CORN AND FRUIT SHOW WILL OPEN THIS EVENING

Exhibit One of Best Ever
Obtained in This
County.

CORN IS EXCELLENT

Finishing Touches Being
Put on Booths This
Afternoon—Pictures
to Be Shown.

Every person in Douglas county should see the horticultural and corn show opening this evening at the Roseburg armory. This show is a revelation to all who attend for never before has there been such a wonderful display of agricultural products as are being exhibited at the armory today. Thursday and Friday. While fruit and corn are given the chief places and are featured in the exhibit, yet the show is not confined to these two products alone, for on the contrary there is exhibited a widely diversified variety of products that cannot fail to impress the onlooker with the productivity of the Umpqua valley.

Persons who doubt Douglas county's ability to grow corn will have a real surprise coming to them when they see some of the displays at this show, for people who have attended the great corn shows of the middle west declare that the Douglas county product is fully equal to anything shown in the states famed for their corn growing.

The finishing touches are being put on the various booths this afternoon and by tonight everything will be complete. The flower show, occupying the center of the auditorium, affords a spot of color that lends much attractiveness.

The commercial booths have stressed educational features in this show and many unique and instructive displays are to be seen.

The boys' and girls' club work division is also of much interest. No special program is being arranged for this show, as it is desired that the attention of the visitors be given to the various exhibits, which have been placed for the purpose of educating the people of this county regarding what the county is able to produce, and to stimulate a greater interest in agriculture in the Umpqua valley.

However, there will be one item of entertainment in which everyone will be interested. Horace Bromley, California Oregon Power company cameraman arrived here this afternoon with a number of reels of film of Southern Oregon events. He will have pictures of the recent strawberry carnival in Roseburg, the Medford jubilee, development work in the various counties served by the Copco system, and many other interesting events of late months. These pictures will be well worth while and will be shown during the course of the evening. Admission to the show will be free.

HAWLEY SEEKS NORTH UMPQUA ROAD MONEY

(Continued from page 1)

east, in addition to providing a most important commercial thoroughfare Mr. Hawley was quite enthusiastic over the proposition and promised that upon his return to Washington he would prepare a bill and go before Congress with a request that a special appropriation be granted to complete this project.

While most forest roads are built with money allotted by Congress to the forest service and the bureau of public roads, Mr. Hawley thought that the importance of

ASSASSIN OF GEN. PETLURA ACQUITTED

(Associated Press Lead Wire)
LITH, Oct. 25.—Samuel Schwartzbard, young Jewish watchmaker who assassinated General Simon Petlura, Ukrainian separatist leader, last year "to avenge the Ukrainian pogroms," was acquitted today.

Announcement of the verdict was greeted with cheers and tears of joy by a great crowd which packed the court room.

Outside of the palace of justice on the Ile de la Cité—the heart of Paris—there were thousands who set up a great cheering punctuated here and there by exclamations of disapproval by Ukrainian and other sympathizers of the slain leader.

The North Umpqua project would justify a special appropriation, particularly in view of the fact that the county has already expended a large sum of money a considerable amount of which has been spent within the forest boundary.

Mr. Hawley promised that the bill would be given his personal attention and that he would strive to bring about its success before Congress.

Umpqua Harbor Bill
Mr. Hawley is also working for increased appropriations for the Umpqua river harbor. The Oregonian dispatch says that Mr. Hawley will reintroduce at the opening of congress the bill to reimburse Lincoln county for taxes lost through the action of the federal government in retaining title to lands leased for 14 years to the Pacific Spruce corporation. He believes that the case in Lincoln's favor is equally as strong as that for the Oregon-California land grant tax refund act which will serve as a precedent. Other legislation of benefit to Oregon which the Salem member expects to sponsor or support includes the following:

Extension of the federal road act under which \$75,000,000 is appropriated annually to various states in road construction for another two-year term.

A bill designating the area of beautiful falls along Silver creek, near Silverton, as a national park to be called Silver Creek Falls park. There are eight falls on two branches of Silver creek, all very picturesque and some of them 150 feet high. This region is located 12 miles east of Salem and embraces some 800 acres.

Additional appropriations for the following federal river and harbor projects in his district: Coguille and Umpqua river entrances, Yaguna and Tillamook harbors, Nehalem river, Skipanon channel, Willamette river up to Salem. All of these are existing projects, but work on them must be continued in order to realize the original intentions.

Hatchery Funds to Be Asked
An increase in the federal allotment of funds for the Rogue river fish hatchery, above Medford, so that Chinook, silverside and steelhead salmon may be produced in greater numbers, and more young fish grown to stock Oregon rivers. Representative Hawley expects that this will call for about \$50,000 more than present allotments.

He also will urge the forest service to co-operate to the greatest extent possible in continuing construction of the road between Albany and Bend now completed to Cascade, across the mountains to the Willamette river.

Mr. Hawley believes that the legislation which passed the house at the last session authorizing a appropriation of an additional \$100,000,000 for public buildings throughout the country will be passed quickly when congress convenes.

He is now sitting with the joint commission on internal revenue taxation, listening to reports from investigators on possible simplifications of federal tax laws.

LOCAL NEWS

On Business—H. Hastings of Wilbur was a business visitor in this city for a brief time yesterday afternoon.

Mrs. Sands Visitor—Mrs. F. Sands of Wilbur was here late yesterday afternoon visiting with friends and shopping.

Visit in Afternoon—Mr. and Mrs. W. Voorhies of Looking Glass were visitors in Roseburg during the afternoon on Tuesday.

Visitors Here Tuesday—Mr. and Mrs. Wm. Bailey of South Deer Creek were in Roseburg visiting and shopping late yesterday afternoon.

In Tuesday—W. Vashaw, Looking Glass rancher, spent several hours Tuesday in this city looking after business matters and trading.

Business Visitor—Tom Melton, resident of South Deer Creek, was a Roseburg visitor Tuesday afternoon and was attending to business affairs.

From Yoncalla—Mr. and Mrs. G. Cody Long of Yoncalla were in Roseburg yesterday afternoon visiting with friends and attending to business affairs.

Visitors in Town—Mr. and Mrs. Howard Withers, residents of Medford, spent Tuesday afternoon in this city attending to business matters and visiting.

On Business in Portland—E. K. McLendon, local real estate dealer, is in Portland attending to business affairs, having gone to the metropolis the first of the week.

Here from Hillsboro—Mrs. L. C. Johnson arrived here yesterday afternoon from Hillsboro and will spend a few days visiting at the home of Mrs. Mona Frear in this city.

Tonsilectomy at Hospital—Verna, the daughter of Mr. and Mrs. George Woolley of Drain underwent a tonsil operation at Mercy hospital yesterday with Dr. A. C. Seely in attendance.

Gone to Eugene—Clarence Main, who has been spending the past few weeks in this city while recovering from an injury to his foot, left yesterday for Eugene. He is employed at Oakridge.

Mrs. Flint Here—Mrs. Guy Flint of Portland but formerly of this city, arrived here yesterday afternoon to visit at the home of Mrs. M. F. Rice for several days.

Dayton People Leave—Mr. and Mrs. George Hartzell, who have been here from Dayton, Ohio, on a visit, left yesterday afternoon for California points. They plan to return here later.

Return Home Today—Mr. and Mrs. F. Sheldahl returned to Roseburg today following a trip to Cottage Grove and Eugene where they have been visiting with friends for the past week.

Leave for Bandon—Mr. and Mrs. L. E. Carr left this morning for Bandon, where they will spend the rest of the week looking after business matters in connection with their variety store at that place.

Business Visitor—E. J. Blattner, Canyonville business man, was a visitor in this city during the afternoon. Tuesday. Mr. Blattner is postmaster at Canyonville and also owns a drug store there.

Going to Portland—Eddie Ash, who came here a fortnight ago from Sacramento and has been visiting at the Methodist parsonage at Dilard, is going to Portland today to be gone indefinitely.

Attending Convention—Prof. E. S. Hall, of the Rose school, left yesterday for La Grande, where he will attend the state Parent-Teacher Association convention, representing the Rose school P. T. A.

Ex-Resident Visits Here—Guy Black, former resident of Roseburg, was here yesterday afternoon greeting old friends. Mr. Black is manager of the C. J. Breier company store at McMinnville and was on route home from a business trip to San Francisco.

Arrive for Funeral—The Misses Lenta and Josephine Baumgartner, nieces of H. H. Stapleton who passed away Monday, arrived here yesterday afternoon from Salem and Roy Stapleton of Albany, brother of Mr. Stapleton, arrived here also in the afternoon for the funeral taking place today.

Dr. Chaney to Be Here—Dr. S. J. Chaney, district superintendent of the Methodist church, is coming here from Eugene today and is scheduled to speak to night at the First M. E. church here. He is also to hold a quarterly meeting at Camas Valley and discussion will be held in regard to the building of a new church for that district.

Change of Date—The program and box social to be given by the Brick school next Friday has been changed to Monday, the 31st, and will be given then. A fine program which includes two one-act plays by the children, has been prepared by the school, and the box social is in charge of the Parent-Teacher association. Everyone is invited.

From Myrtle Point—Mr. and Mrs. C. O. Gano of Myrtle Point were visitors in Roseburg on Tuesday.

Here for Show—C. O. Garrett of Glendale is in the city today to attend the corn and fruit show.

Visitor Tuesday—Jimmy Conn of Medford was visiting and transacting business here late yesterday afternoon.

Visitor Today—Mrs. G. R. Bates of Myrtle Creek spent the day in Roseburg visiting with friends and shopping.

Visitor Here—C. B. Rogers, Medford resident, was in this city over Tuesday afternoon to look after business affairs.

From Coast—J. C. Lee was an arrival here from Marshfield yesterday afternoon to look after business affairs.

From Canyonville—Mrs. Ray Wright and baby of Canyonville were here today visiting and attending to business interests.

Visitor Here—Mrs. Addie Brandt of Yoncalla spent several hours yesterday in this city visiting with friends and looking after business matters.

From Wilbur—Mrs. M. W. Miller of Wilbur spent several hours yesterday in this city attending to business matters and visiting.

Mr. Seymour Here—H. C. Seymour, state club leader, was an arrival here last evening from Corvallis to be present for the corn and fruit show here today.

From Medford Offices—H. L. Bromley and J. J. Butcher from the home offices of the California-Oregon Power company arrived last night from Medford on business.

Business Visitor—J. Gilham, Brockway resident, was in Roseburg during yesterday afternoon and was attending to business affairs.

Is Improving—Edward Sjogren of Medford, who has been at Mercy hospital undergoing treatment for typhoid fever the past several weeks, is improving steadily, according to the attending physician, and will be able to return home within a week.

Home From Portland—Mrs. Lois Grant returned to this city yesterday following a business trip to Portland, where she spent a few days. Her daughter, Leslie, who accompanied her to the metropolis, has entered school there for the winter.

Denartment Inspector Visits—Mrs. Nellie M. Fleck, department president of the Women's Relief Corps of Oregon, was a visitor here since Sunday and left today for her home at Hillsboro. Mrs. Fleck conducted inspection of the Relief Corps here yesterday and also visited the Oregon Soldiers' Home.

Moving to Portland—Mr. and Mrs. Jack Carter, who have been making their home here for some time, Mr. Carter being employed by the Oregon State company, are leaving for Portland where they intend to make their home in the future. Mr. Carter has been transferred north by the company.

Return Here For Winter—Mr. and Mrs. Robert K. Paris and son, who have been residing on the Craven ranch near Green for the past several months, have returned to Roseburg for the winter. Mr. Paris being employed by the Pickwick Stage company.

Ex-Residents Here—Mr. and Mrs. Phil Singleton, formerly of this city and now making their home in Medford, are here for a few days. Mr. Singleton being in the city on business. While in Roseburg they are visiting at the home of Mr. Singleton's parents, Mr. and Mrs. G. W. Singleton.

Goes on Talking

Bishop Barnes of Birmingham was just beginning a sermon on creation the other day in St. Paul's cathedral, London, when a band of men, led by a minister, marched to the front of the cathedral and demanded that he be cast out of the church for upholding Darwin's theory. After the protest the men marched out and the bishop, shown above, went on with his sermon, in which he affirmed his belief in evolution.

BODY OF LOST BOY IS FOUND; DEATH MYSTERY

(Continued from page 1.)

In the right leg, in front, about six inches from the hip bone and about 10 inches below the appendix. The point of entrance was first thought to have been where the bullet left the body and the presumption was that he had been shot from behind. The fact that the entrance hole is so large and jagged has convinced the authorities and the physicians who examined the body that a ricocheted shot caused the wound. The bullet fragments coursed upward, indicating that it struck some object below where the body stood and splintered there before it hit him. After entering the boy's body it struck the bone and then lodged, part of it in the abdominal cavity, in the intestines and within an inch of the appendix.

Earl did not live 15 minutes, Dr. Robbins believes. He places the time of death at either late Thursday or Friday. Preliminary examination was made at the Nelson creek entrance to the hunting trail at five o'clock Tuesday afternoon. At that time he was uncertain as to whether the boy had been shot or that some other accident had befallen him.

Following the examination, Sheriff Taylor would have little to say except to admit that the investigation would continue. There may be an inquest, although this point has not been determined.

Mrs. Pierce, mother of the boy, was in a critical condition all last night but members of the family reported at noon Wednesday that she had rested. Mr. Pierce could say very little.

EUGENE, Ore., Oct. 26—Where yesterday the mystery was concerned with the whereabouts of Earl Pierce, 13 year old Eugene boy, lost in the mountains near Swishome last Thursday, this morning they concern the manner in which he met his death.

The body of the boy was found at 12:45 o'clock yesterday afternoon just 200 yards from the place where he was said to have been on a deer stand with Howard Rawls and Bert Alphin, both of Albany.

A wound on the inside of the right thigh was apparently the cause of the boy's death. How he could have inflicted this wound himself is the puzzle which Deputy Coroner Simon, Sheriff Frank Taylor and Chief Deputy Sheriff Frank Rogers are investigating today.

Pending an autopsy which will probably be held today, officers are making no implications as to whether the wound was inflicted by young Pierce or came from some other source.

His rifle, found a few feet in front of his body, had been fired, but officers could not explain how it was that the gun was in front of him and how, except by a most extraordinary accident, Earl could have shot himself.

Why it is that none of the searchers found the body days before is not known. Bloodhounds passed within a few yards of where the boy's body lay underneath a vine maple and did not get the scent.

To the fellow workers of Frank Pierce, father of the boy, goes the credit of finding the boy's body. Fifteen minutes after the search was begun at 12:30 o'clock Tuesday noon, Herbert Shedd saw Earl's body and shouted to Dean Morrow, Clarence Hazen and Walter Bousen who were closest to him. James Guard was also within a short distance.

The body was lying directly in Shedd's path and was about 30 feet from where Morrow was making his way.

All honor is being paid to the force of women who worked day and night to provide warm food for the searchers as they arrived and departed on their missions. J. R. Ford, local contractor, closed down the Ford-Nelson mill and called his men off other jobs and sent them into the woods to aid the father in the search for his lost son.

Eat barbecue sandwiches and live forever. Brand's Road Stand.

Do You Realize

that you have not been solicited during the past two years for contributions to charities or to activities that have a right to appeal to the community as a whole?

Have you known of a single case of destitution in the city that has not been promptly and adequately cared for when reported?

This is because the one annual subscription made to the Roseburg Community Chest disposes of solicitation and provides for scientific, efficient management of Community Charities and activities for twelve months.

It prevents repeated and vexatious appeals for funds.

It guarantees that every charity case is thoroughly and personally investigated and the proper assistance rendered at the right time.

It prevents duplication in giving and eliminates fraudulent and unworthy appeals.

In asking you to contribute this year, the Chest Committeemen wish to express their thanks, not for themselves, but in behalf of all those genuinely thankful individuals and organizations who were aided during the past two years as the result of the philanthropy of the Roseburg citizens.

The Community Chest Committee

FARM NEWS

Sprays on perennial weeds in Oregon are being tried out more extensively than ever this year. There have been a few cases of fairly deep kills but for the most part the various treatments have proved quite expensive, experiment station men have found.

Hungarian vetch is the best of the vetches for forage in Oregon where the soil is cold and wet, or where there is danger of freezing injury. The experiment station advises. It is usually sowed at 60 to 80 pounds an acre with about 40 pounds of winter oats.

Sulfur applied in late fall or winter and harrowed in during the renovation of Oregon alfalfa meadows gives good results. Sulfur applied now will have time to oxidize and become more fully effective for the coming crop season, explains the experiment station.

Foul growth in western Oregon alfalfa may be successfully controlled, states the experiment station, by fall renovation where the land is wet in early spring. Spring renovation sets the young growth back a week to 10 days.

Irrigation laterals may more easily be cleaned out, and wooden systems repaired or replaced with more permanent ones before the ground is frozen, reports the Oregon Experiment station.

In eastern Oregon excellent results have been obtained when barnyard manure is distributed where temporary check dams will be needed the following season, states the experiment station. This not only serves for dams but also returns the fertility to the soil.

An ordinary cream separator

may be used in place of a filter to clarify cider, reports the horticultural products section at the state college. The cider may be preserved by sterilizing at 160 degrees and bottling or by addition of a tenth of one per cent by weight of benzoate of soda.

Oregon hop kilns or prune dryers are convenient this time of year in drying corn. Where reasonably well matured, corn will stand a temperature of 150 degrees F. Nothing is gained by extreme drying as it will reabsorb moisture to some extent. Drying in thin layers is most effective, as when attempts are made to dry it when spread more than a foot thick moisture gets away slowly and the corn sometimes sprouts, explains the experiment station. Unless there is a forced draft it does not dry satisfactorily when more than two or three cars deep.

Oregon potatoes have been attacked with blight in some sections.

tions affecting the tubers seriously. Serious rot often develops in the bins and it is best if the potatoes are stored on slatted floors with good ventilation up through the bins to dry them off and cool them as promptly as possible. The blight affected tubers are sorted out as soon as the rot is detected.

Fall harrowing of winter grain in Oregon is generally not advisable except where the grain is well established and young weeds are starting in considerable abundance, according to experiment station specialists.

Because of several small outbreaks of grasshoppers in the Willamette valley and in eastern Oregon last season, serious trouble may be expected next summer, says the entomologist at the experiment station. A survey to locate the egg beds of grasshoppers this fall will enable farmers to know where to put the poison bait next spring.
