GLENDALE MAN ARRESTED CAR THEFT CHARGE

Roy Totten Accused of
Stealing Ford Coupe
at Eugene.

RENTED, IS DEFENSE

Told Officers That He Paid
\$10 for Use of Auto to
Drive Home to
Glendale.

Roy Totten, of Glendale, was arrested this morning shortly after midnight and is being held for Lane county authorities on a charge of auto theft. A Ford coupe, claimed to have been stolen at Eugene about 9:30 last night, was recovered, and is being held for the owner.

Night Officer George Dietsch received a telephone call about 9:30 o'clock last night stating that a car had been stolen at Eugene and was headed this way. He was given a complete description of the machine by which to identify it. About half an hour before the car could reach Roseburg, according to his estimate, he went to the Deer Creek bridge where it is necessary for all machines to pass to enter the city. Some tourists drove up about 30 minutes later and he stopped to ask if they had seen the car along the highway and while he was talking to them Totten drove by in the Ford car. The tourists immediately took the officer in their car and started in pursuit and he was quickly overtaken and arrested.

According to the story given the officers following his arrest, he "borrowed" a car from a friend in Portland recently to bring his family to Glendale. Tuesday he decided to return this car and so went back to Portland with it. He then returned to Eugene and there took the Ford car. He claimed that he paid \$10 for the rent of the car and was to return it.

Lane county officers were advised of the arrest and will be here late this afternoon to take Totten back to Eugene to answer to the auto theft charge.

He has been a resident of Glendale for considerable time and has a wife and two small children there. He is a nephew of D. L. Neidenheiser, who is held in the county jail on a charge of setting out forest fires.

TEACHERS COLLEGE AT CHICO BURNED; LOSS IS \$500,000

(Associated Press Leased Wire)
CHICO, Calif., Aug. 13.—Fire which burned through the night left nothing but the blackened walls of the main building of the Chicago State Teachers college. The blaze, believed to have started from defective wiring in the switch box on the second floor, did damage estimated by C. K. Studley, vice president, at \$500,000.

Nothing was saved from the building which housed the office, school records, 27 class rooms, two assembly halls and a library valued at \$50,000. The training school, which adjoined the main building and other structures on the campus were not damaged.

The Teachers' college, which formerly was the Chico normal school, was built in 1888 and was one of California's historic educational institutions.

C. M. Osenbaugh, president, was in Pacific Grove at the time of the fire.

RAINIER TO VOTE ON MAYOR RECALL MONDAY

(Associated Press Leased Wire)
RAINIER, Oregon, Aug. 13.—Final broadsides are being fired in the fight over the attempt to recall Mayor Veatch and Councilman Haugeberg. The people will go to the polls to decide the issue Monday.

A circular bearing the name of E. E. Rosebraugh, secretary of the recall committee, has been distributed criticizing the present administration.

Mayor Veatch, in this week's issue of the Rainier Review, of which he is editor, published nine separate articles, most of them praising the present administration, and some criticizing former administrations.

Time Shows Handiwork As Cult Leader Testifies On Stretcher

"King Ben" Purnell, leader of the House of David Sect, is testifying in the colony's defense against the State of Michigan's attempt to dissolve it. The large picture shows him as he looked in his prime; before the state investigation of his acts began; inset shows him as he looks today, worn down by worry and illness.

(Associated Press Leased Wire)
ST. JOSEPH, Mich., Aug. 13.—Benjamin Purnell resumed the witness stand today in the state's dissolution suit against his House of David colony.

Physicians announced that Benjamin was physically able to stand during the course of the suit that As upon his first appearance, Purnell was carried into the court on a stretcher, upon which he reclined as he testified.

The leader of the cult denied he had anything to do with the group marriages which the state charges were ordered to protect him. He indicated that Mary, his wife, looked after the arrangements made. There have been frequent reports during the course of the suit that Benjamin and Mary were estranged.

BOLIVIA INDIANS IN REBELLION TO GAIN SUPREMACY

Whites in Rural Districts
Flee for Their Lives;
Republic's Death
Threatened.

(Associated Press Leased Wire)
LA PAZ, Bolivia, Aug. 13.—The uprising of eighty thousand Indians, which has kept white residents of the department of Potosi, Cochabamba and Sucre in a state of terror for several days, appears to be spreading throughout the republic.

Stories of depredations are filtering in from all points and white hacienda owners are fleeing before the infuriated descendants of the ancient Incas to more populated centers.

Active measures are being taken by the government to prevent a spread of the rising to the department of La Paz.

There are approximately 200,000 Indians in this department, with the whites decidedly in the minority, and fears are voiced by officials that if the movement does not reach La Paz, it might easily assume the nature of a catastrophe.

The charge has been made in congress by the minister of Interior that communist agents are responsible for the outbreak, inciting the Indians to nation-wide rebellion to establish the supremacy of their race and obtain ownership of all lands. He told the newspaper El Diario that the rebellion had entered a grave phase, inasmuch as many Indians had obtained firearms in the use of which they are armed.

White inhabitants of the three departments where the disturbances started have been slain and their homes burned by the Indians, who, armed for the most part with clubs and slingshots, are reported to be out to destroy every vestige of the white man's civilization.

Indians comprise about 70 per cent of Bolivia's population.

Conquest Recalled.
To cope with the situation, the Bolivian government is hurriedly dispatching troops from several concentrating points, and various bloody clashes already have occurred.

The present warfare recalls the time of the Spanish conquest, when Francisco Pizarro, with a

MYSTERY METAL FOUR QUALIFY IS DEFENDED FOR AIR DERBY; BY W.S. BOYER 5 AWAIT TURNS

Government Inspector Says
Rock Absolutely Shows
Minerals.

PLANNING NEW TESTS TESTS ARE PROTESTED

Electric Oven May Be Built
So That Actual Extrac-
tion of Ore May
Be Followed.

W. S. Boyer, district inspector for the interior department of the United States government, today emphatically declared that the white "mystery metal," which has been the subject of much discussion among metallurgists, is present in rock to be found in Douglas and Josephine counties. Mr. Boyer is willing to state that he does not know positively that tin is present and in some cases has been 82 per cent lead and 10 per cent antimony with 1 per cent unaccounted for, but that the rock is metal bearing he contends has been sufficiently proven.

During the past few weeks several assayers have declared that samples of the supposed tin bearing rock have shown no metal and statements have been made that the previous assays were apparently made by unreliable assayers and that the samples had doubtless been "salted."

Mr. Boyer is in Roseburg recently after an investigation conducted in Grants Pass and Canyonville, where he personally made tests of the ore in an oven carefully prepared by himself. Mr. Boyer's test was carefully safeguarded, the inspector securing his own ore from several different places, and using chemicals secured by himself to properly conduct the operations. He thoroughly cleaned the oven before making the test and sealed it during the work so that there would have been no "salting" possible, he maintains. He procured a large amount of metal from the rock and because of his findings caused two other inspectors, H. R. Burritt and H. W. Merrin to be assigned to the investigation. The government is interested from the standpoint of land reclamation. There is a great deal of government owned land in Douglas and Josephine counties now classified as agricultural that bears large deposits of the ore containing the white metal. If this rock really has the valuable metal within it then the land will be reclassified as mineral and the investigators are working to determine whether or not such reclassification is justified.

Mr. Boyer is now in Portland and in a statement given to the Portland press he states that he has had reports from Mr. Burritt to the effect that a recent test gave 27 ounces of metal from seven pounds of ore, or about 24 per cent metal from the rock.

Electric Furnace Planned.
H. W. Merrin, another inspector working on the case, reports satisfactory progress on an electric furnace which is being prepared so that the actual progress of the process of extraction of the metal from the ore may be viewed while

Individual Rights Must Yield To Constitutional Restrictions For General Benefit, M'Adoo Asserts

(Associated Press Leased Wire)
CHARLOTTESVILLE, Va., Aug. 13.—Lawless liberty is not freedom but anarchy, William G. McAdoo, said today in an address before the University of Virginia's institute of public affairs.

All liberty must be restrained to the point where it is compatible with the liberty of all, the speaker said.

"There cannot be private rights in any proper sense of the term except as they are defined and determined by the community acting through its appropriate organizations," he continued. "Whenever a question arises, for example, concerning the relation of public utilities, the prevention of fraudulent securities issues, the protection of the health of women and children, or the control of traffic in habit forming drugs and beverages, the first and greatest obstacle to be overcome is almost sure to be argument that whatever might otherwise be a valid exercise of the state's police power is a wrongful invasion of private rights."

In the past, Mr. McAdoo said,

this argument had been commonly used only against legislative bodies and not against constitutional provisions, it being assumed that the scope of private rights could extend no further than terms of constitutional guarantees.

Now, however, he added, it is being used "under the influence chiefly of a dislike for one of the recent amendments to the constitution," that there are rights which are sacred from interference by society even when acting in its constitution-making capacity.

Thomas Jefferson, continually appealed to as an exponent of private rights believed in inherent natural rights, he said, as belonging to communities or societies but "not to private individuals against the community of which they are a part."

"The streets," because it is the soundest argument against government regulation, is not the doctrine of natural rights," he said, "but the argument that the government is unfit to discharge the duties which it is proposed to confide in it, and that private rights are not safe in its hands."

Questionnaire Brings Edison's Views Electric Power Leads In Usefulness Radio Not To Crowd Out Phonograph

(Associated Press Leased Wire)
WEST ORANGE, N. J., Aug. 13.—On the 41th anniversary of the invention of the phonograph, Thomas A. Edison, its inventor, briefly answered questions on politics, aviation and invention.

The questions and his answers were:

Q: Will you follow Henry Ford's example by going up in an airplane?
A: No.

Q: Do you believe radio will supplant the phonograph?
A: No.

Q: Who will be our next president?
A: I don't know.

Q: What do you think about the next presidential race?
A: I don't do any thinking on that subject.

Q: Has Coolidge a chance despite his statement, "I do not choose to run in 1928"?
A: It hinges come to a block, it may force him to run.

Q: What do you think of the recent trans-Atlantic flights?
A: Stunts, which always follow pioneering of new things.

Q: What do you consider the most useful invention in the world today?
A: Electric power system and its appliances.

Q: How did the idea for the phonograph come to you?
A: I was working on a telegraph transmitter employing a disc like the phonograph record disc. The dots and dashes of the message were indented on a paper disc. By speeding up the disc tin-

phograph has contributed to civilization?
A: It has made life a little more attractive, and expedited business transactions.

Q: Which of your inventions in your opinion has contributed most to the comfort of humanity?
A: Incandescent lights and power systems, with moving pictures a good second.

Q: What do you believe the future of the world will be?
A: I believe in a better world, a world of peace and progress.

Q: What do you think of the current political situation?
A: I think it is a time of great change and opportunity.

Q: How do you feel about the current economic situation?
A: I feel that there is a need for more production and efficiency.

Q: What do you think of the current educational system?
A: I think it needs to be reformed to better prepare students for the future.

Q: How do you feel about the current social conditions?
A: I believe in the importance of education and hard work.

Q: What do you think of the current technological advances?
A: I am optimistic about the future of technology.

Q: How do you feel about the current international relations?
A: I believe in the importance of peace and cooperation between nations.

Q: What do you think of the current environmental issues?
A: I believe in the importance of preserving our natural resources.

Q: How do you feel about the current cultural movements?
A: I believe in the importance of art and culture in society.

Q: What do you think of the current religious beliefs?
A: I believe in the importance of faith and morality.

Q: How do you feel about the current scientific discoveries?
A: I am excited about the progress of science.

Q: What do you think of the current political parties?
A: I believe in the importance of a strong and effective government.

Q: How do you feel about the current economic policies?
A: I believe in the importance of sound economic principles.

Q: What do you think of the current social reforms?
A: I believe in the importance of social justice and equality.

Q: How do you feel about the current international relations?
A: I believe in the importance of peace and cooperation between nations.

ROSEBURGMAN MEETS DEATH IN ACCIDENT

Truck's Plunge Kills
Milton Church

Occurs Unseen on Section
of Roosevelt Highway,
Tillamook County.

BODY UNDER VEHICLE

Victim Roseburg Resident
21 Years, Ex-Owner of
Bakery; Widow and
Child Survive.

(Associated Press Leased Wire)
TILLAMOOK, Ore., Aug. 13.—Milton Church, of Roseburg, aged 48, was killed early today when a gravel truck which he was driving on the Miami river road near Garibaldi, went over a 40-foot bank.

Church, who was employed on a night shift working on the Hobsonville-Garibaldi section of the Roosevelt highway, was found by searchers after he failed to appear at the usual time at the gravel pit where his truck was to be loaded.

The position of the body indicated that he had been thrown from the truck in the plunge, and that the truck had fallen upon him and crushed him. Fellow workers were unable to account for the accident except by surmising that Church might have fallen asleep while driving the truck. The accident was believed to have occurred about 4 a. m.

Church had been working with the road crew about a week. Relatives at Roseburg were notified this morning and they sent word to the coroner that they were starting for Tillamook to take charge of the body.

News of the death of Milton Church comes as a severe shock to his relatives and many friends in this county. He was a resident of this city for nearly 21 years, and during that time made a great host of friends who are grieved by his death.

He was 48 years of age and was born in Coshocton county, Ohio. He went into Iowa, Colorado and California before coming to Oregon 23 years ago at which time he engaged in business with his brothers, Howard and George, the three of them operating a bakery, 303 Medford. They sold this business after a residence of two years in Medford and then moved to Roseburg where they again opened a bakery under the name of Church Brothers. They continued in business until 1916 when they sold out, the plant later passing to James Hatching and becoming known as the Model Bakery, Mr. Church.

ARKANSAS RIVER SWEEPS THROUGH TOWNS IN KANSAS

(Associated Press Leased Wire)
TOPEKA, Kansas, Aug. 13.—Rains of cloudburst proportions flooded Kansas towns today and sent rivers and streams on a rampage.

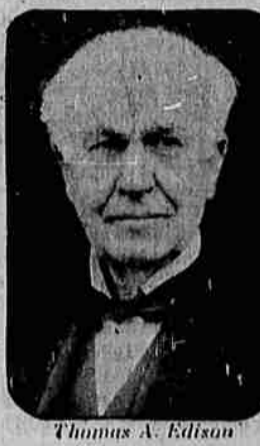

Holsington, Great Bend, Hizer, Albert and Olathe were inundated following rains of from three to nine inches which came after the heavy downpours Thursday night.

At Hizer a nine-inch rain sent water running through the streets four feet deep, forcing residents from their homes. At Albert water was two feet deep in the telephone exchange and streams were far out of their banks.

Water from these towns was rushing down toward Great Bend where residential sections already were under water. Without creek four miles north of there was two miles wide and the Arkansas river at the south edge of town was approaching flood stage. Dikes were being built along its banks.

At Holsington a six-inch rain last night followed one of similar proportions Thursday night and inundated the town, washing out Missouri Pacific railroad tracks on three sides.

Streams in the vicinity of Salina and southwest of Salina were reported full and overflowing. The Solomon river at Minneapolis was reported on a rampage.

Thomas A. Edison

INQUIRY ORDERED INTO REVOLT AT COUNTY SCHOOL

Change of Matrons Causes
Protest Demonstration
By Twenty-Six of
Girl Wards.

(Associated Press Leased Wire)
LOS ANGELES, Aug. 13.—Twenty-six girl wards of the juvenile court who yesterday stormed their way out of the El Retiro county school for homeless girls at San Fernando today were being sheltered in juvenile hall pending an investigation of "existing conditions" at El Retiro. They were under the protection of Miss Jean Shontz, acting referee of juvenile court, who backed up their ultimatum that they would not return to the school under the rigid discipline established by a new administration.

The girls, most of whom walked 18 miles under the summer sun from the school to the city, declared their rebellion was caused by the loss of self-government and its replacement by rigid reform school discipline when Miss Alma Holzschuh, superintendent, was dismissed and her place taken by Mrs. Rosemary Good. The change of management was made last Saturday by members of a juvenile court committee. Miss Shontz declared the walkout of the girls brought her first knowledge of the change.

Inquiry ordered
Miss Shontz said she would not require the girls to return under "the existing conditions" and several others connected with the juvenile probation department made reference to "conditions" although declining to explain themselves. It was determined, however, that an exhaustive investigation of the school has been ordered by the juvenile probation department.

Mrs. Good declined to make any comment. The girls charged that the new management planned to restrict their freedom by erecting a 10-foot wall and pointed out that they were attending the county school at their own request.

When the walkout took place Mrs. Good called on the San Fernando police for aid and demanded they stop the girls by force. This the police refused to do, saying they had no jurisdiction.

without a navigator.

4.—The monoplane "Golden Eagle" entry of the San Francisco Examiner piloted by Jack Frost with Gordon Scott, navigator.

The approved starters will hop off in the order named and those who qualify today will obtain places in the starting line in the order of qualification.

Other Waiting
The monoplane in which Miss Mildred Doran, 22-year-old Michigan school teacher, will ride to Hawaii, stood a fair chance of winning approval as the fifth starter today. J. A. Pedlar, the pilot switched navigators, and it was expected that Lieutenant Miles Knappe, engaged yesterday, would be the navigator, too.

Captain William P. Erwin, flying the "Dallas Spirit" was ready for his half load test today. He abandoned his original plan to fly alone and has engaged A. H. Elich.

BULLETS FLY AT PRESIDENT AND AIDES, LISBON

Latest Attempt to Change
Government Heads in
Portugal Results
in Failure.

(Associated Press Leased Wire)
LISBON, Portugal, Aug. 13.—Another attempted coup d'etat in Portugal has been quelled after dramatic incidents in one of which President Carmona and members of the cabinet were under fire. The president grappled with one of the assassins, disarming him. The movement, instituted by a military group displeased with recent cabinet changes, was begun yesterday morning with the object of placing naval commander Filomeno de Camara in power.

Three officers forced their way into the ministerial council chamber in the president's house and handed General Carmona a letter couched in strong terms, demanding the resignation of the government.

One of the officers, Lieutenant Moraes Carmento, attempted to give the views of the minister of the political situation. The minister of war, who was present, refused to enter into a discussion, accused Lieutenant Sarmiento of printing insulting statements and ordered his arrest.

Lieutenant Sarmiento backed to the wall, drew revolver and fired repeatedly at the group of ministers. One shot wounded the secretary of the finance minister and another punctured the clothing of the minister of justice.

President Carmona threw himself upon the lieutenant, while the latter was firing. Sarmiento escaped. Later he was apprehended. Two other officers, accompanied by Professor Figueiredo de Figueiredo, director of national library, attempted to force publication in the official gazette of a decree announcing the resignation of the government and the appointment of Commander de Camara as dictator. Professor Dr. Figueiredo and a number of others were arrested.

Previous to this action, army officers attempted to visit various regiments of the Lisbon garrison to incite the troops to rebellion, but were prevented from entering the barracks.

CURWOOD NEAR DEATH
OWOSSO, Mich., Aug. 13.—The condition of James Oliver Curwood, author, steadily is growing weaker, his physician, Dr. J. J. Haviland, announced today. It was believed death was a matter of hours. Curwood is suffering from blood infection.

HOLDUP MEN GIVE THEIR
VICTIM RIDE IN AUTO

PORTLAND, Ore., Aug. 16.—That holdup men can be accommodating at times was indicated by a police report today. E. J. Anderson said that two men who forced him to get into a sedan last night took him for a ride, relieved him of \$2, and then asked him where he lived. When he gave the address they drove him to his front door and bade him good night.
