ROSEBURG, OREGON, TUESDAY, DEC. 13, 1927.

EFFICIENCY MARCHES ON

Efficiency is a mighty machine that gains momentum as it progresses. Its gigantic growth in industry in the last twenty-five years makes us wonder what miracles the future holds. Between 1899 and 1925 the output of agricultural products in the United States increased about 47 per cent.

A number of Massachusetts bankers have agreed to lend money to commercial houses, farmers and others in the flood-swept regions of Vermont, with only character as the collateral for the loans.

The Umpqua Chiefs are "doing their stuff" to give the old city the Christmas spirit. Tree decorations throughout the business district have been neatly arranged.

Merchants who know their stuff are hitting the ball for Christmas business, and they're getting their share in generous chunks. The opportune time for advertising is at hand.

Henry Ford has put his new car over exclusively through newspaper advertising. No other means were used. You can't fool Henry on anything.

Well, here's hoping that it will all be over by Thursday evening—opening up for business Friday morning—without a quarantine in effect. But, why not make the initial day Thursday. We don't take to Friday very strong for such an auspicious occasion.

The German Athletic Board refuses to let Dr. Otto Peltzer run in this country. The Germans must have gained the impression that everybody over here was refusing to run, from the Republican politicians.

Next week the big rush will be on. This year, in Roseburg, there will be a good excuse for the eleventh hour buyer. A lot of them have been hibernating for the past two weeks.

The Maine woman who knits 70 pairs of mittens every year must be an adept at handing out the mitten.

Pretty cold this morning with a slight fall of the beautiful. But, as usual, a good day was rounded out.

There's plenty of time to do your Christmas shopping after the "lid" has been lifted.
