CATTLE BECOME WILD

KODIAK, Alaska, July 13.—Three hundred fifty Alaskan cattle browse over the mountainous surface of tiny Chilkot Island, 200 miles out in the northern Pacific ocean from Kodiak. More than 40 years ago the Alaska Commercial company, a development concern long since extinct, stocked the island with a few head of tame cattle for experimental purposes. On the little island with a surface of but 20 square miles, the cattle have degenerated from inbreeding and have become thoroughly wild, but the herd continues to thrive. Alaskans say the experiment at least has proved that cattle can be grown in the region.
