

VOL. XXVIII NO. 66 OF ROSEBURG REVIEW

ROSEBURG, OREGON, FRIDAY, JULY 8, 1927.

VOL. XXVIII, 141 OF THE EVENING NEWS

MONTH OF JUNE ABOVE AVERAGE IN TEMPERATURE

Report Shows Daily Record to Be Higher Than Normal—Rainfall Deficient.

Despite the fact that the spring and summer months have seemed unusually cool the weather records show that there is an excess in daily temperature since the first of January. The month of June had an average daily temperature excess of almost three degrees and at the same time the precipitation was below normal.

The monthly meteorological summary for the month of June shows that the average maximum temperature for the month was 78.8 degrees and the average minimum 51.6 degrees, making a mean temperature of 65.2 degrees, as compared with a normal of 62.5 degrees. The hottest day was 94 degrees and the lowest 41 degrees.

The total rainfall was .09 of an inch, while the normal for the month is 1.07 inches. Although the month of June was deficient in rainfall there is an excess of precipitation of 2.12 inches for the wet season, dating from September 1, 1926. There were 7 clear days during the month, 14 partly cloudy and 9 cloudy. There were 8 rainy days. The average hourly wind velocity was 3.3 miles per hour, with a maximum of 17 miles per hour.

The highest humidity during the month was 100 per cent and the lowest 23 per cent. The report was made by A. W. Pugh, meteorologist in charge of the local U. S. weather bureau station.

WORK ON CITY DIRECTORY IS NEARLY DONE

Good progress is being made with the city directory being compiled by the Roseburg Woman's Club. The clerical work is now nearing completion and within a short time the copy will be ready for the printers.

THE PRESIDENT, THE FIRST LADY AND A FEW BLACK HILLS TROUT

Mrs. Coolidge soon will know as much as the guides about the winding trails in the Black Hills. The first lady takes daily hikes of five to seven miles. She meets many tourists along the highways and often graciously consents to pose for their cameras.

President Coolidge here is girding himself for an attack upon the "finny" tribe. The president's success at Paul Smith's last year fished no good for the wiggling trout with which the Dakota writers abound.

Daddy's bringing home a fish here that Mrs. Coolidge can "try in the pan". The president proudly is showing two of the rainbow trout he caught in his first tussle with Black Hills streams. "Rob Roy" is eyeing the catch suspiciously, while "Prudence Prim" laughs it off. Guides praised the nimrodship of the president, who is a "patient waiter."

DEMPEY-SHARKEY TICKET SALE PAST \$500,000 FIGURE

(Associated Press Special File) NEW YORK, July 8.—Arrival of Jack Sharkey from Boston for his battle with Jack Dempsey a week from Thursday added impetus today to a ticket sale which already has passed the half million dollar mark.

JOHN DREW STILL STAVES OFF DEATH

(Associated Press Special File) SAN FRANCISCO, Calif., July 8.—John Drew, dean of the American stage, continued today to stave off the advance of death, which physicians almost two days ago predicted would overtake him in 48 hours.

ANITA STEWART IS PLANNING DIVORCE

(Associated Press Special File) LOS ANGELES, Calif., July 8.—The Examiner says Anita Stewart, the motion picture actress, has discussed plans with her attorney to divorce her husband, Rudy Cameron Brennen, member of a wealthy Washington, D. C. family. She has been separated from Brennen for four years.

FORMER RESIDENT BURNED TO DEATH IN CALIF. ASYLUM

Curb Walker Who Left City About Ten Years Ago Loses His Life in Cannery Fire.

Word was received this morning by Attorney Albert Abraham of the death of John H. Brown, a former resident of this city, who was burned to death at the California state asylum at Napa, California. Mr. Brown will be remembered by many Roseburg residents as "Curb-stone Johnny." He had a peculiar habit of always walking along the very edge of the curbing of the sidewalk and thus attracted a great deal of attention to himself. He was sent to the Oregon asylum about 10 years ago, following an accident in a local planning mill, but was soon released. He was a mill worker and considered a good workman and traveled about the country quite extensively after leaving Roseburg. Because of his peculiar habits he was frequently committed to state institutions and whenever he was picked up he immediately wrote to Attorney Abraham, who each time wrote the authorities and gave a history of the man's case, showing that his mental derangement was of a harmless nature. Brown usually being freed immediately.

COLOR BLINDNESS BARS AUTO PERMITS

(Associated Press Special File) WASHINGTON, July 8.—A new problem for officials in cities with a colored lighting system for traffic control has developed—color blindness of automobile drivers. In examinations for Washington driving permits, two per cent of the applicants are color blind and unable to distinguish between the green or red light and the red or stop signal. Traffic Director William Harland declares, all color blind applicants are rejected, he said, and old drivers found to be unable to differentiate between the lights will not be allowed to renew licenses.

UNDERTAKING CO. ANNOUNCES PLANS FOR IMPROVEMENT

Plans for the improvement of the chapel of the Roseburg Undertaking company are announced by M. E. Ritter, who returned today from Portland where he has been attending to business matters for several days. The building between the Ritter home and the chapel is to be removed and an addition constructed, increasing the size of the room used for the services, and also providing a bigger workroom and better facilities. A covered drive is to be constructed and a new entrance provided on the west side, making it easier to load and unload. The addition to the present building will follow the same style of architecture so that the present attractiveness will be retained.

HEALTH BULLETIN

How Clean is a "New" Mattress? (State Board of Health) Every good mattress should fulfill the following requirements: It must be sanitary, clean, free from filth, oil, vermin, and the possibility of disease transmission. It should be firm and level and yet elastic enough to be springy, and it should be made of proper material to retain its elasticity and shape. While the last two requirements are important it may readily be seen that the one most in need of attention is that dealing with sanitation.

They dispose of such material to a mattress renovating plant where covers are removed, the contents reworked and new covers used. In many of these establishments no attempt is made at sterilization of this material which may have been discarded from hospitals or other places where communicable diseases existed. They are then sold to the unsuspecting purchaser as new mattresses. Reputable manufacturers have long tried to control this evil, but find it is a different situation. The state of Oregon enacted a law in 1923 providing that all used and contaminated material must be thoroughly cleaned and sterilized before being offered for sale. The goods must bear a special yellow tag giving the name and address of firm doing the sterilization and the date of sterilization. In 1927 the law was amended to comply with the model law in conformity with recommendations of the Better Bedding Alliance of America. This model law includes in addition to bedding, overstuffed furniture. The enforcement of this law will protect the public from infection that might be transmitted by second-hand articles of bedding and upholstery. Penalties for the violation of the bedding and upholstery law apply to the person selling or offering for sale renovated or remade bedding materials that have not been sterilized. The law also provides that all bedding sold shall be labeled to show its true contents whether it is new or has been remade or renovated. Funds for the administration of this law including inspection are derived from the sale of tags to the manufacturers, which they are required to affix to each piece of bedding put out. These tags are obtained from the State Board of Health.

Many problems of sanitation are encountered in the use of mattresses. Through long use mattresses become soiled or dirty and need cleaning. This is particularly true of the older mattresses, the tufts giving an ideal collecting place for dust and dirt. Newer mattresses are made by securely joining separate rolls or compartments of mattress material. Second-hand mattresses are frequently infected with vermin, and once these insects become established they can be eradicated only by disinfection with an insecticide as well as a bactericide. The role of insects in disease transmission is well known and the extraordinary vitality of bed forms which enables them to live for extended periods under the most adverse conditions is conducive to the spread of disease. The greatest danger lies in the cheaper mattresses. The apparent monetary saving is due to the fact that the cheaper mattresses are filled with old clothing ground to a fibrous condition but not cleaned, or old stuffings from a

TUNNEY PREDICTS SHARKEY WILL BE NEXT FOE

BY JIMMY POWERS NEW YORK, July 5.—"Jack Sharkey is the man I will meet next September!" There, ladies and gents, you have the word, the well modulated word, mind you, of Champion James Joseph Tunney. Up in the Adirondacks doing a light siege of training, Gene told this writer a few things about the plans he has in store for his well-tailored person, on the condition, of course, that he be correctly quoted. It seems ever since some of the lads tore his remarks on Lucky Lindbergh to pieces he has gone into a huddle as far as the none too friendly press is concerned. It behooves us then to treat carefully among the quotation marks. "I see where Dempsey picks Sharkey to beat me. I suppose I ought to return the compliment and pick Sharkey over him, but we'll let that pass. "I think that Sharkey is immeasurably smarter than Dempsey. He is a better boxer and he is faster, although not perhaps as hard a hitter. The two men have different styles. Sharkey stalks his opponents waiting for them to come on while Dempsey rushes in to kill. Tunney evidently and honestly has much admiration for Sharkey's ability. There is little chance of his underestimating him if they ever meet. "Sharkey is young, clever and has earned his place. A fighter will not be able to lay back in fighting Sharkey. He is fast and clever enough boxer to outpoint an opponent and yet if a boxer should lay back and outpoint him there would be the constant threat of his right-hand punch."
