CHAPLIN MAY PAY TO PROTECT NAMES OF SEVEN LADIES

(Associated Press Leased Wire)

LOS ANGELES, Aug. 17.—Reports of a property settlement already effected or nearing completion in the sensational divorce suit of Lita Grey Chaplin against her film comedian husband, Charles Chaplin, gained new impetus today despite the lack of any confirmation from attorneys or principals in the case.

These reports fed and fattened on the hurried arrival of the actor yesterday and the massing of his legal batteries as well as the force of counsel for his wife despite the declaration of attorneys that legal technicalities make imperative a postponement of the trial set for Monday. If property problems of the case were settled before that time, it would be possible for Mrs. Chaplin's attorneys to go into court with a modified complaint. The trial then would become a routine divorce action, lacking the startling elements injected into it by the "seven women, three of

them prominent motion picture actresses," accused in the wife's plaint and the "certain young man" mentioned in the actor's counter action.

Lloyd Wright, Chaplin's Los Angeles attorney, with whom the comedian spent a large part of yesterday in conference, denied flatly that anything except a court fight was impending. Edwin T. McMurray, uncle and chief counsel for Mrs. Chaplin, contented himself with a statement that there was nothing new in the case.

Pure whole milk, and it's pasteurized. Roseburg Dairy. Phone 186

KIMBALL TO OPEN MEAT MARKET IN EUGENE

EUGENE, Aug. 17.—E. W. Kimball has opened a meat market at Fourth avenue and Blair street, with complete new refrigeration, installing a ten and a half ton machine. The market will continue under the name of Blair street meat market.

Mr. Kimball was owner of markets at Roseburg and Sutherlin, selling his Roseburg property three months ago, and moving fixtures from the Sutherlin market to Eugene. He was manager for several years for Rose and Higgins of Astoria. He will do outside buying of veal, hogs, beef and chickens. Fresh meats, and cold cooked meats will be handled.

CANNERIES ARE FACING SEASON OF HEAVY LOSS

Over Production of Various Vegetable Crops Atop 1926 Carry-Over.

CORN AT ANY PRICE

Farmers Fail to Recognize Necessity for Reducing Acreage to Prevent Market Crash.

(Associated Press Leased Wire)

WASHINGTON, Aug. 17.—Scheduled to reach its peak of activity in September, America's billion dollar canning industry faces serious overproduction.

Information reaching the National Canners' association shows 45 per cent of the total 1927 tomato pack still on hand. Maine reports a year's supply of canned goods in warehouses there. Despite a large surplus of canned corn still in their plants, Iowa packers planned heavy operations, "knowing they would have to sell at a loss."

In Illinois, jobbers fear to buy except in very small quantities, and corn canneries are "dumping their holdings at any price." Tennessee acreage contracts increased 25 per cent, and the tomato pack is expected to double that of last year. Many Wisconsin plants are not operating this year.

Enough Stock For 2 Years. Quoting Assistant Secretary of Agriculture Dunlap, the canners' association says it is apparent the consumers have not responded with their orders in the same ratio as the increase in production, with the result that canners find themselves with stocks on hand sufficient to meet the ordinary demand of the trade for a period of fully two years.

"Many farmers," the association says, "realize that to meet the problem of overproduction, it is necessary to reduce acreage before the market has collapsed completely and the farmer, himself, is bankrupt."

The last twenty years has closely correlated agriculture and canning. The latter provides a cash market for many million dollars' worth of farm products every year. Canned foods have ceased to be a novelty, but to vast numbers of the American population have become a vital necessity.

Figures On Packs. The annual tomato pack approximates 1,000,000 tons; sweet corn, 800,000 tons; peas, 215,000; cabbage for kraut, 100,000; asparagus, 54,000; snap beans, 40,000; spinach, 50,000 tons; and cucumbers, 3,700,000 bushels.

Establishments preserving vegetables, fruits and sea foods, employ 235,000 employees during September, the peak month. For the entire year, however, the total employed falls below 100,000. Milk canning is carried on without so much variation. The peak comes in July, when the number of employees is about 32,000, as compared to 25,000 for the whole year.

Eat barbecue, sandwiches and ice forever. Brand's Road Stand.

WARDENS GET MINER FOR KILLING DEER IN CLOSED SEASON

ASHLAND, Aug. 17.—Ten miles in low gear over an old wagon road, used little since 1917, and seven miles through dense underbrush, Game Warden Roy Part of this city and Game Warden Ed Walker of Douglas county to the Red Cloud club near Trail Monday.

At the Lou Thomas camp near the old mine they arrested W. P. Larson and charged him with killing deer out of season. Fresh venison was found in Larson's possession and he is scheduled to appear in court.

KILLED BY WIRE HE STRUNG FOR BOYS

(Associated Press Leased Wire.) MINNEAPOLIS, Minn., Aug. 17.—Boys stealing apples from a tree in his backyard exasperated, Delbert Lambrich, 25 years old, so he circled it with barbed wire connected to a "live" electric light wire. Yesterday Lambrich brushed against the fence and was electrocuted.

pear before a Roseburg Justice of the place August 22. The trip back to the old mine was one of the most difficult ever made by the two wardens, whose duties lead them into the most inaccessible parts of the country. The return trip was quite as difficult as the journey to the mine as the 10 mile steep grade they had ascended in low gear was sufficiently steep it was necessary to make the descent in low.

WARM SPRINGS SURVEY SOON TO BE FINISHED

SALEM, Ore., Aug. 17.—Rhea Luper, state engineer, said yesterday that the economy survey of the Warm Springs irrigation district will soon be finished and that a report will be filed with the state reclamation commission within 60 days. The survey is being made by P. A. Ewing and Dr. W. W. McLaughlin of the federal reclamation department and Dr. W. L. Powers, soil expert of Oregon Agricultural college.

FARM RESEARCH YIELDS HEAVILY IN DIVIDENDS

Department of Agriculture Saves Millions Yearly in Crop Values.

WORK INDISPENSABLE

Pestilence, Disease Kept Away at Annual Cost to Government of \$20,000,000.

(Associated Press Leased Wire)

WASHINGTON, Aug. 17.—Uncle Sam pays the world's greatest insurance premium—\$20,000,000 a year. In return he is protected against wholesale destruction of human life, crops, and livestock.

That, virtually, is the view taken by Dr. A. F. Woods, director of scientific research, U. S. Department of Agriculture.

"Without the research scientist," Dr. Woods declared, "our present complex life would not be possible. Disease would wipe out cities. Gradual depletion of soil and invasions of pests would mean starvation for millions. Through the work of the research man our lives are made easier, and what we have is made to last longer. He is the foundation of a intricate structure."

\$20,000,000 Annual Cost. Research achievements in this country, recorded in the history of little more than half a century, cost the government about \$10,300,000 a year. Closely affiliated experiment stations cost a similar sum, bringing the total to approximately \$20,000,000 annually.

"This," Dr. Woods continues, "is an extremely small premium to pay for protection of an industry capitalized at approximately sixty billion dollars with an annual gross income of twelve and a half billion dollars. Careful analysis of results shows that for every dollar expended for research there is an annual yield of \$500, or 50,000 per cent. In the Bureau of Dairy Industry alone, an annual expenditure of \$500,000 for the improvement and protection of milk and its products, saves the country \$200,000,000 a year. Hundreds of other projects in many different fields are saving billions of dollars annually.

"Soils have been analyzed and reclassified; natural enemies of pests have been imported to eradicate them; clover has been saved from the seed midge by a slight modification in cultural practices; fruits have been saved from the San Jose scale; the house fly is being conquered; bark beetles are being eradicated; means have been found for controlling with the grape rootworm; the alfalfa weevil is being conquered; special poisons have been concocted for rodents and predatory animals.

Valuable Results. "A serum and virus treatments have made it possible to prevent hog cholera; fruit quality and yield has been improved by means of bud selection; methods and poisons have been discovered for combating insects, particularly the boll weevil, which threatened the entire cotton crop. Discovery of the part played by the common barberry bush in the life of black stem rust made it possible to stop this enemy of the wheat crop.

"Danger of yellow fever and malaria was minimized when science found it to be transmitted by mosquitoes. Science found carbon tetrachloride with which nearly 2,000,000 human patients have been treated for hookworm."

BEHOLD HER SKILL

She is a charming picture as she sits at the head of the table, demurely dallying with crystal cruets.

So charming that the guests exclaim with surprise to find that she is skillful, too. For behold, she has been busily mixing an extraordinarily good salad—a most professional French Dressing.

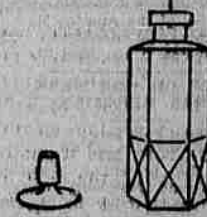

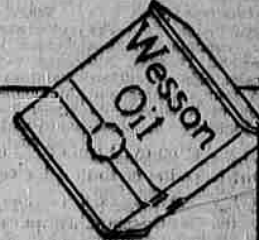

You will find it very pleasant to play hostess in this fashion. To mix, right at the table, the French Dressing that is so smart now. And you will be surprised to see how much more inviting a freshly blended dressing is.

Mix three parts of Wesson Oil and one of lemon juice or vinegar for a mild dressing. Add more vinegar

for a tart dressing. Vary the proportions to suit your own taste and in accord with the strength of the vinegar or lemon juice you use. Salt and pepper to taste. Paprika for its gay color.

And then—experiment. Add a bit of ketchup or a dash of mustard—for fish or meat salads or—for green salads a small amount of Roquefort. . . French Dressing can be a dozen different dressings in one.

Its excellence, however, depends on the oil. You will find Wesson Oil is exactly right for French Dressing—clear and light in color and very delightful in flavor. French Dressing made with Wesson Oil is deliciously good to eat and wonderfully good for you.

KELLEY-WILLOS APPEAL MADE BY WORLD WAR VETS

(Associated Press Leased Wire)

SALEM, Ore., Aug. 17.—Representatives of the American Legion yesterday appeared before Governor Patterson and asked him to commute to life imprisonment the sentences of Ellsworth Kelley and James Willos, who are sentenced to be hanged next Friday.

The committee presented a letter from the executive committee of the legion in Oregon, written following an investigation of the case. It asked full justice for the two men and expressed confidence that the governor would investigate fully and abide by his own findings.

Kelley and Willos were involved in the state prison break of August 12, 1926.

The members of the committee appearing before the governor were George Love, state commander; Carl Moser, state adjutant; Vic McKenzie, national committeeman and Irl S. McSherry, state vice commander.

DEMPSEY DUE AT CHICAGO TRAINING CAMP TOMORROW

(Associated Press Leased Wire)

CHICAGO, Aug. 17.—Jack Dempsey today neared the scene of his forthcoming effort to climb the rough and rocky road back to the heavyweight championship heights. Accompanied by his wife, Estelle Taylor, the former champion will arrive tomorrow, five weeks from the day he climbed into the ring to battle for the crown he lost to Gene Tunney one year ago.

Tex Rickard's plans to provide almost as many \$5 benches as \$40 ring-side seats has pleased the Illinois State Athletic commission. There will be places for nearly 40,000 customers able to pay the top scale of \$40, while 35,000 or more can squeeze their way into the topmost rows of the gigantic incline Rickard plans to construct

between the northern wings of the horseshoe.

In between these two limits will be space for about 85,000 spectators at prices ranging from \$10 to \$80, almost equally divided between the five price classes.

Leo P. Flynn, Dempsey's new manager, said that the sparring partners he has lined up for catching the ex-champion's hooks are all light, fast men, except for Martin Burke, New Orleans heavyweight. Dave Shade and Allentown Joe Gans, who helped Jack prepare for Jack Sharkey, will also help him train for Tunney.

CHEAPER FRUIT RATES EAST AIM OF STATE AGENT

(Associated Press Leased Wire)

SALEM, Ore., Aug. 16.—Seymour Jones, state market agent, announced today that he will begin a fight for a freight rate reduction on deciduous fruit shipped east from the Pacific northwest, similar to the reduction recently granted California shippers by the Interstate Commerce Commission. The reduction, if obtained, Jones said, will be from 10 to 25 cents a bushel on much fruit shipped.

"I notice in dispatches from Washington," said Jones, "that the Interstate Commerce Commission has granted substantial reductions in rates on deciduous fruits from California to all eastern consuming points east of Denver and Rock Mountain territory. This reduction from California points east now gives that territory fresh fruit shipments, other than apples, a much cheaper freight rate than now applies to north Pacific points, but the same principle which warranted reduction from California points would also apply to north Pacific points. Fresh fruit shipments from the north Pacific points are subject to a very burdensome freight rate to eastern points and a united effort should now be made by the fruit growers of Oregon and Washington, aided by the public service commission, to secure a reduction on a parity with California.

"One of the members of the Interstate Commerce Commission intimated very strongly that the North Pacific states would now be entitled to a reduction if an effort was made to secure them. If we can secure a reduction in this territory it would mean hundreds of thousands of dollars each year

to the growers of the northwest, and an aggressive fight should be made to secure the reduction."

John G. Collins, of the geographical survey and Mrs. Collins arrived here last evening from Portland to spend a few days on business.

LOW FARES East

SUMMER EXCURSION FARES IN EFFECT MAY 23 TO SEPT. 30 RETURN LIMIT OCTOBER 31, 1927
