LABOR SITUATION IN THE NORTHWEST IS NEARING PEAK

PORTLAND, Ore., July 7.—Industrial, agricultural and construction activities, except logging and lumbering, are now nearing seasonal peak, giving employment to practically all available men and women in the Pacific Northwest, according to the 41. employment letter publisher here yesterday. Reviewing employment conditions west of the Cascades the 41 reports:

Industrial activities have been temporarily slowed down because of Fourth of July holidays. Logging camps began to shut down or contract operations early in June and it is now estimated that not more than 50 per cent of fir capacity will actually log during July.

More than 5,000 loggers who were laid off before the Fourth are marking time waiting for camps to reopen, while hundreds have gone east of the mountains and elsewhere for the harvest or have taken local construction jobs.

The annual Fourth of July closing of sawmills has averaged five days. Sawmill operation continues spotted, and with more or less curtailment of actual production in nearly every district.

Agricultural, cannery, factory, railroad, highway, tourist, mining and industrial activities, except logging and lumbering, are at mid-summer peak. The number of unemployed is low, but those without work find it difficult to secure jobs suited to their experience. It is equally difficult to secure skilled help promptly for jobs offered.

Turnover in all lines is low. East of the Cascades both logging and lumbering is more nearly normal than in the fir districts, according to the 41 letter. There are now but few skilled woodmen, sawmill or planer men unemployed in the pine districts.

With mining, farm work, city construction and industrial activities as well as railroad maintain-
