WAR ORPHANS ARE TO HAVE MOTHER

(Associated Press Leased Wire)

WASHINGTON, Oct. 18.—Rear Admiral Newton A. McCully has accomplished the "mission" which took him abroad a month ago and the seven Russian war orphans which he, a bachelor naval officer, adopted in 1920 have been provided with a Russian mother.

Dispatches reaching Washington through diplomatic channels tell of his marriage to Mrs. Olga Krundzycher, a young Russian woman, at Reval, Russia, last week. The admiral is 60 and his bride 29.

The news came as a distinct surprise to his naval associates here, among whom he has been known as a confirmed bachelor. He went on leave September 12 and told friends merely that he was going "abroad on a mission."

His seven wards, who now range in age from nine to fourteen, are at Charleston, S. C., where Admiral McCully is stationed.

CHARLESTON, S. C., Oct. 18.—The seven Russian foster children of Rear Admiral McCully awaited with varied interest the first sight of their Russian foster-mother.

Ranking in age from 9 to 19, the five girls and two boys adopted in Russia by Admiral McCully in 1920, are now ready to greet the "mother" who speaks their own language, for the new Mrs. McCully was Mrs. Olga Krundzycher, a native of Russia, before marriage at Reval changed her name last week.

FIVE TRUNKS ARE FOUND WITH DOPE

(Associated Press Leased Wire)

PHILADELPHIA, Oct. 18.—Confiscation of five trunks containing narcotics with an underworld value of \$750,000, government agents said today, nipped in the bud a plot to flood the eastern section of the country through a well-organized system extending over the middle Atlantic states with drugs smuggled from China.

One of the trunks was seized at a railroad station here yesterday and the others were taken in New York and Washington.

Michael J. Collins, customs agent stationed in New York, said that one of the trunks found in that city had been consigned to a leading hotel and that apparently people of wealth were behind the

Mrs. Burton Advises Women on Motherhood and Companionship

"For several years I was denied the blessing of motherhood," writes Mrs. Margaret Burton of Kansas City. "I was terribly nervous and subject to periods of terrible suffering and melancholia. Now I am the proud mother of a beautiful little daughter and a true companion and inspiration to my husband. I believe hundreds of other women would like to know the secret of my happiness, and I will gladly reveal it to any married woman who will write me. Mrs. Burton offers her advice entirely without charge. She has nothing to sell. Letters should be addressed to 24 Margaret Burton, 1416 Massachusetts, Kansas City, Mo. Correspondence will be strictly confidential."

RECOMMEND GASTON MEANS FOR PAROLE

(Associated Press Leased Wire)

WASHINGTON, Oct. 17.—Gaston B. Means, who is serving a sentence in the Atlanta penitentiary on charges of bribery has been recommended for parole by the parole board.

Means, who was formerly a department of justice agent and figured prominently in the senate investigation of Harry M. Daugherty's administration of the department, is rounding out a second two-year prison term to which he was sentenced in New York.

In the first case Means was convicted of conspiracy to violate the national prohibition law in connection with whiskey withdrawals.

Later a jury found him guilty of conspiring to bribe government officials. On completing his first prison term at Atlanta, Means began serving his second.

Means was fined \$10,000 on each of the two counts on which he was convicted. Under the law he would be required to pay the \$20,000 before the expiration of his term in June 1928 or resort to exemptions under the poor law.

AGRICULTURAL CONDITIONS IN CO. REVIEWED

County Agent Issues Bulletin of Farm Activities.

SHOW OCTOBER 26-28

Attention of Growers Called to Fruit and Corn Fair to Be Held in Roseburg.

County Agent J. C. Leedy has issued a lengthy bulletin summarizing agricultural conditions and activities in the county. This review is furnished through the extension service of the Oregon Agricultural College. The bulletin is as follows:

Horticultural and Corn Show. The Douglas County Horticultural Society, assisted by the Roseburg Rotary Club, will put on a Horticultural and Corn fair at the armory building in Roseburg on October 26, 27 and 28. The premium list has been prepared and distributed, which shows that very substantial premiums are being offered for the products covered by this fair. In addition to the regular premiums offered, a large number of the business men are offering special premiums on practically all classes to be exhibited. It is noted that as many as possible will support this fair by exhibiting their products. The committee in charge of the work will be pleased to furnish additional information whenever possible.

The County Club fair being put on in connection with the club work of the county will be held at the armory on the same dates as the horticultural fair.

Ladino Clover. This large white clover is well adapted to the moist coastal regions or to irrigated areas. It is a perennial and can be used for hay, pasture and seed. Its greatest value is for pasture, sufficient. It may be planted in two or four pounds of seed per acre is fall, but best results are obtained when planted in the spring. The seed may be drilled or broadcasted on well prepared land. The plants are long lived and respond well to applications of lime and plaster. Good seed is priced at \$1.00 per pound. Place your orders with the County Agent.

Bulbous Blue Grass. This new grass has many possibilities and is deserving of a thorough trial under Douglas county conditions. It has done exceedingly well in Jackson county, where it has given remarkable results as a pasture crop. It is sown in the fall and can be pastured in the spring. It grows only in the fall, winter and spring, forming seed and remaining dormant during the dry part of the year to resume growth with the first rains in the fall. It is a very aggressive grower, often crowding out all kinds of plants and grasses except alfalfa. The seed can be secured in Roseburg at 60 cents per pound. Ten pounds are required to plant an acre.

Fall Sown Grains. The cereal acreage of Douglas county has declined to a point that very little of the crop is shipped out and considerable amounts of some grains are shipped in. Yields per acre on many of the lands are too low to make the crop profitable. However, as many acres are devoted to cereal production, as to any other crop on cultivated land in the county, and improved practices and standard varieties would doubtless increase the total yield very materially.

The following are some of the recommendations of the Farm Crops Group at the County Agricultural Economic Conference:

- 1—Grow cereals in a rotation, including some legumes.
- 2—Plant medium early in fall on good clean land.
- 3—Treat all wheat with copper carbonate.
- 4—Treat all barley and oats with formaldehyde.
- 5—Sow only clean seed of standard varieties.

Varieties of fall wheat giving good results are White Winter for heavy and poorly drained land and Jenkins Club for the richer and better lands. Gray Winter oats and O. A. C. No. 28 barley are good for fall planting.

Most of these varieties of grain can be purchased from your local feed dealers who are glad to assist in the introduction and growing of the best varieties.

Export. Orders for blasting powder should be placed with the County Agent at an early date, as the 20,000 pound allotment is being gradually used and this is the last year that the government powder will be available. The price is \$8.00 per cwt. f. o. b. Roseburg. Checks should accompany orders.

Brown Rot. Raising demonstrations on the farms of Wm. Kamp, Umpqua, and Throno and Jennings. Winston, proved successful, though loss from brown rot was not nearly as great as during the season of 1925. Sulphur dust was the material used, being applied in August at the rate of 100 pounds per acre. A saving of 9 per cent of the prunes was effected in the Kamp orchard and 6.2 per cent in the Throno and Jennings orchard. Only a fraction of 1 per cent infection occurred in the dusted areas.

Weed Control. Carbon bisulphide as a control for morning glory was only partially successful in a series of seven tests conducted by the County Agent on the

farms of H. F. Hebard, Umpqua; C. F. Krogel, O. C. Brown and W. A. Karcher, Dixonville; M. B. Green, Winston; Ed Marks, Garden Valley; and Fred Goff, Melrose. The liquid chemical was placed in holes in 2 ounce amounts at depths of 15-18 inches, with the holes 2 feet apart, each way. A fair kill of the perpendicular roots was secured, but in no case were all of the lateral roots killed in the upper 6 inches of soil.

Livestock Show. The Pacific International Livestock Exposition will be held at North Portland, Oct. 29-November 5, inclusive. Some of the best beef and dairy cattle, horses, hogs, sheep and goats in the world will be shown. \$100,000 in premiums will be paid. The railroads will give reduced rates. All who conveniently can do so are urged to attend.

The Poultry Situation. The current situation in the egg market continues to grow firmer as receipts continue below a year ago and the movement out of storage is heavy enough so that on September 1 holdings of 5,652,000 cases were less by 80,000 cases than a year earlier. Prices, however, are still several cents below last year's levels. What the situation will be when the new crop of pullets get into production is still to be revealed. The tendency in recent years has been toward an increase in winter production and since 1920 egg production has been increasing about twice as fast as the population.

The dressed poultry situation shows little change with receipts at the principal markets continuing to run about on a par with last year. Broilers and miscellaneous poultry were the only classes of frozen poultry to show increases. Stocks of frozen turkeys, while nearly double those of last year, were only slightly above the five year average. Preliminary surveys indicate that the size of the turkey crop in Texas will be about the same as the 1926 crop, but there may be a tendency to hold over rather more of the turkeys than usual for the Christmas market. Information from other producing sections is mixed.

Oregon turkey growers organize. Acting on information received at a series of meetings arranged by the O. A. C. extension service, turkey growers in the principal centers of production in northern eastern Oregon are organizing to market this year's crop of birds through the Idaho Turkey Growers association. The centers already selected are Vale in Malheur county, where a carload of dressed turkeys was loaded last year at Baker City in Baker county, Hermiston in Umatilla county and Redmond in Deschutes county.

The Livestock Situation. World wool clip may be less than 1926. The wool crop in Australia is estimated at approximately 85 per cent of the 1926 clip, or 125,500,000 pounds less although the number of mature sheep to be shorn will probably be slightly larger. Considering the United States, Australia, New Zealand and United Kingdom which produced nearly half of last year's crop, the shortage is expected to be about 7 per cent.

Breeding sheep and lambs in demand. Indications in western range states are that many ewe lambs will be saved for breeding again this year and prices of ewe lambs are above feeder and fat stock.

Young ewes are also in demand. The condition of sheep and lambs in western states was reported at 96 per cent of normal on September 1 compared with 94 a year ago and 98 per cent two years ago. With the seasonal movement of native lambs practically over and in view of the smaller crop of western lambs and less lamb feedings in the corn belt, market supplies during the next few months may be less than last year. Increasing feeding, however, is indicated in western areas which may increase the movement of late fed lambs next year.

Horticultural Products. Prune output figured lower, larger sized acres. Although the official September estimates of the California dried prune production was boosted to 422,000,000 pounds on an increase over the August estimate of 14,000,000 pounds, qualifications based on probable lower output owing to low prices are further emphasized by unofficial advices from that state. It is also believed that the Pacific northwest crop will be short of early estimates because of unfavorable weather during harvest and disease. Old stocks are said to be greatly reduced. Supplies of fruit generally are not so plentiful as last year. Altogether the situation appears more favorable to those who hold stocks of food fruit, especially of large sizes.

Smallest apple crop in twenty years excepting 1921. A very light crop, a late shipping season, higher prices than last year, and probably a smaller export movement summarizes the apple situation. The crop is especially light in the eastern states and there has been a tendency to reduce estimates as the season advances owing to damage from spring frozes, and insect injury and other damage. The commercial crop is not expected to exceed 24,000,000 barrels in the United States and the Canadian crop is also light, especially in British Columbia. An active carlot movement from the Pacific northwest toward the east is foreshadowed by the relatively lighter crop in eastern states, but the movement has been a little slow in getting under way. An oversupply of early apples in the western markets has caused heavy losses to some American exporters recently but the situation is improving.

Pears. Official information indicates smaller supplies of pears in Europe than forecasted earlier in the season. The pear situation is very strong.

Farm Crops. Latest crop of red clover seed.

CORNS
Quick relief from painful corns, tender toes and pressure of tight shoes.

DeScholl's Zino-pads

Outside, the **MONTAG** CIRCULATOR is beautiful, yes—

The Montag Circulator is different in many ways from anything you have seen.

—It is a trim, handsome cabinet that will not destroy the beauty of a well-furnished room. Its richly grained walnut porcelain enamel finish is in harmony with the finest living room or dining room furniture.

but **INSIDE** is the really important difference

Instead of an old fashioned stove put in a good looking casing, the Montag Circulator is an outstanding departure from previous practice. In it the Montag principle of circulating warm air is successfully adapted to a portable heating plant that is built to give maximum heat at minimum cost, and is built to last.

Just think what these improvements mean to you

No basement required. No installation cost. When you move, take your Montag Circulator along.

For homes already built, without basements, the Montag Circulator is ideal. So it is, too, for new homes,—for the added expense of a basement is not necessary.

Made right here on the Coast, the Montag Circulator can be made and sold for less cost than were it made in the East. Excessive freight costs are saved, and you get the benefit of those savings.

TWO MEN FORCE DRIVER TO TAKE THEM ON JOURNEY

(Associated Press Leased Wire)

SALEM, Ore., Oct. 17.—Forced at the point of a gun, W. E. Wright, 781 East North, Portland, early today drove two tough looking men from 42nd street and Sandy Boulevard, Portland, to within three miles of Salem, where they left the car and waving the revolver they had kept in his back all during the journey, commanded him to continue on his way.

For 15 years Wright has driven every working day from his home to the Moran Candy factory at East 11th and Flinders street. With his father he is connected with the management of the factory.

The new traffic signals caused him to stop at 42nd street behind a street car about 5:45 a. m. When he stopped the two men stepped in to the rear seat of his car, commanding him to turn around and go out to 82nd street. Wright continued to Salem and reported to police after the men had left his car. Policemen and traffic officers searched the highways and railroad lines in the vicinity of the city without finding any trace of the men.

W. H. dispose of my entire holdings, consisting of 240x110 and 90x70 corner of Stephens and Washington Sts. Interest in several lots and gravel bar for \$20,000. \$5,000 cash. Balance on easy terms. Includes over \$100 per mo. Call at 221 W. Washington for information. Mabel V. B. Moore.

WIVES OF LUMBERMEN DIE

PORTLAND, Ore., Oct. 17.—Mrs. Winsley B. Ayer, wife of the president of the Eastern and Western Lumber company, died at her home here today. Her husband has been ill, and the shock of his wife's death unnerved him, attendants reported. Mrs. Ayer, who was 65, was prominent socially in Portland.

MARSHFIELD, Ore., Oct. 17.—Mrs. C. A. Smith, widow of the founder of the Corn Bay Lumber company, died suddenly today at her home at Berkeley, California. Relations here were advised. Mrs. Smith formerly resided at Minneapolis.
