structures which make up the camp, ample accommodations are available for those who will spend the summer there and for guests Mr. and Mrs. Coolidge entertain.

White Pines was created by William G. Massarene for the late Archibald White, New York banker, largely out of local materials and the architectural lore of centuries to fit harmoniously in a primitive setting without sacrificing any of the comforts evolved by civilization. More than ten years of planning and labor went into the ten-acre reservation and at Mr. White's death it was purchased by Irwin B. Kirkwood, publisher of the Kansas City Star, who has turned it over to the president for the summer.

Can you imagine what would happen if we strike oil in Sutherland Valley?

FIRES DESTROY 2 BIG ACRES OF UMATILLA GRAIN

(Associated Press Leased Wire.)
PENDLETON, Ore., July 6.—Fire which started from the back firing of a combine destroyed 120 acres of standing grain, 60 acres of sacked grain, a barn of hay and the combine on two ranches in the Dry Creek region south of Milton yesterday. The fire was checked by use of tractor plows. The grain was insured.

Sparks from a railroad engine are thought to have caused another fire which burned 140 acres of grain east of the Indian reservation last night. The grain burned are more than two hours and 200 people assisted in putting it out. The grain was insured. The ranch belongs to Gilbert Temple.

KITCHEN CUPBOARD

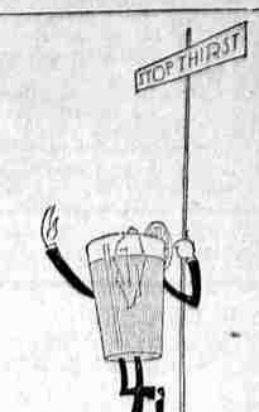

By NELLIE MAXWELL

Some Good Things

English Bath Buns.—Dissolve one cupful of compressed yeast, blended with a little cold water. Add the grated rind of a lemon. Sift four cupfuls of bread flour with one grated nutmeg, and one tablespoonful of salt, mix with two tablespoonfuls of sugar and add the liquid ingredients. Mix to a soft dough, omitting some of the flour if it seems too stiff. Add two or three tablespoonfuls of finely shredded citron, let rise until it has doubled in bulk, then form into twelve round buns, place on a baking pan, let rise again until light and bake in a moderate oven for twenty minutes. Shortly before removing them from the oven, brush the tops with beaten egg, dust with sugar and a few bits of chopped nuts or citron.

Fricassee of Carrots.—Boil or steam three or four large carrots. Grate two medium-sized onions and brown in one-half cupful of butter, stirring until evenly colored and quite a deep brown. Cut the carrots into slices one-fourth inch thick; add to the pan and cook until thickly browned. Drain the whole with two tablespoonfuls of flour, mixed with one teaspoonful of pepper; stir, add a cupful of rich stock, let the whole come to a boil, and serve garnished with minced parsley.

Shrimp and Fish Timbales.—Butter timbales made with thin slices with shrimps split into halves. Then fill the cups with the following: Two cupfuls of milk, three eggs lightly beaten, one cupful each of shrimps and shredded halibut. Set in water to cook until the custard sets. Serve with tomato sauce in cream sauce to which four tablespoonfuls of grated horseradish squeezed from the vinegar is added. (© 1925, Western Newspaper Union.)

MONEY JUDGMENTS HAVE BAD DAY IN SUPREME COURT

(Associated Press Leased Wire.)
SALEM, Ore., July 6.—A breach of promise judgment obtained by Adela Vnuk of Portland against Dr. Fred V. Fattig of that city is quashed by the supreme court today in reversing the decree of Judge George Rossman of the lower court for Multnomah county. The case did not involve any element of seduction. The woman was allowed \$5,000 and cost in the lower courts.

A slander judgment of \$20,000 obtained by Dr. H. S. Mount of Oregon City against Dr. O. A. Aveson and other physicians at that city is cut to \$9,000 in an opinion of the supreme court modifying the decree of Judge Herbert G. Morrow, who presided in the lower court for Clatsop county. The case arose out of a protest by the other physicians against the county paying an autopsy fee to Mount. The letter of protest was published and was followed by the slander suit.

The supreme court in an opinion by Justice Burnett quashed a writ of review in the case of the state ex rel District Attorney John Carson of Marion county against Secretary of State Koezer, in which W. S. U'Hen and C. C. Chapman sought to have a change made in the nation rate of the tobacco tax bill, which was reterced to the people, to be voted on in November.

All wealth comes from the earth. Take a tip. Buy a lot in Sutherland.

Back From Trip.—Dr. E. V. Hoover, wife and daughter, have returned from a three-day auto trip, which took them to Ashland, Klamath Falls, Crater Lake, Diamond Lake, Bend and over the McKenzie Pass back to Roseburg. Dr. Hoover is very anxious to see more impetus placed on the North Umpqua road project. When the Dalles-Columbia highway is opened, the North Umpqua highway, forming an outlet to the coast, is most important proposition in his opinion, and he says that he would like to see more activity in efforts to have this road completed.

FARM NEWS

FARM REMINDERS

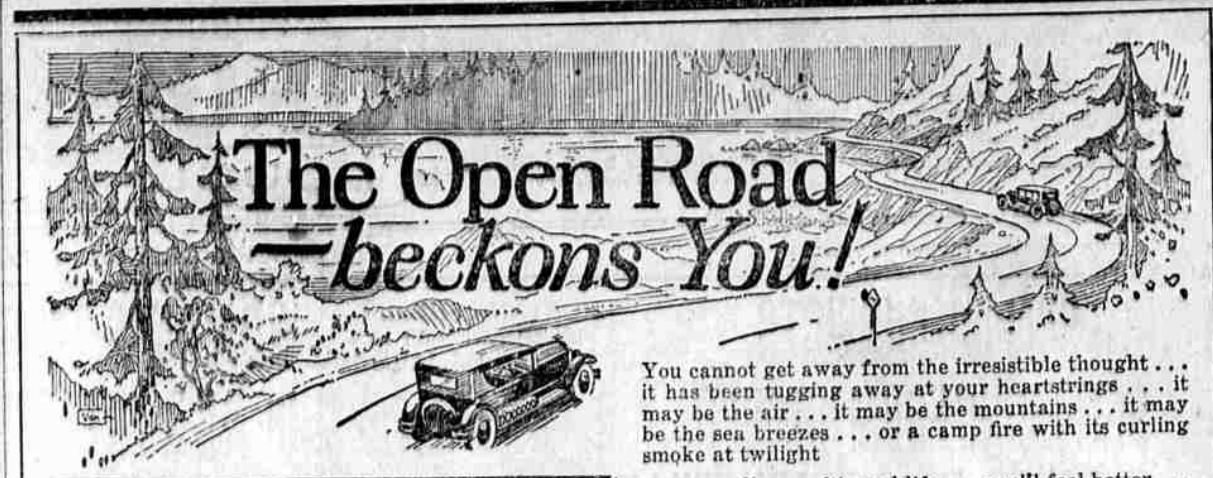

Small yellow masses beneath the skin of tows is the result of irritation by a small skin mite, reports the O. A. C. experiment station. The mite burrows under the skin to lay its eggs, then dies and is absorbed. The lime containing masses left at the point of absorption do not injure the carcass for human consumption.

Oregon ferns are sometimes freed of the little green plant lice by frequent syringing with water under slight pressure—25 pounds—but the nicotine sulfate spray is the standard treatment; says the experiment station. Dousing with nicotine sulfate or tobacco dust is reported as effective.

Use of hygrometers now on the markets to determine the moisture content of air in the egg chamber is not recommended by A. G. Linn, head of poultry at the Oregon experiment station. They have not been worked out accurately and are of little or no value. Correct reading of the wet bulb thermometer requires agitation of the air, impractical in small incubators. In large air-circulation machines standard hygrometers may conceivably be used successfully.

Weak bee colonies infected with foulbrood are destroyed by successful Oregon beesmen, including H. A. Scullen, bee specialist of the experiment station. The control method preferred for strong colonies is requeening with a queen cell from a high grade Italian queen.

Blood spots in eggs are due to various causes, and often are not serious so far as the flock is concerned, says the Oregon state college experiment station. Such spots are found quite commonly in eggs from commercial flocks, and unless in unusual numbers call for no change in management. If they do appear in larger numbers, examination of the ration to find whether there is not something wrong with it is recommended. The cause is sometimes feeding of condimental foods such as pepper.

THIS WEEK'S SPECIALS

- 2-Gallon Water Bag**
You can hang it anywhere. It will keep the water cool. Style (b), sanitary type, has spout and stopper. Price reduced this week only to **\$1.17**
- Folding Skillet**

LOCAL TEACHER ATTENDS O. A. C. SUMMER COURSE

OREGON AGRICULTURAL COLLEGE, Corvallis, Ore., July 6.—H. M. Moreland, Smith-Hughes agricultural teacher in the Roseburg high school attended the annual conference of agricultural teachers here July 1-3, when many problems of the profession were discussed and plans were made for the next school year. E. E. Elliott, state director of vocational education and H. H. Gibson, professor of agricultural education were in charge of the sessions. W. T. Spanton, federal agent of vocational education for the western section, attended the conference.

Nearly 30 agricultural teachers from all parts of the state attended the conference. Many will remain to take the course in farm mechanics given by J. G. Dent, professor of agricultural engineering at the University of Minnesota. The course is being given to teachers of agriculture upon the suggestion of the state director of vocational education.

The total federal, state and local expenditures for Smith-Hughes agriculture in the high schools of Oregon last year was \$75,000 according to the annual report. The total net income from farm projects conducted by the agricultural students equaled the total expenditures, however, as shown from the summary of the students' project books. More than 950 students were registered last year in the 29 departments in the state. There will be three additional departments opened next year.

Problems that received the attention of the teachers included marketing of farm products, part-time classes for boys out of school, evening classes for adult farmers and classification of vocational departments for purposes of reimbursement. A plan is being worked out whereby departments will be reimbursed with state and federal funds in future according to the general efficiency of each department. That such a method is necessary because federal appropriations will remain stationary after this year, was pointed out by Mr. Elliott.

Evening classes for adult farmers will be more numerous in the future according to present policy. Successful work in several localities along this line has proved that there is a demand for the work. Part-time classes for boys out of school will receive more attention in the future also.

The conference members were treated to a supper picnic at Colored lake on Friday evening by Professor and Mrs. H. H. Gibson.

Single loop bale ties for \$2.50 a bundle, cash price, at Wharton Bros.

PILES

Eliminate the Summer Misery
WHY endure the galling discomfort of chronic Piles throughout another summer? The hot weather will intensify your suffering. I can eliminate that certain misery, cure you a WRITTEN GUARANTEE to give you Piles or refund your fee. No hospital operation, no confinement, no retention from work. My celebrated treatment is soothing, mild, safe; the cure rapid. Send today for my 100-page illustrated Book telling about my treatment for Piles and other Rectal and Colon ailments. It's FREE.

MRS. CHAS. SPAUGH FORMER RESIDENT KILLED AT BEND

Mrs. Charles Spaugh, for many years a resident of Roseburg, and well known here, was killed yesterday in an automobile accident at Bend, where she resides, according to word received by her sister, Mrs. J. B. Argabright. Details of the accident were not learned. Mrs. Spaugh formerly resided at Looking Glass, but left there about fifteen years ago. When her husband obtained employment at Bend, she has, how-

ever, been a frequent visitor in this city since that time and has numerous friends and relatives who are grieved to learn of her death.

MILLWOOD COUPLE MARRIED

C. C. Briggs and Hazel E. Briggs of Millwood, were married on Saturday at the court house, County Judge Quine officiating. Mr. and Mrs. Briggs were divorced several years ago but have been reconciled and were married for the second time. They will make their home at Millwood where Mr. Briggs is employed as a logger and farmer.
