

# THE SAN FRANCISCO BANK

One Hundred and Nineteenth Half Yearly Report  
INCORPORATED FEBRUARY 10th, 1906  
One of the Oldest Banks in California,  
the Assets of which have never been increased  
by mergers or consolidations with other Banks

ASSETS—

United States Bonds, State, Municipal and Other Bonds and Securities (total value \$34,565,768.52), standing on books at	\$31,034,977.14
Loans on Real Estate, secured by first mortgages	70,366,635.05
Loans on Bonds and Stocks and other Securities	2,003,066.35
Bank Buildings and Lots, main and branch offices (value over \$1,885,000.00), standing on books at	1.00
Other Real Estate (value over \$65,000.00), standing on books at	1.00
Employees' Pension Fund (value over \$575,000.00), standing on books at	1.00
Cash on hand and checks on Federal Reserve and other Banks	10,521,150.00
<b>Total</b>	<b>\$113,925,831.54</b>

LIABILITIES—

Due Depositors	\$109,225,831.54
Capital actually paid up	1,000,000.00
Reserve and Contingent Funds	3,700,000.00
<b>Total</b>	<b>\$113,925,831.54</b>

GEO. TOURNY, President  
A. H. MULLER, Vice-President and Manager.  
Subscribed and sworn to before me this 30th day of June, 1927.  
(SEAL) O. A. EGGERS, Notary Public.

A Dividend to Depositors of FOUR AND ONE-QUARTER (4 1/4) per cent per annum was declared, Interest COMPUTED MONTHLY and COMPOUNDED QUARTERLY, AND WHICH MAY BE WITHDRAWN QUARTERLY.  
Deposits made on or before July 11th, 1927, will earn interest from July 1st, 1927.

## SPORTS POINT WAY TO PEACE OF THE WORLD

### Friendly Athletic Rivalry Kills Racial Hatreds, Educator Says

## MISSION OF SCHOOLS

### Contacts of Professional and Social Nature Are Held Necessary to Understanding

SEATTLE, Wash., July 5.—By developing "sporting blood" the American schools can do more than any other influence to break down national jealousies and racial hatreds, Augustus O. Thomas, president of the World Federation of Education associations, declared before the National Education association here today.

Referring to the New York to Paris non-stop flight of Colonel Charles A. Lindbergh, Mr. Thomas asserted that the "sporting" trait of the French people made them forget the obnoxious debt issue when Colonel Charles A. Lindbergh landed at Le Bourget.

"Sporting blood is the most common blood of the human race and should be utilized in bringing about international understandings and in relieving national jealousies and racial hatreds," Mr. Thomas said. "We seldom have a trouble with a good sportsman. It is a trait worth cultivating. Through this element we are closer to the French people today than we have been since the Armistice."

## Prejudice Bane Peace

"Much international trouble comes from intellectual rather than economic or political difficulties. The sporting element is closely allied to the social side of life. We need to cultivate each other in order to clear away misunderstandings. Misunderstandings cause hatreds and hatreds stand in the way of peace."

"Our schools can do more than any other influence to break down the wall of prejudice. The sporting sense should be developed. It is the 'goodness' which is the basis of which we can break into the walls of prejudice. It will strip the mask of deceit from the face of racial and national jealousies."

## Contact Needed

"If the nations can be brought together and can find a common interest to absorb their attention, they would make more wholesome treaties on economic and diplomatic issues. Baseball enthusiasts can visit all night about their famous players and the great games they have witnessed. Golf players have a common topic to cement friendships. Connoisseurs of auto quilts never tire of each other. Many lasting friendships have been found on the 'links,' 'golf courses' and the diamonds."

## Better Speech Urged

The elimination of the social and vocational handicap of speech defects through special corrective training in the public schools was urged by Miss Alice Liljgren.

Miss Liljgren is supervisor of speech correction in the public schools of Omaha, Nebraska. "Statistics indicate that there are half a million children in our schools who have speech defects," she said. "The speech defect handicap is largely unnecessary. European schools have demonstrated that over 90 per cent of all defect cases are curable, our own experience in the Omaha schools verifies this statement."

"The only remedy for speech defects is re-education in speech habits, therefore, the correction of speech defects is an educational problem."

"Vocationally the speech defective is barred from many of the professions and from many forms of business, his competency is lowered in any occupation. Socially the speech defective is even more seriously handicapped. A speech defect is often the direct cause of permanent defects of character which cause serious social maladjustments."

## COLORADO FOSSIL PRINTS MILLIONS OF YEARS IN AGE

(Associated Press Leased Wire.)  
WASHINGTON, July 5.—Fossil foot prints of prehistoric animals impressed in rock slabs have been brought from the Grand Canyon of the Colorado to the National Museum by Charles W. Gilmore, curator of vertebrate paleontology. The prints were made 25,000,000 to 30,000,000 years ago, he said. The animals were probably reptiles or amphibians, 7 or 8 feet long, living before the dinosaur, according to Mr. Gilmore, although

## End that kitchen rush Quick Quaker Cooks in 2 1/2 to 5 minutes

FOR hurried mothers, there is no breakfast that compares with Quick Quaker. It's faster than plain toast.

No breakfast rush, no fuss, no bother. Provides the excellently balanced breakfast ration of protein, carbohydrates and vitamins — plus the "bulk" to make laxatives less often needed—that doctors urge for everyone today.

All the rich Quaker flavor is there. You will like it.

Your grocer has Quick Quaker—also Quaker Oats as you have always known them.

## Quick Quaker

the canyon failed to reveal any skeleton to which the prints would conform. They were made in mud or sand in the perianth geological age, he said, and were found in layers from 1,000 to 1,800 feet below the surface, the various layers showing prints of different and distinct animals and each layer marking a separation of thousands of years. The collection of slabs weighs more than half a ton.

## ELECTRIC AGE OF FARMING DAWNS IN HALF OF STATES

MINNEAPOLIS, July 5.—The age of electricity is dawning rapidly on the farm.

Four years ago the University of Minnesota established the first rural electrification project in the nation at Red Wing, Minn. Today there are 25 such projects in many states, all experimenting with the application of electric energy to the tasks of agriculture.

Farmers in more than a score of states, says Prof. E. A. Stewart, supervisor of the Red Wing station, are using electricity to operate threshing machines, ensilage cutters, pumps, hay lifts, barn ventilators, feed grinders, milking machines, saws, grain cleaners, root cutters and refrigerators, as well as household devices.

Outstanding developments, Stewart says, are the successful application of electrical power to dairy barn ventilation, to dairy refrigeration and to poultry raising.

Refrigeration is becoming a vital problem on dairy farms. Sewer points out that lately the farmer has begun to refrigerate his products by putting them into a pit at the bottom of a well rope. But now dairy farming is becoming a big business—it neared the \$200,000,000 mark last year in Minnesota—and more elaborate cooling systems are demanded. Engineers at the Red Wing station are working on a refrigerator designed exclusively for farm use.

Minnesota poultry farms doing annual business approximating \$100,000 are experimenting with electrical devices, according to Stewart, and have already found that electrically-heated incubators produce high percentage hatches of well-developed chicks, and that the electric lighting of poultry houses during the winter increases egg production by four or five eggs a month for each hen.

## POULTRY COST SURVEYS BEING MADE FOR OREGON

The cost of producing commercial eggs and factors influencing this cost is being surveyed by the Oregon experiment station. The purpose is to determine what factors have a major influence on cost and how these can be controlled to reduce it.

This study is to be carried on for three years, and is to cover approximately 150 farms on which commercial egg production is a major enterprise. The facts as recorded in the field records are now being compiled by the department of farm management and a progressive report of preliminary findings will be available early in the fall.

A collection of 140 records was obtained in the winter months by A. S. Burrier, assistant in farm management, and F. L. Knowlton, county husbandman. Each of those records was obtained by a personal interview with a farm operator and covers a complete record of his poultry expenses and receipts and poultry management practices. The records were taken on farms selected with the assistance of leading poultrymen and county agricultural agents, and are believed to be representative of conditions throughout the region covered.

The sections covered include Deschutes and Umatilla counties in eastern Oregon, Clatsop and Columbia counties in the Willamette valley, and Douglas county, county agricultural agents, and are believed to be representative of conditions throughout the region covered.

## SPECIAL PROGRAM TO BE PRESENTED FORUM LUNCHEON

The Chamber of Commerce forum luncheon tomorrow is to feature a civic development program. There are a number of important projects proposed for the development of Roseburg and the nearby community and the program will be given over to a discussion of these matters. Dr. E. B. Stewart, president of the chamber of commerce will be in charge and there will be several speakers who will discuss the issues which may be formulated into an outline of development activity.

In connection with the discussion there will be a short program given by Miss Smith, advance representative of the Ellison-White chautauqua. She will entertain with songs and readings assisted at the piano by Frances Lintott.

McCormick binding twine will work in any binder. Sold by Wharton Bros.

## CITY TO VOTE BY WARDS ON BRIDGE ISSUE

(Continued from page 1.)

and the necessary approaches, retaining the sidewalks, paving and sidewalks, and retaining the levying of taxes to pay the principal and interest of said bonds, as provided by Ordinance No. 907.

Vote "Yes" or "No."  
500—Yes.  
501—No.

The bridge question is one which has been given much consideration by the city council. The city is faced with a proposition of either repairing the present bridge and issuing interest bearing warrants to pay the cost allowing these to continue drawing interest indefinitely, and at the same time to continue paying a heavy yearly maintenance cost to keep up a structure too light and too narrow to adequately handle traffic, or erect a modern bridge, good for a half century at least, with a system for retiring the bonds in a few years.

The proposition is purely a business one bearing at the same time an important phase of city development and progress.

Our cow spray kills the flies. Sold in any quantity at Wharton Bros.

## DEMENTED MAN PICKED UP EAST OF CITY

A man giving the name of E. Erickson was picked up yesterday evening in a mentally unbalanced condition. The man was exhausted by a long trip by auto stage and in that condition became possessed of hallucinations which caused him to wander off into the hills. A search was made for him, headed by the stage driver who brought him to Roseburg, the man being found near the reservoir east of the city. He was placed in the city jail and this morning his condition was improved to such an extent that it was decided to allow him to continue on his trip.

## BIG CROWD AT BROCKWAY FOR CELEBRATION MONDAY

A huge crowd attended the old-fashioned Fourth of July celebration at Brockway yesterday. The program was presented jointly by the Dillard and Brockway communities and proved to be very enjoyable. The day was crowded with interesting amusements, contests, games, etc., one of the most enjoyable features being a picnic dinner at noon. The baseball game between Dillard and Glendale resulted in a victory for the Glendale team.

## SHAMEFUL TASK

SPRINGFIELD, Ill.—Late one night, A. M. Ut, one-armed man, was stopped by a bandit. Told to "strik 'em up," he replied that he had only one to stick up. "Aint you ashamed to rob a one-armed man?" asked Ut.

Said the bandit: "I never was so mortified in my life, but business is business."

## You Can Make This Mayonnaise in 10 minutes

FOLLOW this recipe and convince yourself that delicious Mayonnaise is easily and quickly made and that the world affords no finer oil than Mazola for all salad dressings—regardless of price.

- 1/2 teaspoon salt
- 1/2 teaspoon pepper
- 1 teaspoon Kuro, Red Label
- 1 Egg
- 3 tablespoons vinegar
- 1 1/2 to 2 cups Mazola according to thickness desired

Put the seasonings in a small deep bowl, beat in the egg, add the vinegar, stir until mixed and gradually beat in the Mazola, using a wheel egg beater. Start with one-half teaspoon oil—when the mayonnaise has begun to thicken, add it a tablespoonful at a time. When done, beat in one tablespoon boiling water.

## MAZOLA

Send only 10c (stamps or coin) with this coupon and you will receive a copy of Ida Bailey Allen's wonderful new Book, attractively bound, containing 112 pages of unusual recipes. Write Johnson Lister Company, Trade Building, Portland, Ore.

## for Perfect Salads

## JOINT FESTIVAL HELD BY 3 TRIBES NEAR PENDELTON

(Associated Press Leased Wire.)  
PENDLETON, Ore., July 5.—In the midst of a primitive Indian village at Cayuse, where Umatilla, Walla Walla and Cayuse tribes are gathered for their annual summer festival, a modern dance pavilion and jazz orchestra is viewing with the ancient tribal dances for the favor of the younger generation.

The dances are being sponsored by Chief Peo Post, Number 43, of the American Legion, the only Indian chapter in the country. The entire post will attend the state convention of the legion at La Grande later this month.

A large number of topees have been constructed along the banks of the Umatilla river and several hundred Indian families are attending the annual summer festival where feasting, dancing, horse racing and discussion of tribal affairs form the program. One large circular topee is reserved as the council chamber for the aged Indian chieftains of the three tribes, where all matters of tribal interest are taken up in ceremonial style.

## FARM REMINDERS

Oregon farmers are not behind their brethren in other parts of the United States in the use of electricity on their farms and in their farm homes, reports the experiment station. In Oregon horticulture, electricity has been used in dehydration of prunes and nuts. The design of dehydrators has been vastly improved in the last few years and the capacity approximately doubled by the recirculation system.

Irrigation of prunes in Douglas county conducted by Huron Clough of Canyonville obtained an 20 acres an increase estimated at a \$1000 in two seasons and \$500 in a third. The prunes were larger in size and brought a higher price. A number of prune growers in the same district are reported as having succeeded with irrigation.

"The ever mildew has come to Oregon to stay," says H. P. Barr, plant pathologist of the Oregon experiment station. "Infections in southern and eastern Oregon, especially in the irrigated sections have caused many inquiries for the clover mildew treatment. In most cases this is not necessary until after the first mowing."

Electric brooders have been found satisfactory if operated properly. It cost usually more than oil for brooding but eliminates most of the labor and fire hazard. Results of the use of electricity for increased egg production and for breeding have been published by the state college experiment station poultry department.

## GREAT NORTHERN HEADS ENROUTE TO VIEW BEND WORK

(Associated Press Leased Wire.)  
PORTLAND, Ore., July 5.—Work of building the 45 miles of new railroad necessary for the completion of the Bend-Klamath

with the Southern Pacific 2.9 miles south of Paulina at Chemult, which has been selected as the point of connection.

Kenneth Hauser said that so far as feasible Oregon labor and Oregon materials would be used in the construction of the new line. Unofficially it has been stated that the construction work will cost about \$1,750,000. The contract will be signed as soon as the interstate commerce commission decides whether the construction shall be done in the name of the Great Northern or the Oregon Trunk.

The officials also are expected to go over the survey from the Bend-Klamath of the logging road to the junction

of the logging road to the junction

## More than 3000 Preferred Shareholders

The CALIFORNIA OREGON POWER COMPANY

## Ask for YOUR Copy of this Attractive Book

Containing sixteen pages of pictures and facts, illustrating and describing the properties of The California Oregon Power Company, the booklet shown above is yours for the asking.

It is packed full of informative facts about this progressive public utility company. Its charts present a striking picture of growth. Its pictures illustrate modern plants and properties, built and maintained for the service of the public. The capital supplied by thousands of investors goes directly into the construction of permanent, useful public utility properties. A large map illustrates the wide territorial diversity.

It tells how you, too, may become a partner in public service by investment in the Company's preferred shares. Write or phone for your copy today.
